Mr. Speaker, as I stated, I support the rule, and I will vote for H.R. 3295, The Help America Vote Act of 2001 because we need to begin the process of election reform in this country. After an unprecedented election year of butterfly ballots, chads, and court challenges, we need to assure the American public that real, practical steps are being taken to ensure that the events of Fall 2000 are never repeated. Ney-Hoyer is a good foundation upon which to build. I ask unanimous consent that the following recommendations of my task force be added to the RECORD.

MOTOR VOTER REFORM TASK FORCE COMMITTEE, COMMISSIONED BY CONGRESSMAN GEORGE W. GEKAS, REPORTED RECOMMENDATIONS, MONDAY, SEPTEMBER 17, 2001

Because the states and counties have invested a great deal of money in the Motor Voter system, it would be irrational and wasteful to repeal the Law. Therefore, the Motor Voter Law must be amended if its various flaws are to be corrected. The Task Force has conceived of nine recommendations for amending the Motor Voter Law.

Recommendation 1—Provide Monetary Compensation to States and Counties: Since the Motor Voter Law was enacted, there has been a great deal of expense incurred by the States and counties in meeting the Law's requirements. Most of the expenditures are due to additional equipment, postage, and staff. We believe Federal mandates should have Federal funding; it seems appropriate that the Federal government should compensate the states and counties for the overhead the Motor Voter Law created. Additionally, a special reduced postage rate for the official use of State and County Election Boards must be considered.

Recommendation 2—Mandate Information Sharing between Bureaus to Keep Rolls Accurate: Unless election officials have access to information that disqualifies ineligible voters, these individuals will remain on the rolls. For that reason, we suggest the Immigration and Naturalization Service inform the counties about the citizenship status of registrants, if requested. We also suggest that each Bureau of Vital Statistics share information with the counties regarding:

deaths, marriages, felons, and changes of name, and that States cooperate with each other in order to prevent duplicate or multiple registrations by an individual in multiple States or municipalities in any one state. The U.S. Postal Service should also be a source for National Address Verification. The sharing of information between these Agencies and Bureaus and between States, in particular those states which maintain a central Voter Registry, and counties will allow election officials to maintain much more accurate registration rolls.

Recommendation 3—Requires Counties to Immediately Remove Ineligible Voters: Upon receipt of disqualifying information from a Bureau or Agency, county officials should be required to immediately remove an ineligible voter from the registry, regardless of their activity status.

Recommendation 4—Rolls Should be Purged of Inactive Voters More Frequently: We recommend automatically removing any voter that should fail to vote in two consecutive Federal elections. Not only would this keep the rolls current and accurate, but it would completely eliminate the cost of sending confirmation mailings. Furthermore, this implementation would allow office holders and candidates running for office to target their constituents more effectively.

Recommendation 5—Require Proof of Citizenship upon Registering to Vote: Proof of citizenship should be required of everyone upon registering or re-registering to vote. A signed attestation or a check box will not do, as many resident aliens may misunderstand the meaning of the word 'citizen'. There is also the very real possibility that many non-citizens may be taking advantage of the very lax system of voter registration which is now in place. Acceptable forms of proof would be: a passport, a birth certificate, or a naturalization document.

There must also be a system in place to make certain that everyone who registers to vote is indeed a real and living human being residing at an actual address in the county and state where they are registering.

Recommendation 6—Voter Identification Number: A Voter Identification Card with an assigned Voter ID Number, a photo and a digitized signature for every registered voter could be sent to County Elections Boards to be kept in the voter registration roll books used by each county at each polling place. There must be a system in place to protect the confidential nature of these numbers. Otherwise, their purpose would be defeated. The Voter ID Numbers should be available only to Election Officials and the voter to whom the number is issued.

Recommendation 7—Require Better Checks at the Polls: In addition to preventing registration fraud, better checks must be in order to prevent it at the polls as well. To keep anyone from voting under another person's name, there need to be better identity checks at the polls. A signature and presentation of a photo ID should be required of all voters. This should then be compared to the Voter ID Card in the county's roll book.

Recommendation 8—Verification of Absentee Ballot Applications and Absentee Ballots: There must be a better system in place for verifying the authenticity of Absentee Ballot Applications and Absentee Ballots.

Recommendation 9—Personnel Training: All personnel mandated and responsible for registering voters as provided by the National Voter Registration Act of 1993, must receive comprehensive and intensive training in an attempt to prevent inaccurate, incomplete or fraudulent applications for voter registration.

Mr. REYNOLDS. Mr. Speaker, I yield back the balance of my time, and I move the previous question on the resolution.

The previous question was ordered.

The SPEAKER pro tempore (Mr. SIMPSON). The question is on the resolution.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HASTINGS of Florida. Mr. Speaker, I object to the vote on the grounds that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 223, nays 193, not voting 17, as follows:

Mr. CONYERS, Ms. MCCOLLUM, and Ms. MCCARTHY of Missouri changed their vote from “yea” to “nay.”

So the resolution was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Stated against:

Ms. JACKSON-LEE of Texas. Mr. Speaker, because of a hearing in the Committee on Financial Services on Enron, I missed the previous vote, the rule on election reform. If I had been here, I would have cast a vote for no on the rule.

Ms. MILLENDER-MCDONALD. Mr. Speaker, this is to inform you that on rollcall No. 487, I inadvertently voted “yes” when my intention was to vote “no”.

ANNOUNCEMENT REGARDING PROCEDURES AND DEADLINE FOR FILING AMENDMENTS TO H.R. 1542, INTERNET FREEDOM AND BROADBAND DEPLOYMENT ACT OF 2001

(Mr. DREIER Asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DREIER. Mr. Speaker, this is an announcement that I think Members might be interested in.

Mr. Speaker, today a Dear Colleague letter is going to be sent to all Members informing them that the Committee on Rules is planning to meet this week to grant a rule which may limit the amendment process for H.R. 1542, the Internet Freedom and Broadband Deployment Act of 2001.

Any Member who wishes to offer an amendment should submit 55 copies of the amendment and one copy of a brief explanation of the amendment by 2 p.m. on Thursday. That is 24½ hours from now. That is December 13. It should be sent up to the Committee on Rules, H-312 in the Capitol.

Mr. Speaker, the bill, as our colleagues know, was reported favorably by the Committee on Energy and Commerce on May 24, and ordered reported, adversely, by the Committee on the Judiciary on June 18. Amendments should be drafted to the text of the bill as reported by the Committee on Energy and Commerce, which will be available on the Web sites of both the Committee on Energy and Commerce and the Committee on Rules.

Mr. Speaker, Members should use the Office of Legislative Counsel to ensure that their amendments are properly drafted, and should check with the Office of the Parliamentarian to be certain that their amendments comply with the rules of the House.

(2) the State has enacted legislation to enable the State to meet each of the minimum standards for State election systems described in section 502.

(b) METHODS OF IMPLEMENTATION LEFT TO DISCRETION OF STATE.—The specific choices on the methods of implementing the legislation enacted pursuant to subsection (a)(2) shall be left to the discretion of the State.

SEC. 502. STANDARDS DESCRIBED.

The minimum standards for State election systems described in this section are as follows:

(1) The State will implement a Statewide voter registration system networked to every local jurisdiction in the State, with provisions for sharing data with other States, except that this paragraph shall not apply in the case of a State in which, under law in effect continuously on and after the date of the enactment of this Act, there is no voter registration requirement for any voter in the State with respect to an election for Federal office.

(2) The State election system includes provisions to ensure that voter registration records in the State are accurate and are updated regularly, including the following:

(A) A system of file maintenance which removes registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993, registrants who have not voted in 2 or more consecutive general elections for Federal office and who have not responded to a notice shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote.

(B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.

and after the date of the enactment of this Act, all votes in the State in general elections for Federal office are cast by mail.

(4) The State has adopted uniform standards that define what will constitute a vote on each category of voting equipment certified for use in the State.

(5) The State has implemented safeguards to ensure that absent uniformed services voters (as defined in section 107(1) of the Uniformed and Overseas Citizens Absentee Voting Act) and overseas voters (as defined in section 107(5) of such Act) in the jurisdiction have the opportunity to vote and to have their votes counted.

(6) The State requires new voting systems to provide a practical and effective means for voters with physical disabilities to cast a secret ballot.

(7) If the State uses voting systems which give voters the opportunity to correct errors, the State shall ensure that voters are able to check for and correct errors under conditions which assure privacy. States, and units of local government within the States, replacing all voting machines within their jurisdiction shall ensure that the new voting system gives voters the opportunity to correct errors before the vote is cast.

SEC. 503. ENFORCEMENT.

(a) REPORT BY COMMISSION TO ATTORNEY GENERAL.—If a State does not provide a certification under section 501 to the Election Assistance Commission, or if the Commission has credible evidence that a State's certification is false or that a State is carrying out activities in violation of the terms of the certification, the Commission shall notify the Attorney General.

(2) the State has enacted legislation to enable the State to meet each of the minimum standards for State election systems described in section 502.

(b) **METHODS OF IMPLEMENTATION LEFT TO DISCRETION OF STATE.**—The specific choices on the methods of implementing the legislation enacted pursuant to subsection (a)(2) shall be left to the discretion of the State.

(c) **CHIEF STATE ELECTION OFFICIAL DEFINED.**—In this title, the “chief State election official” of a State is the individual designated by the State under section 10 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg–8) to be responsible for coordination of the State’s responsibilities under such Act.

SEC. 502. STANDARDS DESCRIBED.

The minimum standards for State election systems described in this section are as follows:

(1) The State will implement an official State-wide voter registration system networked to every local jurisdiction in the State, with provisions for sharing data with other States, except that this paragraph shall not apply in the case

of a State in which, under law in effect continuously on and after the date of the enactment of this Act, there is no voter registration requirement for any voter in the State with respect to an election for Federal office.

(2) The State election system includes provisions to ensure that voter registration records in the State are accurate and are updated regularly, including the following:

(A) A system of file maintenance which removes registrants who are ineligible to vote from the official list of eligible voters. Under such system, consistent with the National Voter Registration Act of 1993, registrants who have not voted in 2 or more consecutive general elections for Federal office and who have not responded to a notice shall be removed from the official list of eligible voters, except that no registrant may be removed solely by reason of a failure to vote.

(B) Safeguards to ensure that eligible voters are not removed in error from the official list of eligible voters.

(3) The State permits, by the deadline required under section 504(b), in-precinct provisional voting by every voter who claims to be qualified to vote in the State, or has adopted an alternative which achieves the same objective, except that this paragraph shall not apply in the case of a State in which, under law in effect continuously on and after the date of the enactment of this Act, all votes in the State in general elections for Federal office are cast by mail.

(4) The State has adopted uniform standards that define what will constitute a vote on each category of voting equipment certified for use in the State.

(5) The State has implemented safeguards to ensure that absent uniformed services voters (as defined in section 107(1) of the Uniformed and Overseas Citizens Absentee Voting Act) and overseas voters (as defined in section 107(5) of such Act) in the jurisdiction have the opportunity to vote and to have their votes counted.

(6) The State requires new voting systems to provide a practical and effective means for voters with physical disabilities including blindness to cast a secret ballot.

(7) If the State uses voting systems which give voters the opportunity to correct errors, the State shall ensure that voters are able to check for and correct errors under conditions which assure privacy. States, and units of local government within the States, “procuring new voting machines within their jurisdiction, except for States and units replacing or supplementing existing equipment (within the same voting system), shall ensure that the new voting system gives voters the opportunity to correct errors before the vote is cast.

SEC. 503. ENFORCEMENT.

(a) **REPORT BY COMMISSION TO ATTORNEY GENERAL.**—If a State does not provide a certification under section 501 to the Election Assistance Commission, or if the Commission has credible evidence that a State’s certification is false or that a State is carrying out activities in violation of the terms of the certification, the Commission shall notify the Attorney General.

SEC. 903. NO EFFECT ON OTHER LAWS.

(a) IN GENERAL.—Nothing in this Act and no action taken pursuant to this Act shall supersede, restrict, or limit the application of the Voting Rights Act of 1965, the National Voter Registration Act of 1993, the Voting Accessibility for the Elderly and Handicapped Act, or the Americans with Disabilities Act of 1990.

(b) NO CONDUCT AUTHORIZED WHICH IS PROHIBITED UNDER OTHER LAWS.—Nothing in this Act authorizes or requires any conduct which is prohibited by the Voting Rights Act of 1965, the National Voter Registration Act of 1993, or the Americans with Disabilities Act of 1990.

(c) APPLICATION TO STATES, LOCAL GOVERNMENTS, AND COMMISSION.—Except as specifically provided in the case of the National Voter Registration Act of 1993, nothing in this Act may be construed to affect the application of the Voting Rights Act of 1965, the National Voter Registration Act of 1993, or the Americans with Disabilities Act of 1990 to any State, unit of local government, or other person, or to grant to the Election Assistance Commission the authority to carry out activities inconsistent with such Acts.

The SPEAKER pro tempore. The gentleman from Ohio (Mr. NEY) and the gentleman from Maryland (Mr. HOYER) each will control 30 minutes.

The Chair recognizes the gentleman from Ohio (Mr. NEY).

Mr. NEY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise today in support of H.R. 3295, the Help America Vote Act of 2001. This legislation is a culmination of a long series of hearings, discussions, and negotiations.

In crafting this bipartisan election reform bill, we heard from and consulted with groups from across the United States that represent the interests of voters, election officials, State and local governments, and others who care about this issue.

From the outset of this process, my goal was to craft legislation that could be supported by Members from both sides of the aisle. That is critical in this process.

Mr. Speaker, I recognize the gentleman from Maryland (Mr. HOYER), our ranking member of the Committee on House Administration, and all of the Members on both sides of the aisle from that committee, because if it were not for the gentleman from Maryland (Mr. HOYER), his diligence, and the

integrity, the will and desire to improve elections in one of the most important bills in the history of this country in the election process, besides the Voting Rights Act, we would not be standing here today.

The fact that we have 173 cosponsors on the bill, 63 Republicans and 110 Democrats, more cosponsors than any other election reform bill in the House, I think demonstrates that we achieved the goal that we wanted. That is the way it should be. Improving our country's election system should not and cannot be a partisan issue. Everybody in the United States has the right to vote and has to feel secure that their vote counts.

Republicans and Democrats nationwide and here in this Congress agree on the necessity of ensuring that all citizens who wish to vote can, and that their votes will be counted accurately. This bill would advance us towards that goal.

The first title of the bill is the punch card replacement program. The title authorizes \$400 million to allow those jurisdictions that used punch card voting systems in the November 2000 election to get rid of them. It is obvious that we need to get rid of these antiquated technologies and replace them with machines voters have confidence in.

I hope, Mr. Speaker, that one day the way we will see punch card machines in the United States is to go to the Smithsonian in order to view them. Mr. Speaker, this bill authorizes funds to make that happen.

This bill creates a new Election Assistance Commission called the EAC. This new commission will assume the functions of the Office of Election Administration currently under the Federal Election Commission.

The new EAC will serve as a national clearinghouse for the compiling of information and review of procedures affecting the administration of Federal elections. The EAC will also be charged with developing new voluntary election management practice standards. It will distribute the election fund payments, research and development grants, and pilot programs authorized by this bill.

I will point out that the name we chose for this commission is not by accident. The purpose of this commission is to assist State and local governments with their election administration problems; its purpose is not to dictate solutions or hand down bureaucratic mandates.

In fact, one of the first premises that our ranking member, the gentleman from Maryland (Mr. HOYER) and I agreed on, and we received sympathy on this issue around the entire Congress, I believe, is that it will not be a rulemaking body. It will have teeth, it will have an advisory board that the gentleman from Maryland (Mr. HOYER) has suggested, and a standards board of

local officials across the U.S. that we had suggested, but in fact, it will not be dictating through rules and regulations on a daily basis of how local elections will be carried out.

The commissioners serve part-time. Of the four commissioners, no more than two can be from the same party, so bipartisanship is assured. Additionally, it must consult with and consider recommendations of the advisory board and the standards board that I mentioned previously. These boards, again, will consist of election officials and other interested groups who have interest in or expertise in election issues. These boards will have a voice on this commission, and that voice will be heard.

In addition to the funds authorized for punch card replacement, this bill authorizes \$2.25 billion for election fund payments to the States. The election fund payments will be used for a variety of things, from purchasing new equipment to updating registration systems, to assuring access for those with physical disabilities to the polls, to increasing poll worker education and training, sending sample ballots, and a wide variety of other uses that are, once again, good for the United States election system.

The fund is designed to allow a State to determine its greatest needs and to devote the resources to those needs. Along with these funds come funding conditions.

States that take fund payments must certify, for example, that they have provided \$1 to match every \$3 provided by the Federal Government, a 25 percent match. They also must demonstrate that they have established a statewide benchmark for voting system performance, and also that they have adopted the voluntary election standards developed by the new Election Assistance Commission, or they have developed their own standards that will do the job; and that they have in each precinct or polling place a voting system in place which is fully accessible to people who have a form of disability.

These funding conditions will ensure that the Federal dollars are spent appropriately, and that the EAC will monitor compliance with these conditions.

This bill also creates the Help America Vote program. This was an idea that the gentleman from Maryland (Mr. HOYER) brought forth that I think is tremendous. We have it at the high school level and at the college level. This program is designed to get the country's young people involved in the energetic give and take of public debate through our democratic process through volunteer service as non-partisan poll workers and assistants.

One common view that we heard from election officials across the Nation in both parties was that there is a critical shortage of poll workers. This

program will have the two-fold benefit of helping with this shortage, while also getting our young people involved in their democracy.

All of us in this institution constantly talk about getting young people involved in the process, getting them to be registered to vote. This component on this bill, this part, maybe has not been talked about daily in the media, Mr. Speaker, but it is, I think, one of the most valuable things also that we are doing in this bill.

Title V is the minimum standards section of the bill. During negotiations, some feared that having funding conditions was not adequate because voters who might live in States that did not take the funds would not be protected. Others opposed intrusive Federal mandates that could become burdensome and inefficient.

The minimum standards we included in this bill strike the appropriate middle ground. That is why I believe, Mr. Speaker, we see a wide variety of people from this House, Members from both parties, from all the political spectrums, who have cosponsored this, because we achieved that middle ground that we needed. The minimum standards guarantee certain protections for all voters in the United States without imposing an intrusive, federally-designed system.

There are seven minimum standards. Briefly, they are:

The State will implement a statewide registration system that is networked to every jurisdiction in the State;

The State has a system of file maintenance which ensures that the voting rolls are accurate and are updated regularly;

The State permits in-precinct provisional voting by any voter who claims to be qualified to vote;

The State has adopted uniform standards to define what constitutes a vote on the different types of voting equipment in use in the State;

The State has implemented safeguards to ensure that military service personnel and citizens living overseas have the opportunity to vote and have their vote counted;

The State requires that new voting systems provide a practical and effective means for voters with physical disabilities to cast a secret ballot;

And also, States that have technology that allows voters to check for errors must ensure that they are able to do so under conditions which assure privacy, and States replacing their voting systems must do so with machines that give voters the opportunity to correct errors before the ballot is cast.

The Commission will monitor compliance with these minimum standards, and can make a referral to the Justice Department in cases of noncompliance.

Mr. Speaker, this bill will also help assure the voting rights of our service

personnel and overseas citizens. That was a huge issue, as we know, that has come to light, and we appreciate the work that many Members of the House did on this in giving input, people such as the gentlewoman from New York (Mrs. MALONEY) and the gentleman from New York (Mr. REYNOLDS); the gentleman from Indiana (Mr. BUYER), and many others.

It includes a number of provisions that will make it easier for our service personnel to obtain ballots and transmit them in a timely fashion.

Additionally, we will require the Department of Defense to make sure that there are an adequate number of voting assistance officers assigned, and to make sure that ballots are properly postmarked so they cannot be challenged.

Mr. Speaker, this bill, once again, is the culmination of a lot of hard work. It is carefully crafted and written in the spirit of bipartisan and compromise. I think it is a package that really deserves support.

I also want to thank the gentleman from Missouri (Mr. BLUNT), who is a former Secretary of State. He gave us, from the first day forward, some dynamic ideas and great support on this bill.

Again, I want to thank the gentleman from Maryland (Mr. HOYER). We could not be here if it was not for his spirit on this, and his resolve to make sure that we have good elections in this country.

Mr. Speaker, this bill evolved from a punch card issue into something way beyond that that has teeth, that makes changes, but does it in a responsible way. That is why we have the support of local governments. Speaker Marty Stevens of the National Council of State Legislators and all their staff are supporting this bill; also President Jimmy Carter and President Gerald Ford; Phillip Zellico, the executive director of the National Commission on Election Reform; Ron Thornberg, a Republican Secretary of State from Kansas and president of the National Association of Secretaries of State; Sharon Priest, a Democrat from Arkansas and past president of this association; and Ken Blackwell, a Republican from Ohio.

On a bipartisan basis, the Secretaries of State stepped up to the plate to once again help us to craft this bill; Ralph Taber of NACO, Doug Lewis, executive director of the Elections Center, and many, many others.

The staffs of the Committee on House Administration on both sides of the aisle all came together to make these ideas gel, but all with the same spirit.

As we look around at what has happened to this country, as we look around at those who have tried to attack our very foundation, we realize that the election of individuals from all levels is important, because we do

have the greatest democracy in the world. We want the people to feel comfortable with our election process.

□ 1345

This bill does that. It helps America vote, and I urge its support.

Mr. Speaker, I reserve the balance of my time.

Mr. HOYER. Mr. Speaker, I yield myself 5½ minutes.

Let me at the outset say that no one could have had a more positive partner in working on this legislation than I had in the gentleman from Ohio (Mr. NEY). The chairman of the Committee on House Administration is dedicated and committed to producing a positive product. He has done that. I have been pleased to work with him in this process, and I thank him for his leadership.

Mr. Speaker, 1 year ago tonight in *Bush v. Gore*, the United States Supreme Court effectively determined the outcome of our last Presidential election. But today this House has an historic opportunity to let this day be remembered not for one of the most controversial decisions in the court's history, but for congressional action to protect our most cherished democratic right: the right to vote and the right to have that vote counted.

One hundred million Americans went to the polls on November 7, 2000, but an estimated 6 million, according to the CalTech-MIT study, failed to have their votes counted.

Thus, today, on this 1-year anniversary of *Bush v. Gore*, I am pleased to join our colleague, the gentleman from Ohio (Mr. NEY), the chairman of our committee, and Members from both sides of the aisle in strongly supporting H.R. 3295, the Help America Vote Act of 2001.

This bipartisan election reform legislation, the most widely supported election reform bill in the House with 173 cosponsors, addresses virtually every major election system flaw that came to light after our last national election. The Help America Vote Act is an important mixture of Federal assistance to States and minimum election standards.

It will require, not ask, but require, all States to adopt a state-wide voter registration system linked to local jurisdiction; in-precinct provisional balloting; a system for maintaining the accuracy of voter registration records; uniform standards for defining what constitutes a vote on different types of voting equipment in different parts of the States; assurances that overseas military voters have their votes counted; assurances that voters have the right and opportunity to correct errors; and practical and effective means for disabled voters to cast secret ballots on new voting equipment.

These election standards are not discretionary, nor are they dependent on the States' receiving Federal assist-

ance under the bill. States shall enact them, and they shall be enforced.

The Help America Vote Act also authorizes, as the chairman has said, \$2.65 billion for Federal election reform, which includes \$400 million for buyout of the infamous punch cards. The remaining \$2.25 million will help States establish and maintain accurate lists of eligible voters, improve equipment, educate voters, recruit and train poll workers, and assure access for disabled voters.

This bipartisan legislation is the product of numerous hearings, at least four in the Committee on House Administration, the most of any congressional committee this year, in which we received invaluable input from State and local officials.

Furthermore, this legislation has been endorsed by, among others, the National Commission on Federal Election Reform, known as the Ford-Carter Commission; the National Association of Secretaries of State; the National Conference of State Legislatures; the National Association of Counties; the National Association of County Recorders, Election Officials and Clerks; the Election Center; the National Federation of the Blind; and the League of Women Voters of Los Angeles County.

Why is this important? Because it is those individuals who will have to run elections, and the fact that they are supportive of these requirements and these procedures is critically important to the next election.

In fact, in a recent op-ed column in the *Washington Post*, former Presidents Ford and Carter observed: "With the exception of the civil rights laws of the 1960s, this bill," that is on the floor today, "could provide the most important improvements in our democratic election system in our lifetimes."

This is an extraordinarily good bill. It is not a perfect bill, but it goes much further than anybody would have thought at the beginning of this session.

Finally, I want to specifically thank the gentleman from Michigan (Mr. CONYERS), the ranking Democrat of the Committee on the Judiciary, and the gentlewoman from California (Ms. WATERS), the chairman of the Democratic Caucus Special Committee on Election Reform. Their insight and tireless advocacy on this important issue has improved this bill. H.R. 3295, in fact, incorporates many of their recommendations.

This legislation is not a magic elixir. However, it will significantly improve the integrity of our election process, encourage voter participation and restore public confidence in our system. In short, it is a historic opportunity for this House to right the undemocratic wrongs in our election system.

Election reform is a down payment on the right that defines us as a people. That is an investment in democracy

that I urge every one of my colleagues to make today. This is a good bill. Let us vote for it. Let us pass it to the Senate. Let us take action.

Mr. NEY. Mr. Speaker, I yield 2 minutes to the gentleman from California (Mr. Horn).

Mr. HORN. Mr. Speaker, today, the House has an opportunity to address the many problems that were uncovered in past years' Presidential elections. In Florida and many other States, the past election made clear that there are serious doubts about how we conduct some of our elections.

This bill sets minimum Federal standards that the States must meet, and it provides more than \$2.6 billion in Federal funds to help them meet those standards.

The bill specifically provides \$400 million to begin getting rid of all the other punch card voting machines that were such a problem in Florida and many other places. Former Presidents Carter and Ford headed a national commission to examine solutions for all of the problems in our electoral system. They endorse this bill, so does the Los Angeles Times and dozens of other newspapers. It is a sensible step to protect the rights of voters, and we should pass it without further delay.

The legislation before us is well balanced, generally bipartisan. I congratulate the gentleman from Ohio (Chairman NEY) and the gentleman from Maryland (Mr. HOYER) for this wonderful bill that we have before us. They have produced excellent work in doing this; and the bill before us, H.R. 3295, the Help America Vote Act, offers a comprehensive and sensible response that will help to eliminate those doubts and restore the integrity and credibility of our elections.

Mr. HOYER. Mr. Speaker, will the gentleman yield?

Mr. HORN. I yield to the gentleman from Maryland.

Mr. HOYER. Mr. Speaker, I want to thank the gentleman. The gentleman from California (Mr. HORN) has been involved since the very first day of this session and we introduced a bill that was not as comprehensive as this. The gentleman was a sponsor and has worked with us ever since. I thank him for his involvement.

Mr. HORN. Mr. Speaker, I thank the gentleman. The gentleman from Maryland (Mr. HOYER) and the gentleman from Ohio (Mr. NEY) have spent hours to do this. And when the 50 States say this is good, one can imagine that Members of this body think it is good.

Mr. HOYER. Mr. Speaker, I yield 2 minutes to the very distinguished gentleman from Georgia (Mr. LEWIS). There is no one in this House, perhaps no one in this country, who has fought harder, risked more, shown more courage and commitment in assuring that every American has the right to vote.

Mr. LEWIS of Georgia. Mr. Speaker, I want to thank the gentleman from

Ohio (Mr. NEY) and the gentleman from Maryland (Mr. HOYER) for bringing this bill to the floor. I want to thank my friend and colleague, the gentleman from Maryland (Mr. HOYER), for yielding me time. I know this has not been easy for the two of you, but you brought us to where we are today.

Mr. Speaker, I rise today in support of moving the process of election reform forward. It has been over a year since the 2000 election and other elections have already been held. What happened in Florida last year and so many other places in our Nation must never ever happen again. Voters were denied the right to vote by incorrect voting lists, confusing ballots, and out-of-date voting machines.

The right to vote is precious. It is almost sacred. People died for the right to vote, and we must do whatever we can to protect that right. This is not a perfect bill. This bill is not a cure-all, but it is a step forward in correcting the problems with our election system and opening up the political process.

Many, many years ago I fought to give people a voice in the outcome of elections, to get people included in the political process, to ensure their right to vote. And 40 years later I remain committed to that goal.

As I said before, this bill does not solve all of the problems, and it is not all that many of us wanted; but it does help to move this process forward this year, right here and now. It is past time that we address this important voting rights issue, and this bill is a necessary step in the right direction. I urge all of my colleagues to support this bill. It is the most important voting rights bill since the passing of the Voting Rights Act in 1965, 36 years ago. Vote for this bill.

Mr. NEY. Mr. Speaker, I yield 3 minutes to my distinguished colleague, the gentleman from Michigan (Mr. EHLERS), who is also sort of the unofficial science advisor of the House Administration Committee and we appreciate his support.

Mr. EHLERS. Mr. Speaker, I am very pleased to rise in support of this bill. I rise on the premise that every registered citizen has the right to vote, can vote, and should vote. I also believe that every citizen who votes has the right to be assured that his or her vote is counted accurately and, furthermore, that that vote is protected against dilution by fraud of others who vote more than once or who vote illegally.

I have served in local, State and national office for over 25 years. During that time I have seen and participated in many elections. The problems we saw last year in Florida are not unique. These problems occur frequently, and I believe this bill will help to solve many of these election difficulties.

While we can debate the particulars of how to administer an election or

which voting equipment to buy, we know that all voting equipment should be based on the strongest possible standards for usability, accuracy, security, accessibility, and integrity. In order to achieve all of that, I introduced a bill earlier this year, H.R. 2275, which would help to assist in establishing the technical standards for voting equipment, making use of the resources of the National Institute of Standards and Technology, which is uniquely qualified to do this. I am very pleased that those provisions of H.R. 2275 have been incorporated into the bill that is before us.

□ 1400

These provisions originally would have created a commission chaired by the Director of the National Institute of Standards and Technology and comprised of local election directors. This commission would have been responsible for developing voluntary technical standards to ensure the usability, accuracy, security, accessibility, and integrity of voting systems and voting equipment.

Those provisions have been carried over to this bill. It is a near perfect fit because it creates the process by which the Election Assistance Commission in this bill can develop and will develop technical standards, which currently are woefully inadequate under current guidelines. These provisions that have been inserted in this bill will help strengthen the bill, providing much-needed research into improving voting equipment.

This bill includes a grant program for developing better voting technology and making sure that our existing systems are secure. It also includes a research program inside the National Institute of Standards and Technology that will review, among other things, the role of human factors in the design and use of voting machines.

In summary, this legislation will ensure that the Election Administration Commission will have an effective, transparent, informed, and complete process for the development of voluntary technical standards for voting equipment and systems. I am very pleased to have participated in the creation of this bill, and I urge that we adopt it.

Mr. HOYER. Mr. Speaker, I am honored to yield 3 minutes to the gentleman from Philadelphia, Pennsylvania (Mr. FATTAH), my distinguished colleague on the Committee on House Administration who has worked very hard on this bill for the last 8 months.

Mr. FATTAH. Mr. Speaker, let me say first that I want to congratulate the principal sponsors of this, the gentleman from Ohio (Mr. NEY) and the gentleman from Maryland (Mr. HOYER). Their work, along with the others on the committee, have really done a tremendous service for the country by moving this issue forward.

I join my colleague, the gentleman from Georgia (Mr. LEWIS), when he says that this is a necessary step towards election reform. It was just a year ago today that the Supreme Court ruled and stopped the vote counting in Florida. It was an international disgrace the way that the process unfolded, and with so many people's votes were discarded by machinery that did not work, or processes that did not comply with what was necessary to have every single person being able to cast a vote and to have that vote counted.

This bill moves us towards real election reform. It is imperfect, but it is part of a process in which I think that this is a bill that is much better than any of us could have hoped for leaving the House. We would hope that the other body will act and that then we would have a conference committee and a final product so that the people who we represent can be assured that in the next election, that some of the items that have been identified in this legislation, in terms of proxy voting and in terms of access and standards at the State level, and doing away with outdated machinery, along with the \$2.6 billion in Federal resources that assist States in this effort, will be part of the final product.

So, again, I want to thank Chairman NEY, who I think has exhibited extraordinary leadership in moving this forward, and Ranking Member Hoyer, bringing together a bipartisan group of people. I am happy to be one of the principal cosponsors of this legislation.

I know there are some who are disappointed in the rule. I am disappointed in the rule. I would have preferred that we would have been able to have a more open process here on the floor in terms of the House fashioning its will. But I am mindful that as we go forward, we all have a responsibility and we are burdened with it to try to make real reform happen. And as we go forward and through this process today, I know that when we pass this out of the House, as has been mentioned before, that since the 1965 Voting Rights Act, this will be the most important voting rights legislation that the House has sent forward in many, many years.

So I want to urge the House to support it. I know that when we come to the final resolution on election reform, this bill will be the linchpin for the action that the entire Congress, along with a Presidential signature, will give to the American people; and that is a much better electoral system.

Mr. NEY. Mr. Speaker, I yield 2 minutes to the gentleman from Nebraska (Mr. TERRY).

Mr. TERRY. Mr. Speaker, I believe in the empowerment of local, county, and State governments. I believe that they, being closer to the people, can provide services better and cheaper. The Federal Government does ask that those

local governments perform tasks on behalf of the Federal Government. Running elections is such a request. In fact, it is not a request, it is a mandate in the United States Constitution. Yet we do not partner and we do not help in the running of those Federal elections.

The consequences are outdated machines, poor election personnel training, poor coordination, bad voter lists, all making the system vulnerable to fraud. The Federal Government, with H.R. 3295, establishes that partnership, helping States and counties more efficiently run Federal elections.

This act enhances the credibility of the election system by providing some financial help to States and counties to upgrade from a punch card system to a newer technology less fraught with danger. It, importantly, also helps those States who moved forward to upgrade while Congress here debated, discussed and compromised.

This act helps to set minimum standards for elections, to avoid confusion in the future. It helps train election officials. It helps ensure, and this is an important aspect, it helps ensure that the votes of our overseas men and women, and those in the service, will count. It requests States clean up their voter lists, and it allows our youth more participation in the process.

These are all extremely positive movements in the right direction for the future of our democracy, and I encourage my colleagues to help secure future elections by voting "yes."

Mr. HOYER. Mr. Speaker, I yield 1½ minutes to the gentlewoman from Florida (Ms. BROWN), who has been as strong a voice on behalf of election reform as we have in this country.

Ms. BROWN of Florida. Mr. Speaker, I thank the gentleman for yielding me this time, and I want to thank the chairman and the ranking member both for their leadership on this matter.

One year ago today, 10 p.m., I was standing in front of the Supreme Court. And I tell my colleagues that it was the coldest night I have ever experienced in my life. And I am not talking about the weather. I am talking about when the Supreme Court selected the President of the United States.

Nobody feels more about this bill than I do, because my constituents were disenfranchised. There is no one in Florida who looks like me that believes we had a fair election in Florida. There is no one who looks like me that does not feel that we had a coup d'etat here in the United States. Harsh words. But the television today, and others, talked about what happened at the Supreme Court. But they said, well, everything is okay. Well, the end does not justify the means. We have to make sure that what happened in Florida never happens again.

Now, this bill is not a perfect bill. I have been an elected official for 20

years. I have never seen a perfect bill. But this bill is a perfect beginning, and I support it and urge my colleagues to vote for it. It starts us on our way.

One provision that I want to talk about that is in this bill is the provisional balloting, wherein 17,000 people would have had an opportunity to have their vote counted if that had been enacted.

Mr. NEY. Mr. Speaker, I yield 2 minutes to the gentlewoman from West Virginia (Mrs. CAPITO).

Mrs. CAPITO. Mr. Speaker, I rise today in strong support of H.R. 3295, the Help America Vote Act of 2001. I want to thank my colleagues, the gentleman from Ohio (Mr. NEY) and the gentleman from Maryland (Mr. HOYER) for creating this bill that will strengthen our Nation's voting system and enhance America's democracy.

The 2000 election highlighted obviously the inaccuracies and inconsistencies in our voting systems. As the country waited to hear the final outcome of the Presidential election, many began to take a closer look at our voting systems. What we saw were outdated technologies and a lack of uniformity.

In my home State of West Virginia, 12 counties of the 55 counties still use the punch ballot. It is easily manipulated and archaic, but these 12 counties lack the funds to replace these machines. With the \$3.6 million that West Virginia will receive in this bill, all those machines will be replaced.

But I think it is interesting to note that there are four other operating voting systems in our small State of West Virginia; optic scans, paper ballots, lever machines, and a highly innovative votronic technology. The lack of uniformity and compatibility creates confusion. This plan will help eliminate that. All States will be able to benefit from the flexible funds, which can be used to enable access to voters with disabilities, strengthen voter turnout, and to consolidate our statewide registration systems.

Voting for an elected official is the hallmark of American democracy. When citizens cast their votes, they are exercising a fundamental right that our forefathers worked to achieve for all generations. With our country at war, we must also be concerned now, more than ever, about ensuring the accuracy of the votes of our men and women overseas. This bill, H.R. 3295, addresses this concern.

Voting is an important and fundamental American right and should never be casually regarded. But our citizens need to have the confidence in their voting systems so they will eagerly and willingly cast their votes and feel confident that they are participating in a strong and efficient democracy.

Mr. Speaker, I urge my colleagues to support the bipartisan Help America Vote Act.

Mr. HOYER. Mr. Speaker, I yield 1½ minutes to the gentleman from New Jersey (Mr. PASCRELL), the distinguished former Mayor of Patterson, who has been involved in elections for a long time and worked very hard on election reform.

Mr. PASCRELL. Mr. Speaker, I thank the gentleman from Maryland (Mr. HOYER) for yielding me this time, and thanks to the Chairman, the gentleman from Ohio (Mr. NEY), for all his work.

The great poet Langston Hughes asked, "What happens to a dream deferred?" Well, in the case of the dream of fair and equal treatment at the polls, a dream deferred is a dream denied. Let us defer these dreams no longer. Let us take this critical step to ensure that all Americans have their votes counted.

Last year's presidential election was a civics lesson for all of us. Not only did we learn that every vote counts, we learned that every vote is not counted. Although we all saw what happened in Florida, we realized the problems existed in every State and in every municipality.

In Atlanta's Fulton County, which uses punch card voting machines, one in every 16 ballots for president was invalidated. In many Chicago precincts that have high African American populations, one of every six ballots was thrown out. If we do not address this blatant irregularity and inequality, then we are letting down the thousands of Americans who take the time to vote each year.

This bill is the right approach. Buying out our punch card systems, improving equipment, recruiting and training poll workers, improving access for people with disabilities, and educating voters about their rights are the things we must be doing. And we should require States to adopt minimum election standards, whether it comes to voter registration or provisional voting.

When one voice is stifled because of outdated election procedures, it stifles our collective system, Mr. Speaker, as a Nation. And none of us should tolerate it any more.

Mr. NEY. Mr. Speaker, I would like to inquire as to how much time is remaining.

The SPEAKER pro tempore (Mr. LAHOOD). The gentleman from Ohio (Mr. NEY) has 10 minutes remaining and the gentleman from Maryland (Mr. HOYER) has 16½ minutes remaining.

Mr. NEY. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. GRUCCI).

Mr. GRUCCI. Mr. Speaker, I would like to thank the chairman for yielding me this time, and I rise today in support of H.R. 3295, the Help America Vote Act.

After experiencing the confusion and the uncertainty of the 2000 election,

Congress must act to restore America's confidence in our voting system. H.R. 3295 does just that. This bill will strengthen our election system while ensuring lawful and impartial voting for every citizen.

□ 1415

Mr. Speaker, our government is based on participation by every citizen. The voice of the citizens in our government is heard through their vote. This legislation will ensure that every voice be heard. This bill not only allows citizens to vote with peace of mind, but also strengthens our democratic process.

The Help America Vote Act authorizes \$400 million to buy out the problematic and outdated punch card voting machines, as well as establishing minimum standards for State election systems. Some of the requirements include that States have a voter registration system linked to local jurisdictions, systems to maintain the accuracy of voter registration records, and the adoption of uniform standards defining what constitutes a vote.

At a time when we honor the service of our brave men and women overseas, this bill includes a system to ensure that both uniformed military men and women and overseas voters have their votes counted.

As a member of the Committee on Science, I am proud to see that some of our provisions that our committee passed earlier this year are included in H.R. 3295. One of the key provisions of the bill is the creation of the Help America Vote College Program. This important program would encourage college students to assist State and local governments in the administration of local elections by working as nonpartisan poll workers. By energizing our college students, we encourage young people to speak out, using both their voice and vote, to become more active in their government.

Mr. Speaker, there is a great need to improve the way our election system operates in America. We need to ensure that all Americans have their voices heard at the polls and their votes recorded fairly. I encourage all of my colleagues to support H.R. 3295.

Mr. HOYER. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. DAVIS).

Mr. DAVIS of Illinois. Mr. Speaker, first of all, let me commend the gentleman from Ohio (Mr. NEY) and the gentleman from Maryland (Mr. HOYER) for the development of this legislation. I also thank the gentlemen for working with me and my colleagues, the gentleman from Illinois (Mr. SHIMKUS) and the gentleman from Maryland (Mr. EHRLICH), to ensure that individuals who are visually impaired and blind are able to vote independently. We appreciate the inclusion of much of our amendment in the manager's amendment.

Mr. Speaker, the question I would like to ask the gentleman from Ohio is what does the gentleman envision by the term "fully accessible" as it relates to the bill?

Mr. NEY. Mr. Speaker, will the gentleman yield?

Mr. DAVIS of Illinois. I yield to the gentleman from Ohio.

Mr. NEY. Mr. Speaker, I thank the gentleman for this very important question. It is my hope and expectation that "fully accessible" would mean that blind persons would have the ability to vote in private and have the ability to independently verify the vote cast.

Mr. DAVIS of Illinois. Mr. Speaker, I certainly appreciate that clarification and share the gentleman's expectation. I feel there is nothing more important than the right to the franchise and for the ability for all people to exercise that right independently and secretly. Again, I thank the gentleman for his accommodation and thank the gentleman for the development of this legislation.

Mr. NEY. Mr. Speaker, if the gentleman would continue to yield, I thank the gentleman for his very important work on this issue, and also for the work of the gentleman from Illinois (Mr. SHIMKUS).

Mr. Speaker, I yield 1 minute to the gentleman from Ohio (Mr. PORTMAN).

Mr. PORTMAN. Mr. Speaker, there is a broad consensus in this country that we need to make some commonsense changes to our election laws. I commend the gentleman from Ohio (Chairman NEY) and the gentleman from Maryland (Mr. HOYER), the ranking member, for reflecting those wishes from around the country and bringing them here to this House today to pass what is a truly bipartisan, truly commonsense approach to making our elections work better.

There is a lot to like about this bill. It provides States that still use punch-card voting systems with necessary funding to replace those outdated systems. This is something that came up in the last Presidential election, and something that needs to be addressed. It is not only a bipartisan issue, it is a nonpartisan issue that people care about at the local level.

It also takes steps to see that States will set up state-wide voter registration systems and make sure that voter rolls are properly maintained, which is very important to the integrity of elections.

It also encourages high school and college students to become nonpartisan poll workers to get involved in the system. But doing all that, it also respects the fact that State and local government must continue to be the overseers of the process of elections. There is a lot to like in this bill, including the way in which these two gentlemen put it together. I commend them and urge support from both sides of the aisle.

Mr. HOYER. Mr. Speaker, I yield myself 10 seconds.

Mr. Speaker, I want to say to the gentleman from Ohio (Mr. PORTMAN), I thank the gentleman for his words. There are, frankly, not very many better legislators in this Congress than the gentleman from Ohio (Mr. PORTMAN). He has done some extraordinary work through the years, and I appreciate his comments. I want him to know what a positive partner, as I said at the beginning of this process, the gentleman from Ohio (Mr. NEY) is.

Mr. Speaker, I yield 2 minutes to the gentleman from Rhode Island (Mr. LANGEVIN), a former Secretary of State of Rhode Island.

Mr. LANGEVIN. Mr. Speaker, today I rise in support of H.R. 3295, the Help America Vote Act. Fixing the shortcomings in our election system is no easy task, and I commend the gentleman from Ohio (Mr. NEY) and the gentleman from Maryland (Mr. HOYER) for their tireless efforts to craft strong, bipartisan legislation, and for allowing me to assist in its development.

As Rhode Island's Secretary of State, I replaced our ancient lever voting machines with state-of-the-art voting equipment and created a system guaranteeing that every vote is counted and every person with a disability has 100 percent voting access; and that is exactly what we must demand in every State.

H.R. 3295 will let States like Rhode Island build on their successes. By counting State expenditures for ongoing election improvement programs toward the 25 percent State match requirement, these model States may implement new and innovative accessible voting technologies and serve as even better models for other States to emulate.

The Help America Vote Act also sets minimum standards for election administration and voting accessibility. Because 84 percent of the Nation's polling places are inaccessible to the physically disabled, I strongly encourage State election officials to follow Rhode Island's cost-effective model and guarantee to all Americans the fundamental right to vote independently.

This bill offers many good improvements, but we must go further. We must ensure full voting access to all people with disabilities. I have advocated for the access board to develop national standards and deadlines for polling place accessibility, and I will continue to push for this mandate.

Today's legislation will lay the foundation of a great new era of public participation in the democratic process. While it is not a perfect bill, it is an important first step in addressing the inequities of our Nation's voting systems, and I encourage my colleagues to support it.

Mr. NEY. Mr. Speaker, I yield myself 10 seconds.

Mr. Speaker, I thank the gentleman from Rhode Island (Mr. LANGEVIN). He has brought his expertise as Secretary of State to the table here in the House and has been a tremendous resource working with us throughout the process.

Mr. Speaker, I yield 1 minute to the gentleman from Delaware (Mr. CASTLE).

Mr. CASTLE. Mr. Speaker, I, too, rise in support of H.R. 3295; and I, too, congratulate the sponsors for the work that they have done.

My State happens to be very advanced. We have a fully electronic system; and while some States such as Delaware have such a modernized voting system, we will be able to use these funds for voter outreach and training poll workers and making polls more accessible to disabled voters. There are a lot of good things in this bill.

Mr. Speaker, these gentlemen deserve congratulations; but I would like to speak to a couple of things. One, since I have been involved in elected politics, and I have seen all kinds of problems in Wilmington, Delaware, and the State of Delaware, I have seen a lot of improvements. The sanctity of the vote to people is of extraordinary importance. Americans have the right across the United States of America to feel that their vote is going to be counted and their vote counts as much as the President of the United States. That is at the heart of democracy, and that is why it is so important that Congress speaks to this today.

The fairness of elections is important. We need to feel it is not the Supreme Court, but the people of the United States of America who are deciding who our elected officials are going to be. It is also very significant that we are addressing those problems as well; and the issues of disabilities are important. I hope all Members support the legislation.

Mr. HOYER. Mr. Speaker, I yield 1 minute to the gentleman from Missouri (Mr. CLAY).

Mr. CLAY. Mr. Speaker, I rise in support of the Help America Vote Act of 2001. I do this with some reservations. However, it is necessary that we pass this bill today. I thank the gentleman from Ohio (Mr. NEY) and the gentleman from Maryland (Mr. HOYER) for their persistence in bringing this bill to the floor.

The election of 2000 disenfranchised millions of voters and illustrated the shambles in which we find our current voting system. The right to vote is sacred and guaranteed by the Constitution. This right was made a mockery during the election of 2000. Congress must act to guarantee that every single vote is counted, and that did not happen in 2000.

Many citizens have died trying to secure and protect the right to vote in this country. James Chaney, Michael

Schwerner, and Andy Goodman died in Philadelphia, Mississippi, in 1964 because of their efforts to protect the right of others to vote. I will not let their deaths be in vain. I hope that other Members of this body share that sensitivity. The bill is not perfect, but it is a compromise and a work in progress. Let us keep the process alive and vote for this bill. Let us send it to the Senate and allow them to work their will on their side.

The SPEAKER pro tempore. Does the gentleman from Ohio, the manager of the bill, yield for a unanimous consent request?

Mr. NEY. Mr. Speaker, I yield 1 minute to the gentleman from Oklahoma (Mr. ISTOOK).

Mr. ISTOOK. Mr. Speaker, I appreciate the efforts of the gentleman from Ohio (Mr. NEY) and all Members who have been involved in this legislation. Many of us have a concern, however, that although this addresses with some special funding States who have not been as diligent about updating their electoral machinery, although States which have been more apathetic are rewarded under this, there is no reward, no incentive, for States which have been diligent.

My State of Oklahoma is one such diligent State. Oklahoma spent \$20 million to create optical scanning voting equipment in every precinct in every county in Oklahoma. I applaud the foresight of our former State election board secretaries, Lee Slater and Lance Ward, in doing so. The amendment, which was intended to be a part of a manager's amendment that ended up not being, is simply to say that States which have funded an optical scanner or electronic system on a state-wide basis would be reimbursed at the same per-precinct rate as States whose equipment we seek to replace under the bill.

REQUEST TO OFFER AMENDMENT

Mr. ISTOOK. Mr. Speaker, I ask unanimous consent to offer the amendment at the desk.

The SPEAKER pro tempore (Mr. LAHOOD). Is there objection to the request of the gentleman from Oklahoma?

Mr. PASCRELL. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

Mr. HOYER. Mr. Speaker, I yield 1 minute to the gentleman from Maryland (Mr. CARDIN), the former Speaker of the House in Maryland.

Mr. CARDIN. Mr. Speaker, first, I congratulate the gentleman from Maryland (Mr. HOYER) and the gentleman from Ohio (Mr. NEY) for the manner in which they have brought forward this legislation. Along with the gentleman from Maryland (Mr. HOYER) and other Members of this body, I serve as a representative on the Commission on Security and Cooperation in Europe. That group monitors

human rights and democratic issues in the European countries, the United States, and Canada. We have the responsibility at times to monitor elections in developing countries.

□ 1430

My point, Mr. Speaker, is that if our 2000 election was monitored by that body, it would not have passed international standards. I congratulate all that are responsible for bringing forward this legislation because it is an appropriate Federal response to start us down the road to guarantee to the American people that our State election process will, in fact, count every vote. It is the way that we should begin. It is good legislation, I urge my colleagues to support it, but let us not lose sight of the fact that we have a long way to go.

Mr. Speaker, I rise today in strong support of H.R. 3295, the Help America Vote Act. I want to commend the House Administration Committee for working in a bipartisan manner to bring this legislation to the floor. I am pleased to be an original co-sponsor of this very important legislation.

It has been a full year since the contested presidential election of 2000 which tested our democratic institutions. Last year the American people understood that our democratic process is more important than the victor, and the Americans accepted the outcome as final. That said, we must ensure that we as a nation never have to go through such an experience again. There must never be a question as to whether every vote was counted. We are the strongest democracy in the world and every American must be secure in knowing that his or her vote counts.

Mr. Speaker, this landmark legislation authorizes \$2.25 billion for fiscal years 2002 through 2004 for payments to states for specified activities related to administering elections. In order to receive federal funding under this program, states must provide at least a 25% match of the federal funds. The bill authorizes the use of funds for states to replace punch card voting systems with more reliable voting systems, or to upgrade their existing voting equipment. Specifically, the bill authorizes \$400 million for one-time payments to states or counties to replace current punch card voting machines with more reliable systems in time for the November 2002 elections.

The bill also establishes an Election Assistance Commission, with a \$10 million annual budget, that would serve as a clearinghouse for information on federal elections, oversee the development of voluntary election standards, and provide funds to states to improve election administration. The bill also includes provisions intended to facilitate absentee voting by military and other overseas voters.

The bill requires states to adopt minimum election standards, and to make several important changes in their voting systems, including: a statewide voter registration system linked to local jurisdictions; in-precinct provisional voting when questions arise about a voter's eligibility; a system for maintaining the accuracy of voter registration records; uniform standards defining what constitutes a vote on

different types of voting equipment; assurances that military and overseas voters will have their votes counted; assurances that voters have the opportunity to correct errors; and practical and effective means for voters with disabilities to cast secret ballots.

Mr. Speaker, I am also aware that for some civil rights organizations that this legislation does not go far enough to ensure every American's right to vote and to have every vote counted. I sympathize with this view, and would like to note that I am a co-sponsor of H.R. 1170, the Equal Protection of Voting Rights Act, introduced by the ranking member of the Judiciary Committee, Mr. CONYERS. H.R. 1170 seeks to strengthen federal Voting Rights Act protections for citizens pursuant to the guidelines set down by the United States Supreme Court in *Bush v. Gore*. In some respects H.R. 1170 goes farther to strengthen voting rights protections than H.R. 3295, and I would therefore urge the Judiciary Committee to mark up and report this legislation to the full House during the second session of the 107th Congress.

However, Mr. Speaker, we cannot allow the perfect to be the enemy of the good. The Help America Vote Act provides unprecedented federal resources to the states to modernize and upgrade their voting systems. The bill also requires states to adopt minimum election standards that will ensure that every vote is counted.

There are other very important provisions in H.R. 3295 that I would like to address.

For example, the bill strengthens existing civil rights protections. The bill is the first legislation to be reported by a house Committee that specifically requires state compliance "with the existing applicable requirements" of the ADA in the administration of elections. By expressly linking the ADA to elections, H.R. 3295 will give courts solid legislative foundation to apply ADA protections to the voting process. Moreover, one of the eligibility requirements for election assistance funding under H.R. 3295 is that there be at least one voting system available in each precinct or polling place that is fully accessible to voters with disabilities. Furthermore, it must be noted that the Help America Vote Act requires states to certify that they are in compliance with the ADA, the Voting Rights Act, the Voting Accessibility for the Elderly and Handicapped Act, and the National Voter Registration Act.

In addition, the legislation addresses the second-chance voting requirement. The bill clearly prescribes that states must adopt an election standards that assures that voters have the opportunity to correct errors. Furthermore, H.R. 3295 requires jurisdictions that currently have voting machines that can detect errors to use that error-detection capability, and that all new voting machines purchased must be capable of detecting errors so that voters may correct possible errors.

The legislation also provides for voter education. Part of the \$2.25 billion provided for states authorizes that states to "educate voters about their rights and responsibilities."

In conclusion, Mr. Speaker, Congress and the states have a lot of work to do before the next Presidential election in 2004. Voting is our most basic right, and Congress must take a role to ensure that all states have modern

voting equipment that will count every vote accurately and fairly. Anything less than that weakens our democracy. I urge my colleagues to support H.R. 3295 as a critical first step in strengthening our democratic process.

Mr. HOYER. Mr. Speaker, I yield 1 minute to the distinguished gentlewoman from Oregon (Ms. HOOLEY).

Ms. HOOLEY of Oregon. Mr. Speaker, first I would like to thank the gentleman from Ohio (Mr. NEY) and the gentleman from Maryland (Mr. HOYER) and the committee for the terrific job they have done on a piece of legislation that we need to pass.

I rise today to engage in a colloquy with my colleague from Maryland.

Millions of Americans now enjoy the convenience and security of voting at home by absentee ballot or, in my State, through an all vote by mail system. Is there anything in this bill that would define the home as a polling place with the intention of stopping or curbing absentee and at-home voting or, as we know it, vote by mail?

Mr. HOYER. Mr. Speaker, will the gentlewoman yield?

Ms. HOOLEY of Oregon. I yield to the gentleman from Maryland.

Mr. HOYER. I appreciate the gentlewoman's request for clarification. I want to say emphatically, nothing in this bill defines anyone's home, nor do we interpret in any way a home as being included as a polling place with the intention of stopping or curbing absentee and at-home voting.

In recognition of Oregon's all-mail voting law, the bill exempted Oregon and other States with all-mail voting from the provisional voting requirements applicable to polling places. So nothing in this bill should be of concern to your State's all-mail voting process.

Ms. HOOLEY of Oregon. I thank the gentleman.

Mr. Speaker, I include the following letter for the RECORD:

STATE OF OREGON,
STATE CAPITOL,
Salem, OR, December 3, 2001.

Hon. DARLENE HOOLEY,
House of Representatives, Longworth Building,
Washington, DC.

DEAR REPRESENTATIVE HOOLEY: It has come to my attention that H.R. 3295, the Ney-Hoyer elections reform bill, may come to a vote in the House as early as this week. I support this legislation but I request your assistance in seeking clarification on one section of the bill prior to a vote of the House. Clarification of this section could be very important in protecting Oregon's vote-by-mail system, which as you know is supported by an overwhelming majority of Oregonians.

Subtitle B—Voluntary Elections Standards, Section 221 (a)(1)(B), states that "The Standards should provide that voters have the opportunity to correct errors at the precinct or other polling place, either within the voting equipment itself or in the operational guidelines to administrators for using the equipment, under conditions which assure privacy to the voter."

I believe we need a clarification or assurance from the sponsors that they do not define the home as a polling place in a vote-by-

mail or absentee voting environment. If the standard above were interpreted as applying to a home, it would have the effect of banning Oregon's vote-by-mail system for federal elections and absentee voting for federal elections in all states that allow it. It is hard to believe that the drafters intended to do such a thing, but a clarification could clear up any potential questions.

Thank you for your assistance in this matter. If you have any questions, contact Deputy Secretary of State Paddy McGuire or me at 503-986-1523.

My Best,

BILL BRADBURY,
Secretary of State.

Mr. HOYER. Mr. Speaker, I yield 2 minutes to the gentleman from North Carolina (Mr. PRICE), one of our most distinguished members, a professor of political science, the author of many books on politics, who probably understands the election system as well as any of us.

Mr. PRICE of North Carolina. Mr. Speaker, I thank the gentleman for his kind words, and I am proud to stand in support of this bill.

Mr. Speaker, last year's election revealed dangerous cracks in our voting system. This was most obvious in Florida where a month-long spectacle left Americans skeptical of the fairness and the legitimacy of our election system. But the problems were not limited to Florida. Studies have indicated that the votes of more than 6 million Americans went uncounted during last year's election cycle. The American people deserve better than that. They expect real election reform that ensures that every single vote counts and is counted.

H.R. 3295 takes a significant step toward improving the integrity of the election system and making certain that every vote will count. The bill grants \$2.25 billion to help States educate voters about their rights; to improve equipment, ballots, and voter instruction; to recruit and train poll workers, and to improve access for disabled voters. The States would be required to implement basic standards for fair and accurate voting. This would include a statewide voter registration system linked to every jurisdiction, in-precinct provisional voting for voters whose credentials are challenged, and means for voters with disabilities to cast secret ballots.

H.R. 3295 also incorporates and builds on legislation I helped author, the Voting Improvement Act, H.R. 775. In particular, it would provide \$400 million, up to \$6,000 per precinct, to buy out unreliable and outdated punch card machines, the type of equipment that has the highest error rate.

Punch card machine use is widespread. Thirty-four percent of the American people cast their votes on this kind of machinery, including eight counties in my State of North Carolina. But a 12-year study done by CalTech and MIT found the spoilage rate for punch cards was unacceptably

high, almost 3 percent nationwide. That means a million votes have been lost since 1988 due to punch card machine error and malfunction.

Mr. Speaker, now more than ever, we need to make certain that every American can participate fully and with confidence in our democratic form of government. We must ensure that every vote is counted. I urge my colleagues to take a significant step toward achieving this goal by joining me in support of H.R. 3295.

Mr. HOYER. Mr. Speaker, I yield 30 seconds to the distinguished gentlewoman from New York (Mrs. MALONEY) who has done as much for counting every American as anybody in America and who has done as much for overseas voters as anybody in America working with our colleague, the gentleman from New York (Mr. REYNOLDS).

Mrs. MALONEY of New York. Mr. Speaker, I thank the gentleman for his kind words and his leadership and congratulate him and the gentleman from Ohio (Mr. NEY) for bringing this important bill to the floor which takes steps to correct the registration balloting and vote counting problems that disenfranchised so many Americans last year.

I also want to thank my good friend from the great State of New York (Mr. REYNOLDS) for being an important voice for the voting rights of Americans living abroad. We introduced a bill together, the Uniformed and Overseas Citizen Absentee Voting Reform Act and many of the elements of this bill are incorporated in the underlying important bill.

Though this legislation isn't perfect it's a positive step toward preventing another presidential election fiasco. The bill includes several improvements to the election process, including authorizing funds to help states and counties replace outdated punch card voting systems. In addition, the bill establishes a minimum standard for state election systems to ensure that votes cast on all types of equipment are counted.

I would like to take a moment to discuss my concerns about the difficulty of Americans living abroad and participating in our election process. Congressman REYNOLDS and I introduced H.R. 1997, the Uniformed and Overseas Citizen Absentee Voting Reform Act of 2001. Though not all of the provisions of that legislation are included in this bill, this legislation does include many helpful provisions.

One would allow an absentee ballot application to apply to two consecutive general federal elections. These applications can be particularly difficult to obtain for overseas residents whose Board of Election in the U.S. do not keep regular business hours.

Another provision requiring the collection and publication of statistics on overseas voting by the states will fill a serious gap in our overseas voting monitoring system. The legislation also contains provisions to promote participation in voting assistance programs. They include providing voting assistance officers on military installations, and designating an office

in each state, whose sole responsibility is to provide information on voter registration procedures and an absentee ballot application to any overseas citizen.

Passing the Help American Vote Act of 2001 would be a victory for the Democratic process. I urge a "yes" vote.

Mr. NEY. Mr. Speaker, I yield 1 minute to the gentleman from Indiana (Mr. PENCE).

Mr. PENCE. Mr. Speaker, I rise today in support of the Help America Vote Act and would like to commend Chairman NEY and Ranking Member HOYER for their unyielding and bipartisan work on this important legislation.

I also want to commend my colleagues who have taken to the floor today to talk about an issue that many of us 12 months ago would have found much more contentious than we have heard today. Long before there were wars and long before threats of anthrax on this Hill, we found ourselves locked as a Nation in a battle over the very integrity of the electoral process in America. In a bipartisan way, Chairman NEY and Ranking Member HOYER and the members of the relevant committee have come together and said, here is how we can come together to improve the very integrity of the electoral system, leaving past controversies over elections in the past, where they belong.

The Help America Vote Act will allow us to strengthen voter list management, voting standards, overseas military votes and even encourage the Nation's youth to participate more in our elections. And without encroaching upon States' rights in elections, we will also provide much needed resources for new machines.

I urge all of my colleagues to support this important bipartisan measure and strengthen the American voting system.

Mr. HOYER. Mr. Speaker, it gives me a great deal of pleasure to yield 1¼ minutes to the distinguished gentlewoman from Texas (Ms. EDDIE BERNICE JOHNSON), chair of the Congressional Black Caucus.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, let me quickly express my appreciation for the leadership of the gentleman from Ohio (Mr. NEY) and the gentleman from Maryland (Mr. HOYER). It has not been an easy job for them, and I understand that because I have been in touch this entire year. They have reached out and attempted to address what we consider a very fundamental right in any democracy, and most especially this one.

Winning and losing is all a part of a democracy. All of us can accept that, as long as we know that we can look upon this board and count the numbers correctly and get the results. The least we ask is for when people vote, that their votes be counted. We must make sure that their votes can be counted with the machinery that is needed.

I can appreciate the positive points in this bill of assisting those States who need assistance to implement this bill. I am hoping that as this bill moves along that it will be corrected and improved with more collaboration with the Senate side in conference. I do feel, however, that this is a step in the right direction.

Mr. HOYER. Mr. Speaker, I am pleased to yield 30 seconds to the distinguished gentlewoman from Texas (Ms. JACKSON-LEE).

Ms. JACKSON-LEE of Texas. Mr. Speaker, let me thank the gentleman from Ohio (Mr. NEY) and the gentleman from Maryland (Mr. HOYER). After the Florida election debacle, we deserve a response. I would only say that this is a step in the right direction. The gentleman from Maryland knows that I would have voted against the rule and I am supporting the motion to recommend to address the disabilities issues and a lot of the civil rights issues, not specifically addressed in the Election Reform bill. I believe that this Congress must have a bill that can be signed by the President that includes the Conyers and Dodd legislative provision on Election Reform. But I do believe we have made the right decision to address the need for Election Reform by debating this legislation today.

Let me close by saying no matter what we do in election reform, we have to make sure we have a national holiday. I hope we will address H.R. 934 that provides us a national holiday that is different from Veterans Day to ensure that we all can vote, but we must move forward so that we can answer the questions raised by of the American people by confirming that every single vote must count.

Mr. Speaker, last week the House Judiciary Committee held a hearing on H.R. 3295, the "Help America Vote Act of 2001" and addressed one of the most important issues in America today: electoral reform.

I was pleased that the Judiciary Committee continued to address this serious issue, so that we can finally remedy the systemic disenfranchisement of voters evinced most dramatically and tragically by the 2000 presidential election.

The need for comprehensive electoral reform legislation is great. According to a report issued by Caltech and MIT, as many as 6 million Americans were denied their fundamental right to vote and to have their votes counted. More recently, in last month's Houston Mayoral runoff in Harris County, Texas, which I represent, a computer problem cut off access to the county's voter registration data base. As a result, voters were either turned away from the polls or were told by election officials that they could only vote if they had voter registration cards. Many could not vote at all.

The legislation before us today, H.R. 3295, is one of numerous efforts to reform a system which clearly needs fixing. As the Chair of the Congressional Election Reform Caucus, I applaud such efforts and would like to thank

Congressman NEY and HOYER for their efforts. However, I am concerned with several problematic provisions in the bill which have the potential for the bill to fall short of the kind of comprehensive legislation that would ensure that every American's vote is cast and counted, particularly the aspect of the legislation that makes these standards voluntary and not mandatory.

I am particularly offended by the decision of the Rules Committee to preclude amendments to this legislation which would remedy several provisions that need correcting. For example, under Congressman MENENDEZ's proposed amendment, provisional voting which would help eliminate voting disparity, would have been included in the bill. Similarly, an amendment by Congressman DANNY K. DAVIS would have addressed the very serious problems of voter intimidation and fraud. Unfortunately, because of the closed rule, productive provisions like these will not appear in this bill.

Opponents of this bill in its current state make a compelling argument that it may actually reverse voting protections as provided under current law. First and foremost, the bill lacks standards requiring accessibility to voting for language minorities, disabled voters, and the elderly. Additionally, the bill lacks standards for voting rights education and for educating voters as to where and how to vote. Moreover, the minimum standards included in the bill are generally unenforceable because actions can only be taken against a state for failing to meet "standards" if the newly created federal agency receives credible information that the state has submitted false information. As such, the new agency would have no authority to gather information from the states.

Other problematic provisions are numerous. For example, the bill fails to ensure that Americans are allowed to cast important provisional ballots where their eligibility is questioned at the polls. The bill fails to ensure, regardless of race or ethnicity, that the voters have access to voting machines that perform accurately. The bill also deviates from current federal law by allowing for voter names to be "purged" from the voting rolls, and fails to provide protections ensured by computerized statewide voter registration lists. Finally, the bill fails to ensure that voters with disabilities are adequately assured of their voting rights, and fails to ensure that all voters have access to machines that are easily and universally operable.

Alternatively, I believe that we should strongly consider the recent bi-partisan efforts of Senators DODD and DASCHLE, and Representatives CONYERS and MORELLA in their recent introduction of S. 565/H.R. 1170, the "Equal Protection of Voting Rights Act". This bill would provide greatly needed grants to states and localities for federal election administration systems that are part of state plans developed by the Governors and approved by the U.S. Attorney General. The requirements in the above legislature, S. 565/H.R. 1170 are mandatory. I am an original co-sponsor of that legislation.

Under H.R. 1170, states would have to include uniform national standards for accessibility, nondiscriminatory standards addressing election technology, provisional voting and sample ballots, and would be mandated to

provide funds for voter education and worker training programs. Additionally, a truly bipartisan Commission on Voting Rights and Procedures would be created, consisting of 12 members; 6 appointed by the President, 3 appointed by Senate Minority Leader, and 3 appointed by House Minority Leader. The Commission would examine issues, develop "best practices" and issue a report within one year.

The report would include consideration of the best ways for the federal government to permanently assist state and local governments. H.R. 1170 is an important effort on behalf of America's right to vote deserving of all of our support.

Additionally, I would like to raise several key issues not addressed in either bill which are deserving of our attention. First, beyond the egregious voting irregularities already noted, millions of Americans were denied their fundamental right to vote simply because they were unable to vote due to prior work commitments. This is the phenomenon of voting disparity present in most elections in America between those who can afford to take time off work to vote and those who cannot. In fact, this perpetual disparity threatens the very fabric of our representational democracy.

In August, 2001 the non-partisan National Commission on Federal Election Reform, also known as the "Ford-Carter Commission" attempted to remedy this problem when it issued its policy recommendations with respect to electoral reform. Its premature recommendation for an Election Day holiday was as follows: "in evenly numbered years the Veterans Day national holiday be held on the Tuesday next after the first Monday in November also serve as our Election Day."

I take exception with this recommendation because it is precisely because of the sacrifices made by our Nation's Veterans for our freedom, our flag, and the American people that we are today able to vote. Their sacrifice, particularly in light of the September 11 attacks and the ongoing war on terror, reminds us that we cannot take our freedoms and democracy for granted. As such, this important day should be preserved and honored at all costs. That's why, on March 7, 2001 I introduced H.R. 934 which ensures that the fundamental right to vote is guaranteed to every citizen of the United States without interference with Veterans Day. H.R. 934 establishes Presidential Election Day on the Tuesday next after the first Monday in November in 2004 and each fourth year thereafter, as a legal public holiday so that all Americans can vote irrespective of their economic status. Importantly, it also recognizes the sacrifices of Veterans and the sanctity of Veterans Day by ensuring that Election Day never falls on Veterans Day.

I feel strongly that these issues should be noted in any discussion related to electoral reform.

While I thank the sponsors of H.R. 3295 for their efforts to reform our badly corrupted election system, the bill is lacking in several key areas, where other bills do not. The many areas for improvement in this bill should be addressed.

Mr. HOYER. Mr. Speaker, it gives me a great deal of pleasure to yield 1 minute to one of my very good friends

in this House, the gentlewoman from Florida (Mrs. MEEK), who represents so ably South Florida, a former member of the State Senate.

Mrs. MEEK of Florida. Mr. Speaker, I thank the gentleman from Maryland (Mr. HOYER) and the gentleman from Ohio (Mr. NEY) for giving me this opportunity. It took me a very long time to get here. My father and my mother could not have stood here and expressed themselves as I am going to do today. I am thankful for that opportunity. It could be better, but we are at the point now to make it as good as we can.

Some good writer said a long time ago that perfect should not be the enemy of the good. I repeat it. Perfect should not be the enemy of the good. This bill is not a perfect bill, but it is a very perfect step. Many of the things that we have wished for and as I stood with my poor colleagues and poor constituents in Florida on Election Day, had you been there with me, you would have been happy today to come here and say "yes" on this bill, because you will have told this country you have helped America understand that even though how lowly or where they come from or what their nationality is, that this Congress would one day address this, even if by minimal standards only.

I want to thank again the gentleman from Maryland and the gentleman from Ohio for this bill.

Mr. HOYER. Mr. Speaker, I yield 2 minutes to the gentleman from Florida (Mr. DAVIS), one of the members of the Committee on House Administration who, as a freshman, was the Democratic leader with the Republican leader that worked together on election reform. He has been one of the most tenacious and effective advocates of meaningful election reform.

Mr. DAVIS of Florida. Mr. Speaker, at stake on Election Day was not just the selection of Al Gore or George W. Bush as President of the United States. What was at stake was the legitimacy of the process by which we made that choice. The bitter truth is that in Florida, my home State, the margin of error exceeded the margin of victory. Our fragile and somewhat faulty election system collapsed under the weight of the most closely contested presidential election in my lifetime.

The ultimate tragedy was that one year ago today when the Supreme Court effectively ended the recount, many Americans who voted on the losing side of that race had lost confidence in the legitimacy of the process. My State, Florida, as well as many other States, has been through as much soul searching on this problem and how to avoid repeating it than probably any State in the country. We came to some clear conclusions that were adopted in a State law that was enacted in Florida earlier this year.

The crux of that solution, which is addressed in this bill today, is to replace the punch card machine with a technology that allows the voter the opportunity to verify that his or her vote is both complete and accurate.

This bill authorizes \$400 million to Florida and States across the country to make that change. At a time in which the economy is dipping and State and local revenue is at a shortage, it is more important than ever that we adopt this bill and appropriate the entire \$2.65 billion not just to replace the punch card machine but to educate voters, to train and recruit poll workers so that what happened in Florida will never happen again throughout the entire country. And when we have the next election for President or any election, regardless of how people vote, they will have confidence in the legitimacy of the process by which we as a democracy select our leaders.

Mr. HOYER. Mr. Speaker, I yield 30 seconds to the gentleman from Virginia (Mr. MORAN).

□ 1445

Mr. MORAN of Virginia. Mr. Speaker, the greatest democracy in the world deserves the best and most equitable electoral system. This bill will restore voter turnout and, most importantly, voter confidence. What happened a year ago was neither fair nor right. It was not fair to either of the candidates. This will ensure that we have fair, equitable elections; and I strongly urge unanimous support for this bill.

This legislation will ensure that all votes cast in elections count. It will assure that all states must meet minimum voting standards. It will also establish a new federal agency, the Elections Assistance Commission, to develop standards for voter registration, voter assistance programs for those citizens who serve in the military or live abroad, and vote counting.

The Ney-Hoyer bill also mandates that those jurisdictions that are receiving funds under the punch card replacement program, must consider the use of new technology by citizens with physical disabilities such as blindness.

Let us send a message to the American people, to our students and newly naturalized citizens eager to vote for the first time. Let that message be that we will build the best, most equitable electoral system possible.

This legislation is our best chance of increasing voter turnout and voter confidence in our electoral system.

I urge my colleagues today to vote for fair, democratic elections, by voting for the Help America Vote Act of 2001.

Mr. HOYER. Mr. Chairman, I yield myself 40 seconds to enter into a colloquy with the gentleman from Ohio (Mr. NEY).

Mr. Speaker, I have heard from some individuals who are concerned, as I am, that the section in this bill that clarifies the National Voter Registration Act, section 902(a), does not make ref-

erence to subsection (e) of 1973gg-6 of that act.

Is it the gentleman's understanding that this subsection (e) will remain in full force and effect with the passage of this bill?

Mr. NEY. Mr. Speaker, will the gentleman yield?

Mr. HOYER. I yield to the gentleman from Ohio.

Mr. NEY. To answer the question, Mr. Speaker, and to my distinguished colleague, yes. As the bill says in section 903, nothing in this bill shall supercede, restrict or limit the application of NVRA. Of course, subsection (e) remains in the law in full force and effect exactly as it is now, and this bill would not change that.

Mr. HOYER. Mr. Speaker, reclaiming my time, I thank the gentleman. I would say to my colleagues that I am very concerned about provisional voting. It needs to be real. That is why I took such care to make sure that the National Voter Registration Act, known as motor voter, was not adversely affected in any way. I appreciate the chairman's assertion.

Mr. Speaker, I am pleased to yield 30 seconds to my friend, the gentleman from New York (Mr. BOEHLERT), I might say at the request of my distinguished chairman. I am pleased to accede to his request.

Mr. BOEHLERT. Mr. Speaker, the gentleman is getting much too conservative in his advanced years.

Mr. Speaker, I am especially pleased that the bill includes provisions of H.R. 2275, our Committee on Science's bill to reform voting technology standards. Standards are technical and arcane and obscure and sometimes even boring, but they can make the difference between having voting equipment that correctly tallies the public's votes and sowing confusion and chaos.

Our bill gives the lead role in developing standards to the National Institute of Standards and Technology, which is a premier Federal lab with unparalleled expertise in standards. We ensure that the best technical minds in the country will work with Federal, State and local officials on developing standards and on certifying the labs that will determine whether the standards are met.

The SPEAKER pro tempore (Mr. LAHOOD). Both sides have 2¼ minutes remaining. The gentleman from Ohio (Mr. NEY) has the right to close.

Mr. HOYER. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. JACKSON).

Mr. JACKSON of Illinois. Mr. Speaker, I rise in strong opposition to H.R. 3295. As it is currently drafted, the Help America Vote Act of 2001 plainly fails to address the grave problems so many Americans faced in the 2000 elections and continued to face this year.

In our democracy, we must apply a gold standard when it comes to creating a fair, effective, and efficient electoral system. Americans citizens have fought, bled and died to

protect all citizens from discrimination in their ability to vote. Therefore, the bloodied nose of the Rev. C.T. Vivian, and the use of fire hoses and the jailing of children to prevent some Americans from voting, must not be forgotten. The deaths of Schwerner, Goodman and Cheney must not be in vain. The struggle and advances in the 1965 Voting Rights Act and its extension and expansions in 1970, 1975, and 1982 must not be undercut. The Motor Voter Act must not be made less effective.

Congress needs to ensure that when it passes election reform legislation it truly solves the problems that voters throughout our nation encounter as they cast their ballots. Comprehensive electoral reform must move us forward with minimum mandatory standards that ensure uniformity and nondiscrimination. Under these standards all voters must have effective machinery that allows them to cast the vote they intend and to correct their ballot if they make a mistake. Comprehensive electoral reform must guarantee that legally registered voters are not erroneously purged from registration rolls, that voters are notified of and given the opportunity to cast provisional ballots, and finally, it must require that voters are informed of their rights under state and federal law. The one bill that goes the distance and addresses these problems head on is the Equal Protection of Voting Rights Act of 2001, introduced by Senator CHRISTOPHER DODD and Congressman JOHN CONYERS.

A simple examination of the details of the Help America Vote Act makes clear that there are serious problems that prevent it from bringing about true election reform and which actually take steps backward.

H.R. 3295 has inadequate minimum standards for machinery. It does not ensure that voting systems, even those newly purchased with federal monies, will be accessible, give the voter notice of overvotes and undervotes and the opportunity to correct their ballot before it is cast, and will meet a national error rate standard. Comprehensive electoral reform must provide these minimum requirements for all voting machines if it is to correct the problems that voters all over our nation faced on election day 2000 and 2001.

H.R. 3295 creates a loophole that allows states to opt out of provisional balloting. Provisional balloting is critical to ensure that registered voters have the ability to cast provisional ballots when there is confusion over issues of registration, identification or voting rights at the polling place. H.R. 3295 allows states to adopt "an alternative" to provisional balloting which in practice will undermine the access to and uniformity of provisional ballots. Furthermore, H.R. 3295 does nothing to guarantee that voters are aware of their right to cast a provisional ballot. More often than not, election officials do not provide adequate notification to voters that they can cast a provisional ballot. Therefore, for a provisional ballot measure to be meaningful and be a true safeguard, as it is intended to be, it must require that election officials notify voters that they can receive a provisional ballot and also notify the voter of the final result. Problems with registration cannot be remedied unless voters know whether their ballot is counted.

H.R. 3295 rolls back existing federal law that protects people from being purged if they

have not voted. Two provisions in H.R. 3295 take a significant step backward to undermine the protections provided to voters against purging for erroneous information. These provisions turn the National Voter Registration Act of 1993 (the "NVRA") on its head by allowing state officials to remove individuals from registration lists because they have not voted in two successive federal elections and then don't respond to a notice. Current federal law does not allow voters to be purged from the rolls for not voting. However, the language of H.R. 3295 appears to allow such a practice and specifically amends a section of the National Voter Registration Act to change language which prevents voters from being purged for not voting. (See H.R. 3295, Section 502(2)(a) and Section 902(a)). Under these provisions, voters will be disenfranchised because the result of the purge is that they are not properly registered and, thus, cannot then have the safeguard of a provisional ballot to vote.

Additionally, H.R. 3295, as it is currently drafted, also eliminates the "fail safe" provision of the NVRA which allows voters to correct erroneous information that caused the purge and then confirm their address in writing so that they can cast their ballot at the polling place. (42 U.S.C. § 1973gg-6(g)). Without this provision voters can be removed from the polls with no opportunity to correct inaccurate information and will also not be able to cast an effective provisional ballot because the erroneous registration information drops them from the registration list so election officials will be unable to count the provisional ballot.

Finally, H.R. 3295 does not require full compliance with federal voting rights laws and offers no check on states to make sure they are in compliance. It is essential to election reform that as states contemplate how they will spend federal money there is a means to ensure that they are currently in compliance with existing federal voting rights laws. H.R. 3295 offers no such provision. This bill by simply allowing states to self certify their compliance, and only in area of "administering election systems" (which narrows where states need to be in compliance), offers no real protection for taxpayers as states spend millions of federal dollars without having to be in compliance with federal law. True election reform must have in place a mechanism that requires the Attorney General to check for compliance prior to releasing funds for electoral reform.

These provisions make clear, and other elements of the legislation confirm, that H.R. 3295, cannot meet the concerns and problems that voters continue to face at polling places around the country. Going part of the way, as H.R. 3295 would have us do, and turning back the clock on important current voting rights laws, is not an acceptable legislative compromise, but a compromise of principle of the right to vote. True election reform must safeguard existing law and then move to solve the problems

I urge members to vote "no."

Mr. HOYER. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, we have come to a time after 11½ months of work on a bill which, although there is still controversy attached to it, has created, I

think, great consensus. That consensus has been articulated on this floor, and that consensus is a conviction that every American ought to be assured the right to vote, full access to the polls and education so they know what they are voting for or against, and assistance in making sure that their vote is accurately cast.

In addition, we dedicate resources to ensure that the technology, once that citizen has voted, to make sure that that citizen's vote is correctly counted. As has been said on both sides of the aisle, it is central to democracy that that happen.

The former Governor of Delaware, one of our most respected colleagues, the gentleman from Delaware (Mr. CASTLE), said it best, that when on election day we vote and Americans go to the polls, both Presidents and paupers go to the polling place, and each will have his or her vote counted, and it will count equally.

That is the majesty of America; that is the general use of our democracy. That is central to our philosophy, and it must be our continuing commitment. For when one American's vote is not counted, when one American is prohibited by whatever means from coming to the polls, from casting their ballot, from participating in democracy, we lessen that democracy, and we lessen the promise of our Founding Fathers.

The gentlewoman from Florida (Ms. BROWN) said it best I think on this floor: "This bill perhaps is not perfect, but it is," as she said, "a perfect beginning."

Mr. Speaker, I urge all of my colleagues to vote for the Help America Vote Act.

Mr. NEY. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. KIRK).

Mr. KIRK. Mr. Speaker, I would like to thank the gentleman from Ohio (Chairman NEY), the gentleman from California (Chairman THOMAS), the gentleman from Maryland (Mr. HOYER), the gentleman from Rhode Island (Mr. LANGEVIN), and the gentleman from New York (Mr. REYNOLDS) for their support for my language which will allow polling places near military families.

This language clarifies an arcane statute that outlaws "military presence at voting facilities." It allowed the Department of Defense to vastly overreach their legislative authority in 1999 to ban polling on military bases. Nothing damages the military franchise more than this action.

The U.S. Code that our language amends was enacted in 1865 in response to irregularities during the 1863 elections. At that time it was an appropriate response. However, the 1999 DOD interpretation made voting for our men and women in uniform very difficult. When the DOD issued the directive to

base commanders banning voting, it forced existing polling places to be closed; and according to CRS in an April 2000 survey, at least 20 States had to close polling places that were vulnerable. Some of these places had been voting for over 15 years.

It is time to return control of voting to local officials. I applaud the gentleman for putting this in and assuring that our military franchise is upheld.

Mr. NEY. Mr. Speaker, I yield 25 seconds to the gentleman from California (Mr. CUNNINGHAM).

Mr. CUNNINGHAM. Mr. Speaker, I thank the gentleman for yielding me time.

Mr. Speaker, both sides had problems with the election. I think the number one thing that upset me was the dispatchment of hundreds of lawyers trying to disenfranchise our military from voting based on technicalities. I am also glad that this bill allows our military to vote on bases, because many of those young men and women cannot get off base for transportation. I want to thank both Members for this.

I would also like to thank the gentleman from Ohio (Mr. NEY) for during the anthrax scare on the Committee on House Administration, for his team working diligently with the gentleman from Maryland (Mr. HOYER) in correcting that.

Mr. NEY. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, in conclusion, let me just say that our patriots who founded this country and the veterans have over the years sacrificed for the greatest democracy, which we are humble to be a part of.

Langston Hughes, the great American poet, said, "Dream your dreams; be willing to pay the sacrifice to make them come true."

Many people have sacrificed to have our democracy so we can have our debate. What we are doing today is coming together to keep that dream alive, to keep it moving, and to help America vote.

I urge support of the bill.

Mr. HOYER. Mr. Speaker, I submit for the RECORD a clarification concerning Section 502(7) on line 16 of H.R. 3295, Union Calendar 201, regarding the term "error." In using the term "error", the Committee on House Administration referred to the findings of the National Commission on Federal Election Reform, also known as the "Ford-Carter Commission."

The Commission's definition of "error" is set forth in the accompanying letter from Philip Zelikow, executive director of the National Commission on Federal Election Reform, to me and dated November 16, 2001. It responds to a letter sent by me dated November 14, 2001. In complying with the Minimum Standard, the Committee on House Administration expects states and jurisdictions to buy voting machines that detect errors of the kind described in the letter, commonly referred to as "overvotes," "undervotes," and "residual votes."

The two letters follow:

HOUSE OF REPRESENTATIVES,
COMMITTEE ON HOUSE ADMINISTRATION,
Washington, DC, November 14, 2001.

Mr. PHILIP D. ZELIKOW,
Executive Director, *The National Commission on Election Reform*, Charlottesville, VA.

DEAR DIRECTOR ZELIKOW: In an effort to craft Federal policy addressing electoral reform recommendations contained in the Commission's report, the Commission's use of the word "error" has sparked much attention and debate. I would very much appreciate a response containing a definition of what the Commission contemplated in using the word "error" in the context of the Ford-Carter Commission report. I will use your letter to establish the legislative record regarding electoral reform legislation.

With kindest regards, I am

Sincerely yours,

STENY H. HOYER.

THE NATIONAL COMMISSION
ON FEDERAL ELECTION REFORM
November 16, 2001.

Congressman STENY HOYER,
House of Representatives, Longworth Office
Building, Washington, DC.

DEAR CONGRESSMAN HOYER: Thank you for your letter of November 14. You asked how the Commission defined voter error in the context of the Commission's report.

In its discussions the Commission viewed voter error as occurring when a voter casts a ballot for a candidate whom the voter had not meant to choose, or when a voter unknowingly invalidates a ballot, or when a voter inadvertently fails to register a choice while having wanted to make one. Voters being human, not all voter errors can reliably be detected or avoided. Voter error also presents itself in many ways, depending on the voting systems and administrative practices in different jurisdictions. But the Commission did find that there are ways to reduce the likelihood of error. These include voter education, better equipment, improved software and ballot design, and more uniform and objective definitions of that actions will and will not be counted as a vote for each category of machine. All of these subjects are addressed in your current bill, H.R. 3295.

Please contact me if I can be of any further assistance.

Sincerely,

PHILIP ZELIKOW,
Executive Director.

Mr. HOEFFEL. Mr. Speaker, I rise in support of H.R. 3295, the Help America Vote Act of 2001.

The 2000 presidential election demonstrated the need for reform of the nation's electoral system.

There is no doubt that tens of thousands of voters were disenfranchised in the election. It is quite probable that similar numbers have been disenfranchised in other elections, but the closeness of the 2000 presidential election highlighted the problem like no other.

A nation that can launch a craft to a space station hundreds of miles above the earth, should be able to count every ballot accurately.

I believe the federal government must take a leading role in this effort by establishing minimum voting standards and providing funding to modernize voting systems. When you introduce technology into an election, it leaves room for error. My Congressional district is a clear example of this.

Prior to my election to Congress in 1998, I served for seven years as a County Commissioner in Montgomery County, Pennsylvania, a County of over 700,000 people. During my tenure, I supervised the replacement of the old, mechanical voting machines in Montgomery County with those using the more modern advanced touch screen technology that are widely recognized as the most reliable voting machines in terms of accuracy of vote tabulation.

A Congressional study of the rates of uncounted votes in 40 congressional districts nationwide found that voters in Montgomery County were less likely to have their votes discarded than voters in most of the other districts surveyed. These results are directly attributable to the modern voting machines used in Montgomery County.

This bipartisan legislation before us today is not perfect; no bill is. However, H.R. 3295 is a good starting point to ensure that every vote is counted.

This legislation authorizes a total of \$2.65 billion for federal election reform.

The Help America Vote Act provides states that use punch card voting systems with funding to replace these outdated and unreliable machines. Punch card machines produced the controversial "hanging chads" which illustrate how flawed our system of electing Presidents can be.

H.R. 3295 also requires states to adopt minimum election standards, including a statewide voter registration system, in-precinct provisional voting, assurances that voters who make errors will be able to correct them, and means for disabled voters to cast secret ballots on new voting equipment.

Mr. Speaker, I urge passage of the important legislation.

Ms. SCHAKOWSKY. Mr. Speaker, one year ago today the Supreme Court, by a vote of 5-4, determined the outcome of the 2000 Presidential election. Today, the U.S. House of Representatives, by considering the Help America Vote Act, is taking a measured step forward to ensure that future elections will be decided in the polling place instead of the courthouse.

During the 2000 election, six million votes were not counted and voters were turned away at the polls, harassed, or intimidated. The American people expected that, by now, Congress would have taken action on election reform so that history would not repeat itself. But until today, we have not.

I traveled the country with my colleagues, including Representative MAXINE WATERS, Chairperson of the Democratic Caucus Special Committee on Election Reform, and met with disenfranchised voters, who demanded that the federal government repair the deficiencies of the last election. And we should have delivered on that demand months ago by passing the Equal Protection of Voting Rights Act of 2001, a comprehensive reform bill introduced by Representative JOHN CONYERS. That legislation, which is endorsed by civil rights, labor, disability and voter rights organizations, is the benchmark for true reform. It thoughtfully addresses concerns raised during last year's election, including voter records, accessibility, and equal opportunity at the voting place.

Now, with less than a year before the next general election, Congress is running out of time. The Equal Protection of Voting Rights Act is not scheduled for consideration by the House, and what is before us is the Help America Vote Act of 2001. By passing this bill, we are moving the legislative train out of the station. While the Help America Vote Act contains provisions I strongly support, including funds to help states improve some aspects of their election systems and to involve younger voters in the process, I believe this bill contains flaws that must be addressed.

I am concerned that the Help America Vote Act is broad and ambiguous and does not give clear direction to states, particularly in regards to provisional voting. I will work to strengthen that section of the bill. In addition, I strongly believe that Congress must set federal minimum standards to ensure that no eligible voter is denied the right to vote. However, the standards in the Help America Vote Act do not go far enough to ensure that all voters with disabilities have access to the polls and to guarantee that all machines notify voters of undervotes and overvotes. Furthermore, the legislation does not require states to provide adequate voting machinery to poor and minority districts.

This legislation is not the final answer to our election woes. As a matter of fact, far from it. However, this bill puts Congress squarely on record as supporting a measure of election reform. I commend the Democratic author of the bill, Representative STENY HOYER, for his dedication, and I pledge to work with him and my colleagues, including civil rights and election reform leaders MAXINE WATERS and JOHN CONYERS, to ensure that the final product truly addresses the serious flaws that resulted in last year's election fiasco. Every American is entitled the right to vote and the right to have his or her vote counted.

Mr. FORBES. Mr. Speaker, as a cosponsor of the Help America Vote Act, I rise in strong support of this landmark bipartisan legislation.

My home state of Virginia was one of the few states to hold an election this year. Thankfully, there appear to have been no major problems revealed in the administration of that election. But, the memories of the 2000 election are still fresh in the American mind and it is clear that we as a society must address the flaws that were revealed in that election cycle.

The Help America Vote Act is a fair and reasonable compromise on an issue that is still being hotly debated and considered in states across the nation. It provides \$400 million in federal funds for a buy-out of the infamous punch card ballot machines. Great and honest minds can disagree about whether these machines have a substantially higher rate of error than other systems. But, one thing is absolutely clear: The American people have no faith in punch card ballots. There are strong alternatives available, and this federal funding will enable communities large and small to afford those alternatives.

The bill also provides a mechanism for getting more people involved in the civics of elections. We all agree that voting is an important civic duty. But, our responsibility as citizens does not end there. Voting only works when good people step forward and participate as

electoral officers at polling places. These are the non-partisan assistants who give up a full day of work or personal time to make the process work. Unfortunately, the number of people who are participating in this way is waning. The Help America Vote Program and Help America Vote Foundation established by this legislation will go far to bring more people into this process.

I am also very pleased, Mr. Speaker, that this bill includes provisions of the voting standards legislation produced by the House Science Committee, of which I am a member, earlier this year. Debates about standards are arcane and technical, but they are vitally important to ensuring that the procedures we put in place work.

I am proud to be a cosponsor of this legislation, and I urge my colleagues to support it toady on the floor.

Mr. GILMAN. Mr. Speaker, I rise in strong support of H.R. 3295, the Help America Vote Act of 2001, which will effectively implement long-needed minimum election standards throughout our Nation. The flaws within our current system became widely evident during the 2000 Presidential election season. I had the opportunity in November of 2000 to serve along with some of my congressional colleagues as an observer during the Florida recounts. During that process, I observed first hand the problems of utilizing the antiquated punch card ballot.

Accordingly, following that election I joined my colleagues in calling for a broad and practical revision of the system. I commend my colleagues, the gentleman from Ohio Mr. NEY and the gentleman from Maryland Mr. HOYER in crafting a bi-partisan bill that addresses those concerns.

H.R. 3295 will provide individual States with the means to replace antiquated voting machines with newer, and more modern voting technology. Moreover, this legislation establishes a nonpartisan election assistant commission which will oversee the Nation's federal election process and ensure that minimum standards are being followed in federal elections. The commission will also implement a reporting procedure to ensure that individual States satisfactorily provide information to members of the armed services concerning absentee registration and voting in the state.

Also notable in H.R. 3295 is the "Help America Vote College Program" which encourages university students to take a more active role in our Nation's democratic election process by serving as nonpartisan poll workers or assistants. In promoting active and participatory public service by our Nation's young adults, our Nation's democratic tradition will be strengthened.

I thank my colleagues Mr. NEY and Mr. HOYER for introducing this timely and important legislation. It is high time we implement real reform in our Nation's election system. I am pleased to be an original co-sponsor of this bill and I urge my colleagues to support this measure.

Ms. HARMAN. Mr. Speaker, I rise in strong support of HR 3295, the "Help America Vote Act," introduced by my colleagues, BOB NEY and STENY HOYER. The bill before us is an important step in reforming our electoral process and rebuilding public confidence.

We are well aware that our administration of elections was tested by last year's presidential election contest. The American political system proved resilient, but not before putting many aspects of the election process under a microscope. That microscope revealed many problems, beginning with ballot design, voting machines, and the rules by which registration lists are respected and ballots counted. Most importantly, those problems were not isolated in one or just a few states.

The election fiasco did have the benefit of returning to the legislative agenda the issue of election reform. Beginning with the National Commission on Federal Election Reform and culminating in this bill, the cause of reform has taken significant strides since last November. We must continue that momentum.

Like the main sponsors of the bill, I believe we need to enact a bill that improves the balloting process before the 2002 elections. If we stake out the perfect positions—however principled—we could well face the same kind of delays and difficulties that prevented for months enactment of a much-needed aviation security bill. Election reform is needed and we must use the sense of urgency to achieve results, and achieve them quickly.

Importantly, the bill before us starts with the premise echoed in the Article I, Section 4 of the Constitution that "the times, places and manner of holding elections . . . shall be prescribed in each State."

This admonition is balanced against language in the same Section of the Constitution simultaneously giving Congress the discretion to alter such regulations. And, in fact, the exercise of that Congressional authority has been critical to protecting our citizens' right to vote and ensuring the basic fairness and integrity of the election process. H.R. 3295 is part of that historic legacy.

For my own State of California and County of Los Angeles, passage of the bill is critically important. Several months ago, California Secretary of State Bill Jones decertified every one of Los Angeles County's punch card machines. This means that Los Angeles County, the largest election jurisdiction in the United States with over 4 million registered voters, must purchase and install tens of thousands of new machines under an incredible time constraint. Conny McCormack, the County Registrar-Recorder, estimates that replacing the machines will cost more than \$100 million—an impossible financial burden without federal assistance.

H.R. 3295 provides that assistance—more than \$2.6 billion to improve election systems through poll worker training, access for disabled, and removal of punch card ballot machines. In doing so, the bill strikes the right balance in setting out the federal government's role in this partnership by requiring every state to be in compliance with minimum standards.

These minimum standards will ensure that voter registration rolls be accurate and complete, making them less vulnerable to fraud and incorrect removal of eligible voters. The minimum standards will also allow for inprecinct provisional ballots, so that a voter who believes he or she has been wrongfully removed from the voter rolls will have the opportunity to immediately cast a ballot and have

their eligibility determined later. The standards required by the Act will assist both military and overseas voters as well as voters with disabilities. Furthermore, the Act leaves every one of the existing, landmark voting rights laws intact and strengthens compliance.

Mr. Speaker, as a mother, I am well aware that perfection is not an option. The bill is endorsed by an impressive list of individuals, including California's Secretary of State, Bill Jones, who said the "measure makes a critical investment in the foundation of our Republic." It is also supported by the co-chairs of the National Commission on Election Reform—Presidents Carter and Ford, Bob Michel and Lloyd Carter—who said in a recent Washington Post op-ed, that the commission's "most important recommendations are fully adopted in (H.R. 3295)."

I urge prompt passage of H.R. 3295.

Mr. COSTELLO. Mr. Speaker, I rise today in support of H.R. 3295. The 2000 Presidential election was a source of great controversy and diminishing confidence in our electoral system. Voters have a broad range of concerns resulting from the 2000 election, including outdated voting machines and procedures, potentially confusing ballots, allegations of ballot tampering and biased reporting, disenfranchisement, and the use of unethical practices to garner votes. Above all, the 2000 election made clear to all Americans that the election process in many parts of this country must be reformed.

I believe this legislation is a good start at correcting the flaws in our electoral system. This legislation authorizes \$400 million to buyout the punch card voting machines that caused so many problems during the 2000 Presidential election. In addition, H.R. 3295 authorizes another \$2.25 billion over the next 3 years to aid states in acquiring new voting equipment and improving their electoral systems with help and monitoring from a new, bipartisan Federal Election Assistance Commission.

Furthermore, I support this bill because it establishes minimum standards for state election systems, enforced by the Department of Justice and the Federal Election Assistance Commission, that would require states to have a voter registration system linked to local jurisdictions in the state, adopt uniform standards defining what constitutes a vote on the different types of voting equipment, ensure that absent uniformed and overseas voters have their votes counted, and give voters the opportunities to correct errors before they leave the polling place.

Finally, H.R. 3295 creates a small grant program which trains college and high school students to work at the polls on election day, thereby filling a crucial shortage of election personnel and encouraging participation among young people in the electoral process.

Mr. Speaker, I acknowledge this legislation could do more to help minorities and disabled Americans, many of whom were disenfranchised during the 2000 election. I expect changes to be made to this legislation during consideration in the Senate, and will support stronger provisions as a final version is crafted. However, this legislation moves the process forward and that is critical at this time. For these reasons, I support this legislation and encourage my colleagues to do the same.

Mr. REYES. Mr. Speaker, I urge my colleagues today to vote against H.R. 3295, the Help America Vote Act. While this bill makes efforts to improve our electoral system, I oppose it because it fails to provide key safeguards that ensure every voter will be able to cast a ballot and have that ballot counted.

As the Chair of the Congressional Hispanic Caucus, I proudly support the election reform principles our Caucus adopted earlier this year. Thanks largely to the hard work of Congressman CHARLIE GONZALEZ, who chairs the Hispanic Caucus' Civil Rights Task Force, we developed a set of principles which state that election reform should include minimum standards, guarantee accessibility for language minorities and the disabled, provide for provisional ballots, and establish a voter bill of rights.

Unfortunately, H.R. 3295 fails to adequately address these principles, which are tremendously important to Hispanic voters and those who expect fairness at the polling place. This bill was brought to the floor on the back of an unfair rule that did not allow any debate on critical amendments that would have made the difference between complete election reform that takes into consideration the principles I just mentioned, and incomplete reform, which, unfortunately, ignores the necessity of improving the electoral system for all voters with full consideration of their rights as participants in a democratic process. I therefore urge Members to vote against the rule and vote in favor of the motion to recommit.

Election reform legislation should establish and enforce minimum standards for election technologies, voter education, and election worker training. We cannot let local jurisdictions opt out of ensuring that our elections are fair and accurate. States and localities must comply with all federal voter rights safeguards, including those established by new election reform legislation and those guaranteed by the Voting Rights Act and the National Voter Registration Act.

Election reform legislation must reinforce the existing minority language provisions of the Voting Rights Act, which ensure that voters in areas with a significantly large language minority population can receive a ballot and election information in a language other than English. While this bill does contain language that would ensure accessibility for voters with limited English proficiency for optional activities, there is no reinforcement of existing language access requirements. These laws have been poorly enforced, as the 2000 election demonstrated, and many jurisdictions fail to comply with them.

To combat voter disenfranchisement, election reform must include poll worker training and a voter bill of rights that empowers voters through pro-active steps, including the use of sample ballots, that educate them about their rights and voting process. Voters have a right to know that if they are standing in line to vote before polls close, they can't be turned away; that they cannot be asked for more than one form of identification; and that they have the right to a provisional ballot.

Currently, H.R. 3295 does not significantly address these important issues. While it provides funds for new voting equipment, poll worker training and voter education, H.R. 3295

would allow jurisdictions to continue disenfranchising voters by using abysmally inaccurate voting machines and by poorly administering elections.

Based on these reasons, I hope my colleague will join me in voting against final passage of H.R. 3295.

Ms. KILPATRICK. Mr. Speaker, during the 2000 Presidential election, nearly 100 million Americans went to the polls to vote. Of those who went, nearly 6 million votes were discarded and thrown out due to faulty machines. In addition to these 6 million wasted votes, there were countless Americans who were not allowed to vote due to erroneous records and over zealous vote purging efforts. Many of these people, unfortunately, were from poor and minority communities.

The election reform legislation we are considering today does not establish adequate voting rights protections to prevent many of the problems that we experienced in the 2000 presidential elections. According to Civil Rights Organizations like the ACLU, there are three goals that legislation must accomplish to achieve maximum election results. Voters should be able to count on uniformity of voting equipment and laws, adequate accessibility to the polls and accuracy in the accounting of votes.

A critical issue in any election reform measure is the enforcement of some minimum uniform standards for elections. After all, the Supreme Court rejected the Florida Presidential election recount because of the lack of uniformity in the standards used to recount the votes. I personally find it ironic that the Court chose to limit uniform standards to uniform state laws as opposed to uniform Federal laws, which would require all states to meet minimum uniform election standards.

The Ney-Hoyer bill does not adequately address the issue of uniform standards and in many ways continues wide and varied election practices from state to state. The Ney-Hoyer bill includes an opt-out provision that would allow any state to easily avoid complying with suggested federal standards.

The bill makes token suggestions to states to take greater efforts to address the serious problems facing non-English speaking minorities and the disabled in casting their ballots. Disabled and non-English speaking voters face hurdles to proper access due to physical and language barriers at the polling place. They, perhaps most of all, need a bill that provides voter education so that citizens know how to vote and are aware of the constitutional right to vote.

The bill simply encourages states to take steps to provide for provisional voting as opposed to mandating compliance with federal standards. This again allows states to choose whether or not to take steps that would make our voting system more uniform across the country. For example, provisional voting, which would allow voters to challenge erroneous records, is a highly recommended reform to our current voting system. Under this measure states are given the option to implement this recommendation.

The most disturbing provisions in the bill are provisions, I believe, that would push voters from the rolls. Under the legislation, voters would be disqualified from casting their ballots

if they fail to vote in two elections and fail to respond to a mailed notice. This contradicts current law and subjects voters to continued vigilance to ensure that their names are not inadvertently removed from the voting rolls.

I am also disappointed that the rule only allows for an hour of debate on a bill that claims to be election reform. The rule only allows for one hour of general debate with no opportunity to amend the bill. How can we consider a bill affecting the most fundamental attribute of democracy—voting—and not have the opportunity to fully debate and amend the provisions of the bill? Furthermore the bill was not fully vetted by the appropriate committees in the House. Voting legislation is generally within the jurisdiction of the Judiciary Committee, which deals with issues of a constitutional or judicial nature. The Judiciary Committee never considered this bill.

I did not cosign this election reform bill. I cosponsored a bill offered by Mr. CONYERS, H.R. 1170, the Equal Protection of Voting Rights Act. I would add that Mr. CONYERS is the ranking member of the Judiciary Committee. That bill takes substantive steps to apply uniform voting standards across the country and provides enforcement mechanisms that ensure compliance with these standards. It was my hope that the Rules Committee would at least allow this bill to be considered as a substitute amendment to the bill. Once again, the leadership in the House has chosen politics over the people. Once again, the rights of the people, through their elected representatives, to consider all the relevant alternatives is being abridged. Once again, we are being forced to consider a limited measure that does not adequately address the concerns of the majority of the American people.

We are on the heels of the 2002 elections and we are just now considering an election reform measure. If the upcoming elections are anything like the 2000 presidential election, it is my fear that we are in for more of the same. Mr. Speaker, I urge my colleagues to vote against the rule and final passage of this token election reform legislation.

Mr. SENSENBRENNER. Mr. Speaker, I rise in opposition to H.R. 3295, the "Help America Vote Act of 2001."

I am particularly concerned about a problem my home state of Wisconsin will face under section five of the bill and its mandatory requirement that each state implement a statewide voter registration system. The state of Wisconsin does not require statewide voter registration in communities with populations of less than 5,000. This bill will require Wisconsin to comply by requiring registration at the expense of the local governments in communities where registration is not required by law. This legislative provision will place a substantial administrative and financial burden on the state and, perhaps result in an unfunded federal mandate.

Mr. Speaker, I also have a significant concern that my constituents in my home state of Wisconsin will be double taxed under Section One of H.R. 3295. That is the section which furnishes states with funds to buyout their punchcard voting machinery. However, Wisconsin has already phased out the use of punchcard voting systems on their own, at the expense of the local counties and municipali-

ties, to the tune of over \$650,000. How can it be justified that my constituents will be double taxed to pay for replacing punch card machines? The first tax paid by Wisconsin residents was in the form of local tax revenues and the second tax will be in the form of federal tax dollars.

And, let me be very clear here, the local tax revenues spent on punchcard machines could easily have been spent on other important local needs, especially if they knew federal money was on the way. The elimination of these punchcard systems may be a laudable goal, however, it clearly unfair to double tax the residents of Wisconsin in order to pay for upgrades in another state when that state did not determine it was important enough to them to use their own resources to pay for the elimination of punchcard ballots.

The basic principle of "one person, one vote" is one that crosses party lines, for voting is not a partisan issue, it is an American issue. All Americans want to know that the vote they cast, for the candidate of their choice, will be counted fairly and accurately.

Unfortunately, it is also the concern of a great many Americans that widespread voter fraud is diluting or cancelling out the value of their legally cast vote. For example, in Madison, Wisconsin, students from the University of Wisconsin bragged about voting two and three times in last year's presidential election. Coincidentally these students recanted their statements when pressed. Perhaps it was when they realized that voting two and three times violated state and federal election laws. However, this is just one minor example of what has been allowed to occur in jurisdictions all around this country without any tangible consequences. Another example of rampant voter fraud can be found when examining the events surrounding the 2000 election in St. Louis, Missouri. There were hundreds of felons, non-citizens, duplicate and dead voters who cast ballots for candidates illegally. And in the city of Philadelphia, there were over 5,000 voters registered at vacant city-owned lots.

I strongly believe we must seriously examine allegations of voter fraud and press for the prosecution of those who are found to have violated existing laws. We should also examine existing federal statutes and the Department of Justice prosecution guidelines to determine if stiffer federal penalties and fines and greater enforcement is necessary. It should become routine that when evidence of voter fraud is found, perpetrators can expect to be prosecuted to the fullest extent of the law. For vote fraud is not a victimless crime. It is crime which erodes the integrity of the very system our forefathers put into place to insure the continuance of the freedoms we hold dear. It is time we get serious about insuring the integrity of the election process, and protecting the public trust in the election system of the United States.

This legislation does not go far enough to address the issue of voter fraud and it will continue to flourish without significant legislative changes. I fear that once this legislation is passed, this Congress will not come back to examine measures aimed at eliminating voter fraud, proposals such as requiring photo identification at the polls, requiring proof of citizenship and requiring removal of dead voters

from current voting rolls are just a few provisions which need to be considered.

The individual states across the country have been hard at work in 2001 reviewing their election laws with a fine-tooth comb, identifying the weak spots and potential causes for concern, and, most importantly . . . developing solutions. Reforming election laws is a complex job but it is one that is best left to the states. This hard work will certainly continue into 2002 but look at what has happened so far at the state level: more than 1,770 bills have been introduced, 249 have been passed and 487 bills are still pending.

One of the most profound examples of state reform is in Florida where they have passed the most sweeping election reforms of any state so far. These reforms include, among other things, the banning of punch card ballots by providing \$24 million to counties to purchase optical scan or electronic systems, \$6 million for voter education and poll worker recruitment and training, and \$2 million to create a statewide voter registration database. Their bill also provides for uniform ballot design, no-excuse absentee voting and provisional balloting. However, Florida made these changes after consideration of their unique needs and goals without federal mandates from Congress, such as those required under H.R. 3295. And, many other states legislatures have followed suit by passing their own election reform bills without the direction from Congress. As was the case in Wisconsin a few years back, individual states are proving that they are the best able to determine what solutions will work effectively for their unique needs and the focus of election reform should be left to them.

Ensuring fair and honest elections by eliminating voter fraud, improving voting techniques, eliminating disenfranchisement, and respecting the constitutional role of the states and localities should not be partisan issues. Our fundamental system of elections is sound, and just as with all things, there is always room for improvement. However, we need to make certain that legislation does in fact provide improvement and not just rhetoric and that Congress is not simply throwing \$2.65 billion at this issue so we can claim we've solved all alleged problems.

Mr. STARK. Mr. Speaker, I rise today in support of H.R. 3295, the Help America Vote Act. The deeply troubled election of 2000 taught us many lessons. Chief among them was the need to improve our election system. When hanging chads and butterfly ballots kept the presidency in the balance, America's credibility as the oldest democracy in the world was compromised. The American people have overwhelmingly called on Congress to act, and this bill is at least a step in the right direction.

The Help America Vote Act does several things to improve our election system. First, it establishes minimum election standards that all states should meet. The bill requires each state to maintain a complete and accurate voter registration system and to maintain uniform standards on what constitutes a vote for different voting machines. It requires states to have safeguards ensuring that military and other overseas voters have their votes counted and ensures that voters who make errors

in their ballots have the opportunity to correct them. The bill provides \$400 million to replace unreliable punch-card voting systems, whose problems were so dramatically displayed on our television screen a year ago. It also authorizes another \$2.25 billion to help states establish and maintain accurate lists of voters, improve equipment, recruit and train poll workers and educate voters about their rights.

Despite these good provisions, I have several serious concerns about the bill. First, the bill allows states to purge voters from the registration rolls if they don't vote in one election without giving them enough notice that their names are being purged. This weakens the very successful Motor Voter Law, which provides voters with these protections. In addition, the bill allows states to create alternatives to the provisional ballot, something that has allowed citizens who are not registered to vote to still have their voices heard. This bill provides no standard to ensure that all wishing to vote will be able to do so on election day. Finally, the bill is woefully inadequate in providing protection for people with disabilities and those with limited English ability. The bill should ensure that all Americans, regardless of color, creed, or handicap, have the ability to cast a vote and have it counted.

Nevertheless, I support H.R. 3295 because it moves the process of election reform forward and I think is an improvement from the status quo. It is unfortunate, however, that the House Leadership refused to allow amendments to the bill that would have corrected its flawed provisions. I will work with my friends in the Civil Rights, disability and labor communities to make this bill better. I am hopeful that the Senate will also pass an election reform bill and that we can improve upon this bill in conference. The election of 2000 revealed gaping holes in our election system. To maintain our nation's standing around the world and, more importantly, to maintained government's credibility with our own citizens, the Congress must make reform a top priority.

The SPEAKER pro tempore. All time for debate has expired.

Pursuant to House Resolution 311, the previous question is ordered.

The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. MENENDEZ

Mr. MENENDEZ. Mr. Speaker, I offer a motion to recommit.

The SPEAKER pro tempore. Is the gentleman opposed to the bill?

Mr. MENENDEZ. I am, Mr. Speaker, in its present form.

The SPEAKER pro tempore. The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. MENENDEZ moves to recommit the bill H.R. 3295 to the Committee on House Administration with instructions to report the same back to the House forthwith with the following amendments:

Amend section 502(2)(A) to read as follows:

(A) A system of file maintenance which removes registrants who are ineligible to vote from the official list of eligible voters con-

sistent with the National Voter Registration Act of 1993.

Amend section 502(3) to read as follows:

(3) The State permits, by the deadline required under section 505(b), in-precinct provisional voting by every voter who claims to be qualified to vote in the State, except that this paragraph shall not apply in the case of a State in which, under law in effect continuously on and after the date of the enactment of this Act, all votes in the State in general elections for Federal office are cast by mail. Under the in-precinct provisional voting described in the previous sentence, if the name of an individual who claims to be a registrant eligible to vote at a polling place in an election for Federal office does not appear on the official list of registrants eligible to vote at the polling place, or it is otherwise asserted by an election official that the individual is not eligible to vote at the polling place—

(A) an election official at the polling place shall notify the individual that the individual may cast a provisional ballot in the election;

(B) the individual shall be permitted to cast a vote at that polling place upon written affirmation by the individual before an election official at that polling place that the individual is so eligible;

(C) an election official at the polling place shall transfer the ballot cast by the individual to an appropriate State or local election official for prompt verification of the claim made by the individual in the affirmation required under subparagraph (B);

(D) if the appropriate State or local election official verifies the claim made by the individual in the affirmation, the individual's vote shall be tabulated; and

(E) the appropriate State or local election official shall notify the individual in writing of the disposition of the individual's claim and the treatment of the individual's vote.

Strike paragraphs (6) and (7) of section 502 and insert the following:

(6) Effective January 1, 2006, the State requires all voting systems—

(A) to be accessible for individuals with disabilities and other individuals with special needs, including providing nonvisual accessibility for the blind and visually impaired which provides the same opportunity for access and participation (including privacy and independence) as for other voters; and

(B) to provide alternative language accessibility for individuals with limited proficiency in the English language with respect to each political subdivision in the State for which, as determined by the Director of the Bureau of the Census—

(i) the number of voting-age citizens who have limited proficiency in the English language and who have a single language other than English as their first language is at least 5 percent of the total number of voting-age citizens,

(ii) in the case of a political subdivision which contains all or any part of an Indian reservation, the number of voting-age American Indian or Alaskan Native citizens within the reservation who have limited proficiency in the English language is at least 5 percent of the total number of voting-age citizens on the reservation, or

(iii) there are at least 10,000 voting-age citizens who have limited proficiency in the English language and who have a single language other than English as their first language.

(7) Effective January 1, 2006, the State requires all voting systems—

(A) to permit the voter to verify the votes selected by the voter on a ballot before the ballot is cast and tabulated;

(B) to notify the voter before the ballot is cast and tabulated of the effect of casting multiple votes for a single office or fewer votes than the number of candidates for which votes may be cast; and

(C) to provide the voter with the opportunity to correct the ballot before the ballot is cast and tabulated.

(8) Effective January 1, 2006, the State requires that the error rate in counting and tabulating ballots by all voting systems may not exceed the error rate provided under the voting system error rate standards developed pursuant to section 504(a)(2).

(9) Effective January 1, 2004, the States requires all polling places to be accessible to individuals with disabilities and other individuals with special needs.

Amend section 503 to read as follows:

Nothing in this subsection shall prohibit a poll worker from providing information to a voter who requests assistance.”

Mr. MENENDEZ (during the reading). Mr. Speaker, I ask unanimous consent that the motion to recommit be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

The SPEAKER pro tempore. The gentleman from New Jersey is recognized for 5 minutes in support of his motion to recommit.

Mr. MENENDEZ. Mr. Speaker, there is one principle alone that should be guiding our debate on this election reform, and that is every American has a full and equal opportunity to vote. It is a simple but extraordinarily important proposition, because it forms the justification of and expression for our democracy.

Any undermining of that principle, even the perception of undermining, can do great damage to us.

One person, one vote. We all know the questions about our system that the last Federal election left with our citizens. We must never allow a repeat of that. The Ney-Hoyer bill is a good step in that direction. Most importantly, their bill commits the resources we need to replace outdated voting systems. However, the bill turns a standard we passed in the Motor Voter Act on its head.

The Motor Voter Act says that before someone is removed from the voting rolls, they must be given written notice, and then have two elections to correct the removal at the ballot place before the removal is finalized. The Motor Voter Act stands for the principle that before you take away someone's right to vote, you give them a chance to prove they are still legally voting in the correct place.

The bill as written, however, says if you fail to vote in two elections, you can be purged from the rolls. In other words, if you do not vote, you can lose the right to vote. Our motion simply states that the rules of the Motor Voter Law should continue to govern.

Given the number of false purges we saw in the last election, it is critical that the right to provisional voting is guaranteed. There should be no need for alternatives. If an improperly purged voter is turned away on election day, that error is irreversible.

For disabled voters, the bill requires that States provide a “practical and effective” means to vote. Keeping in mind the guiding principle of equal and full access, we believe “separate but equal” is not good enough for disabled voters. With our technology and ingenuity, there is no reason why we cannot create uniform systems that can accommodate almost all of our disabled and non-disabled voters, and our amendment allows 4 years to make the necessary changes.

The bottom line is that currently 14 million disabled voters cannot cast a secret ballot, and there is no excuse for this. The bill does not guarantee that this will change. Our motion does.

For voters with different native languages, the Ney-Hoyer bill relies on current law. We simply give that standard to any other group of Americans so situated.

These are Federal elections, and we have a responsibility to ensure that a voting procedure in Florida is subject to the same minimum standards as a voting procedure in New Jersey. That is why our amendment gives the Attorney General the direct responsibility for certifying that States are in compliance with the minimum standards in this bill, without an intermediary. It is that important.

How many of us would be satisfied with the counsel of patience and delay if it were our right to vote that was being compromised? Very few of us, I think. When it comes to the right to

vote, there is no margin for error. Every vote must be ensured, counted and protected equally. But in all of these ways, our motion eliminates the margin for error and makes it better. So I certainly urge my colleagues to support the motion.

Mr. Speaker, I yield to the distinguished gentlewoman from Texas (Ms. Eddie Bernice Johnson), the Chair of the Congressional Black Caucus.

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, several universities and news organizations have conducted studies, and every study has found that votes cast are not being counted. The House Committee on Government Reform minority staff conducted a study in 40 congressional districts and found that the highest percentage of undervotes were in places which had poor and minority populations.

Mr. Speaker, there are volumes of evidence which clearly and convincingly prove that the election system in this country is broken and must be fixed.

□ 1500

We deeply believe in a need to safeguard the rights and liberties of the American people. I join the gentleman from New Jersey (Mr. Menendez), the gentlewoman from Connecticut (Ms. DeLauro) and the gentleman from Connecticut (Mr. Shays) in offering this motion to recommit. I joined them in requesting that the Committee on Rules, once again, allow the amendment, which would only allow purged voters from the voting rolls through means consistent with national voter registration and for the handicap to have the ability to vote, and provisional voting.

Mr. Speaker, I will submit the rest of my statement. This is so basic and fundamental to our democracy. I just cannot imagine anyone not being in support of these recommendations that we made to make this democracy real.

Mr. MENENDEZ. Mr. Speaker, I yield the balance of the time to the gentlewoman from Connecticut (Ms. DeLauro).

Ms. DELAURO. Mr. Speaker, our entire system of government is based on the premise of one person, one vote. For our democracy to work, people must have confidence that their vote counts. We have a responsibility to do all that we can to make sure that every citizen is able to fully exercise their fundamental right to vote.

This motion to recommit ensures that polling places are accessible, voting equipment is updated, voters are not mistakenly taken off the rolls, and that these standards are endorsed.

In cities and towns across this country it remains more difficult to go to the polls and cast a vote than it is to make a simple withdrawal from an ATM machine. There is something

wrong with that, I say to my colleagues.

The world looks to America as a shining example of democracy in action. We need to act today to ensure that every American has the right to participate in that democracy by casting a vote that will be counted. I urge my colleagues to vote "yes" on the motion to recommit.

Mr. NEY. Mr. Speaker, I rise to stand in opposition to the motion to recommit, and I claim the time in opposition.

Mr. Speaker, I yield 40 seconds to the gentleman from Maryland (Mr. Hoyer).

Mr. HOYER. Mr. Speaker, I rise simply to say that the objectives of this motion to recommit I think are worthwhile and good, but I want to make the record clear. The gentleman from Ohio (Mr. Ney) and I have had a colloquy on section 3 of the National Voter Registration Act. It is the committee's view that nothing in this bill changes or diminishes in any way any provision, including provisional voting, of the National Voter Registration Act. In fact, I made it a condition to my participation in the bipartisan bill that that be the case.

In addition to that understanding with the gentleman from Ohio (Mr. Ney) and all of us on the committee and the staff, we have contacted the Attorney General's Office and I would include at this point in time in the RECORD a letter that was received by the gentleman from Ohio (Mr. Ney) and myself on December 10, 2001 from the Assistant Attorney General.

DEPARTMENT OF JUSTICE,
OFFICE OF LEGISLATIVE AFFAIRS,
Washington, DC, December 10, 2001.

Hon. STENY HOYER,
Ranking Minority Member, Committee on House
Administration, House of Representatives,
Washington, DC.

DEAR CONGRESSMAN HOYER: This letter responds to your letter of November 29, 2001 regarding the effect of H.R. 3295, the "Help America Vote Act," upon the National Voter Registration Act of 1993 ("NVRA").

Although several provisions in the bill affect the list maintenance provisions in section 8 of the NVRA, it is evident that the bill is not designed to modify the NVRA and, in fact, it does not alter or undermine the NVRA's requirements. Section 903 of the bill itself specifically provides that nothing in H.R. 3295 "shall supercede, restrict or limit the application of . . . NVRA," that nothing in the bill "authorizes or requires any conduct which is prohibited by the NVRA," and that nothing in the bill "may be construed to affect the application of the . . . NVRA . . . to any State" (except as specifically provided in the bill). These provisions would guide the Department's enforcement efforts if the bill becomes law.

Various parts of the bill reference the NVRA and appear designed to clarify and strengthen enforcement of the NVRA's list maintenance provisions. Section 502(2) would require all 50 States and the District of Columbia, Puerto Rico, Guam, American Samoa, and the United States Virgin Islands to adopt a system of list maintenance ensuring that voter registration lists are accurate and updated regularly, and that removes reg-

istrants who are ineligible to vote. Under this system, "consistent with the [NVRA]," registrants who have not voted in 2 or more consecutive Federal general elections and who have not responded to a notice would be required to be removed from the list of eligible voters, except that no registrant could be removed solely by reason of failure to vote. This system also would have to have safeguards to ensure that eligible voters were not removed in error. Section 501(a)-(b) would require all States to enact legislation to adopt such a list maintenance system, but properly would leave States discretion as to the specific methods of implementing such a system.

Section 902(a) entitled "Clarification of ability of election officials to remove registrants . . . on grounds of change of residence," would amend the NVRA's existing requirement (at 42 U.S.C. 1973gg-6(b)(2)) that any general program not result in removal of voters' names due to their "failure to vote." However, the amendment in section 902(a) merely would clarify that nothing in section 1973gg-6(b)(2) was intended to prohibit a State from using the procedures already in sections 1973gg-6(c)-(d) to remove the names of voters who have not voted or have not appeared to vote in two or more consecutive Federal general elections and who have not notified the registrar, or responded to a notice sent by the registrar, that they intend to remain registered in the jurisdiction. As an amendment to the NVRA, this provision would apply only in the 45 jurisdictions covered by the NVRA (44 States and the District of Columbia).

In view of the bill's several affirmations that removal of names from voter rolls should be carried out in a manner consistent with the NVRA and in view of the general affirmations in section 903 that the bill will not restrict or limit the NVRA, the bill's list maintenance provisions can and should be read consistently with the NVRA's existing list maintenance procedures, which basically are: section 1973gg-6(c) suggests the Postal Service National Change of Address program as one example of a means of identifying voters who have become ineligible because they have moved outside the jurisdiction. Section 1973gg-6(d) then provides a confirmation process that States must follow before removing voters identified as potentially ineligible due to having moved. As above, voters may be removed if: (1) they do not respond to the registrar's notice and do not vote or appear to vote in two Federal general elections; or (2) they confirm in writing that they have moved outside the jurisdiction.

Many States, following guidance from the Federal Election Commission, legislatively adopted or legislatively revised list maintenance provisions after passage of the NVRA. See, e.g., Ak. Stat. 15.07.130; Fl. Stat. 98.065, 98.075, 98.093; Ga. Stat. 21-2-231 to 21-2-235; Va. Stat. 24.2-427 to 24.2-428.2. To the extent that the 45 jurisdictions covered by the NVRA have adopted list maintenance programs consistent with 42 U.S.C. 1973gg-6, we conclude that the new clarifying provisions of section 902(a) of the bill would not require those States to amend their programs. Likewise, State legislation consistent with the NVRA probably would meet the new, less specific, minimum standards for list maintenance required in section 502(2) of H.R. 3295. If this interpretation differs with that of the drafters of the bill, some clarification may be warranted.

Thank you for the opportunity to present our views. Please do not hesitate to call upon us if we may be of additional assist-

ance. The Office of Management and Budget has advised us that from the perspective of the Administration's program, there is no objection to submission of this letter.

Sincerely,

DANIEL J. BRYANT,
Assistant Attorney General.

Identical letter sent to the Honorable Bob Ney, Chairman.

Mr. NEY. Mr. Speaker, I yield myself such time as I may consume.

I wanted to point out just a couple of items about this motion to recommit, and I do respect the gentleman from New Jersey and his intentions. But this does eliminate provisions to improve list maintenance, and this is something that we all have fought very hard for. Democrats and Republicans from across the country want to make sure that they have the best voter lists possible and that they are in the best condition possible. That was a bipartisan request. This would eliminate the provisions to improve list maintenance.

Also, unless I have read this wrong, this also would deal with the issue of accessibility at the polling places. We are talking about 200,000 polling places, and this theory that was brought forward in committee on the basis of what this motion to recommit is about was discussed in the committee. No one could even give us an estimate of the billions and billions of dollars. Also, I would raise this issue: are we going to use taxpayers' dollars, then, to fund something the private sector should do, if one votes at a mall or a church? There are a lot of significant issues to that provision itself.

As far as the issue of persons with disabilities, let me just quote from the bill, and this is an important issue that I care about and a lot of people in this country obviously do care about, and it has been stated many times through this process that this bill makes one of the first significant steps in trying to help persons who have some form of a disability to vote.

The Ney-Hoyer bill is an important breakthrough for the voting rights of persons with disabilities. All new voting systems must provide a practical and effective means for voters with physical disabilities to cast a secret ballot. That is language from the Ford-Carter Commission. All States receiving Federal funds under this bill must certify that in each precinct or polling place, there is at least one voting system available which is fully accessible to individuals with physical disabilities. It also states that it uses Federal funds to purchase new machines, and must ensure that at least one voting machine in each polling place in the State will be fully accessible to individuals with physical disabilities.

This bill has also been endorsed by the National Federation of the Blind.

Mr. Speaker, I just want to urge my colleagues to hold to the bill, the Ney-Hoyer bill, and defeat the motion to recommit. Also, Mr. Speaker, at this

time I include for the RECORD the following letters of endorsement.

NATIONAL ASSOCIATION OF
COUNTIES,
Washington, DC, November 21, 2001.

Hon. BOB NEY,
Chairman, Committee on House Administration,
Longworth House Office Building, Wash-
ington, DC.

Hon. STENY HOYER,
Ranking Member, Committee on House Adminis-
tration, Longworth House Office Building,
Washington, DC.

DEAR REPRESENTATIVES NEY AND HOYER:
We want to commend you for your hard work
and perseverance in introducing a bipartisan
election reform bill. The legislation is a
compromise and not everyone is going to
agree with all of its provisions which in-
cludes some of our county officials.

The National Association of Counties
(NACo) would like to go on record as sup-
porting H.R. 3295 as it was reported by the
House Administration Committee. We would
have to review this position if extensive
changes are made on the House floor or in
the Senate.

NACo still has concerns about Congress
providing adequate funding for carrying out
the mandates in the bill. We believe the au-
thorizations would be adequate but we also
would like to see a commitment from the
leadership on providing sufficient appropria-
tions in FY2002 and FY2003. We will be ur-
ging President Bush to request the full au-
thorization amounts in his budget for
FY2003.

We will be sending letters to all Members
urging them to vote for H.R. 3295. We also
will be urging county officials to contact
their state delegations to support the bill.

If you have any questions, please call me
or Ralph Tabor on our staff (202-942-4254).

Sincerely,

LARRY E. NAAKE,
Executive Director.

ELECTION CENTER,
Houston, Texas, November 26, 2001.

Hon. ROBERT NEY,
Hon. STENY HOYER,
House Administration Committee, Longworth
House Office Building, Washington, DC.

CONGRESSMANS NEY AND HOYER: On behalf
of the elections community of America. I
want to congratulate the two of you for ac-
complishing what grizzled veterans said
could not be done: you have produced true
bi-partisan legislation that will help Amer-
ica cure the worst of the problems discovered
in Election 2000.

As you are aware, the rules and laws under
which The Election Center was formed pre-
vent us from lobbying for or against any leg-
islation—our members nationwide will do
that on their own—but we can speak to what
we believe the impact of the legislation will
do for American elections.

The two of you have shown what men of
goodwill can do when a difficult issue arises.
Obviously there were partisan considerations
involved in this legislation and each of you
was a noble champion for your party's par-
ticular view—but you also showed that you
could find a way to reach consensus and still
effect meaningful legislation.

I know this bill will not please all voter
groups—even the elections community find
items they dislike in this legislation. I know
there are already claims that it does not go
far enough for some—or too far for others.
You and the House Administration Com-
mittee have fashioned legislation which
does, however, address the serious problems

discovered in Election 2000. You have found
methods which reach and solve the real prob-
lems without doing it in heavy handed Fed-
eral edicts.

Finding the right balance of voter protec-
tions and yet not upsetting the rights of
states and local governments to maintain re-
sponsibility for this process has not been an
easy task but you have managed to reach
consensus that protects the rights of minori-
ties and even extends new services to the
blind and disabled, to military and overseas
voters, and provides new poll workers for
elections. The months of delay waiting on bi-
partisan legislation have been well spent in
developing a true compromise bill.

Congratulations on a job well done. This is
responsible legislation.

Sincerely,

R. DOUG LEWIS,
Executive Director.

A NATIONAL ASSOCIATION OF COUNTY
RECORDERS, ELECTION OFFICIALS
AND CLERKS,

Durham, NC, November 26, 2001.

HONORABLE ROBERT W. NEY: The National
Association of County Recorders, Election
Officials and Clerks (NACRC) would like to
go on record in support of H.R. 3295 spon-
sored by Bob Ney, Chairman of the House
Administration Committee, and Steny
Hoyer, Ranking Member of the House Ad-
ministration Committee.

We support the bill in its current form. If
there are extensive changes, we would have
to review our support at that time.

Although we have studied all of the provi-
sions and are not happy with each and every
one, we do feel we can support the majority
of the bill. We are particularly pleased that
it is a bipartisan effort.

As election officials we truly strive to con-
duct all elections as fairly and accurately as
possible and we feel this cannot be done
when partisanship is present.

Please feel free to contact me if you have
any questions at 253.798.3189.

Sincerely,

CATHY PEARSALL-STIPEK, CPO,
NACRC President, Pierce County
Auditor—Supervisor of Elections.
NATIONAL CONFERENCE OF
STATE LEGISLATURES,
November 26, 2001.

Hon. BOB NEY,
Chair, Committee on House Administration,
House of Representatives, Longworth House
Office Building, Washington, DC.

Hon. STENY H. HOYER,
Ranking Member, Committee on House Adminis-
tration, House of Representatives, Long-
worth House Office Building, Washington,
DC.

DEAR REPRESENTATIVES NEY AND HOYER:
We are writing to express the support of the
National Conference of State Legislatures
for H.R. 3295, the "Help America Vote Act of
2001." We commend you on your leadership
in undertaking to draft sound election re-
form legislation and appreciate your stead-
fast willingness to work with states to craft
a balanced bill for states and the American
people. H.R. 3295 provides an effective means
for states to update and change their elec-
tion processes without an unduly burden-
some federal presence, and with much-needed
federal financial support.

State legislators are committed to a fair
election process. The bipartisan NCSL Elec-
tions Reform Task Force adopted ten core
principles that embody the fundamental
views of elections in the states. The first
principle is that "the right to vote is perhaps

the most basic and fundamental of all the
rights guaranteed by the U.S. democratic
form of government. Implicit in that right is
the right to have one's vote count and the
right to have as nearly perfect an election
proceeding as can be provided." NCSL be-
lieves that the core principles enumerated in
H.R. 3295 are consistent with the findings of
our own Election Reform Task Force and
identify an appropriate role for the federal
government in meeting the states shared
commitments to modernizing the voting
process and ensuring the integrity of the bal-
lot.

Although H.R. 3295 contains minimum
standards that will require states to certify
that they have enacted legislation to provide
for such things as a statewide voter registra-
tion database and provisional voting, these
standards do not mandate how states should
fulfill these requirements, thus allowing for
necessary state flexibility in the implemen-
tation of the standards. It is only through a
flexible approach to election reform that
states can meaningfully improve elections
processes for all voters. NCSL is satisfied
that H.R. 3295 provides sufficient state flexi-
bility.

We also wish to underscore the importance
of receiving an appropriate amount of fed-
eral monies to assist states with the imple-
mentation of those standards that may oth-
erwise be too costly. In these uncertain
times and tight state budgets, federal finan-
cial assistance is critical to states' compli-
ance with these new federal standards. We
understand there is a commitment from
Speaker Hastert and the Administration
that sufficient federal funds will be appro-
priated to meet the needs of the states under
this bill. We urge you to continue to strive
for federal funding.

We again thank you for your excellent
leadership on this issue and look forward to
working with you for passage of this bill.

INTERNATIONAL ASSOCIATION OF
CLERKS, RECORDERS, ELECTION
OFFICIALS AND TREASURERS,
Chicago, IL, November 29, 2001.

Hon. ROBERT NEY,
Hon. STENY HOYER,
House Administration Committee, Longworth
House Office Building, Washington, DC.

DEAR CONGRESSMEN NEY AND HOYER: As
President of the International Association of
Clerks, Recorders, Election Officials, and
Treasurers (IACREOT), and Executive Direc-
tor of the Chicago Board of Election Com-
missioners, one of the Nation's largest elec-
tion jurisdictions, I have been asked for my
opinion concerning H.R. 3295, known as the
Ney-Hoyer Bill on election reform.

Obviously, you have undertaken a very dif-
ficult challenge in fashioning an election re-
form proposal to meet the needs of thou-
sands of election jurisdictions throughout
the nation. I want to congratulate you and
your committee on a very thoughtful and
thorough legislative package that will help

ensure that every vote in this great nation is counted, and counted accurately. Although I have some specific reservations and suggestions on some of the bill's provisions, I think overall it is the best proposal among the many we have seen since the November 2000 Presidential Election.

At a later date, I would be honored to appear before your committee to present my specific recommendations to make this legislation even more palatable. I know you and your committee have worked very hard on this bill. Again, please accept my congratulations.

Sincerely,

LANCE GOUGH,
President.

NATIONAL FEDERATION
OF THE BLIND,
Baltimore, MD, December 11, 2001.

Hon. ROBERT NEY,

Chairman, Committee on House Administration,
House of Representatives, Washington, DC.

DEAR MR. CHAIRMAN: I am writing to express the support of the National Federation of the Blind for the Help America Vote Act of 2001 (H.R. 3295), including language we requested to address the needs of people who are blind. Thanks to your efforts and understanding, this legislation points the way for blind people to vote privately and independently.

While the 2000 election demonstrated significant problems with our electoral system, consensus regarding the solution has been much more difficult to find. Nonetheless, it is clear that installation of up-to-date technology will occur throughout the United States. This means that voting technology will change, and devices purchased now will set the pattern for decades to come. Therefore, requirements for nonvisual access must be an essential component of the new design.

With more than 50,000 members, representing every state, the District of Columbia, and Puerto Rico, the NFB is the largest organization of blind people in the United States. As such we know about blindness from our own experience. The right to vote and cast a truly secret ballot is one of our highest priorities, and modern technology can now support this goal. For that reason, we support any legislation that will accomplish this objective. Thank you for your assistance in addressing this concern as part of the Help America Vote Act of 2001.

Sincerely,

JAMES GASHIEL,
Director of Governmental Affairs.

OHIO SECRETARY OF STATE,
Columbus, OH, November 20, 2001.

Hon. BOB NEY,

Chairman, Committee on House Administration,
Longworth House Office Building, Washington, DC.

DEAR BOB: For the last year, professional election officials across the nation have wrestled with the challenges brought to light as a result of the 2000 Presidential Election. At the heart of the issue is the suitability for ongoing use of punch card voting systems and the need for statewide uniform standards of election administration within each state.

It has been my pleasure to work with you and the House Administrative Committee as you have worked so hard to reach a bipartisan compromise for election reform. I am very pleased to see that you have built a consensus for reform and offer you my whole-hearted endorsement of HR 3295, the Help America Vote Act of 2001.

This important legislation reflects the best balance of federal involvement and local con-

trol of elections that I have seen to date. You have reached a fine balance that reflects the serious need for election reform without federalizing the election process and minimizing local election administration, as some proposals do. By funding the buy-out of punch card ballot systems, your bill will help guarantee that we never again see the debacle that occurred in Florida because of punch card balloting inconsistencies. By requiring the adoption of reasonable ballot-counting standards, you also make sure that states are prepared to deal with ballot-counting questions before an election is contested and not after the fact. This will be a tremendous benefit to all Americans.

I realize there are some that wish the federal government to mandate a uniform voting system and standards for every jurisdiction. I believe this would be a terrible mistake. Election officials everywhere recognize the solutions for one precinct may not work the same in the next—particularly when separated by thousands of miles. Almost every election reform report I have seen confirms this important fact. While states can and should be held accountable for adopting uniform standards for their voting machines, each state should be left the option of choosing solutions that work the best. The cookie cutter approach will not work for elections and I encourage you to continue your efforts to fight this movement.

To assist you in the passage of this critical legislation, I will be sending a copy of this letter to every Secretary of State in the nation, every election official in Ohio and every county commissioner in Ohio. I will also be discussing your legislation in an upcoming article in our Spirit of Ohio publication, so even more Ohioans can learn of your good work and will know how to contact you to lend their support. If there is any further assistance I can provide you, please do not hesitate to let me know.

Again, thank you very much for all you are doing. I look forward to seeing Congress pass balanced and meaningful election reform legislation—HR 3295.

Sincerely,

J. KENNETH BLACKWELL,
Ohio Secretary of State.
STATE OF WISCONSIN
ELECTIONS BOARD,
Madison, WI, December 10, 2001.

To: Members, Wisconsin Congressional Delegation.

From: Kevin J. Kennedy, Executive Director, Wisconsin State elections Board.

Subj: Ney/Hoyer Election Legislation (H.R. 3295).

H.R. 3295 sponsored by Congressmen Ney and Hoyer is scheduled for a vote in the House of Representatives this Wednesday, December 12, 2001. The Ney/Hoyer proposal is one of several election reform proposals initiated at the federal level. In my opinion it contains the most comprehensive set of solutions to problems identified in the 2000 election. It most closely reflects the items of consensus identified in the numerous commissions that submitted reports this summer.

The State Elections Board has not taken a position on any recommended federal legislation. However, as Wisconsin's chief election officer for the past 19 years I would like to urge your serious consideration of H.R. 3295.

I had the privilege of serving on the Election Center Task Force that consisted entirely of state and local election administrators. Many of our recommendations are reflected in H.R. 3295. The bipartisan proposal strikes a very reasonable balance among the

competing interests at stake. Most importantly, the legislation recognizes the role of state and local government in election administration.

Several stakeholders, including State Election Directors, would like to see more far reaching initiatives. However, given the highly partisan atmosphere in which election reform is discussed, I believe that this legislation provides the most realistic solution. The legislation provides a mechanism for developing realistic standards in conjunction with state and local election administrators and a reasonable funding mechanism.

None of the minimum standards described in the legislation adversely impact Wisconsin. With the exception of a statewide voter registration database, Wisconsin already meets or exceeds the minimum standards articulated in the legislation. Quite frankly the state legislature recognizes that a statewide voter registration database is inevitable. If funding accompanies the bill, it can be used to assist Wisconsin in getting the system in place.

H.R. 3295 provides an excellent opportunity to address the lack of confidence in the electoral process that has been fanned by the media. I encourage you to support the bill when it comes up for a vote this week. I would be happy to discuss the impact of this legislation on Wisconsin with you or a member of your staff. Our website, elections.state.wi.us, contains links to the major reports on election reform.

Please contact me with any questions. I can be reached at 608-266-8087.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON SCIENCE,
Washington, DC, November 20, 2001.

Hon. BOB NEY,

Chairman, Committee on House Administration,
House of Representatives, Washington, DC.

DEAR BOB: On November 14, 2001, you introduced H.R. 3295, the "Help America Vote Act of 2001." The bill was referred to the Committee on House Administration, and in addition to the Committee on Science (among others). The bill contains provisions that fall within the jurisdiction of the Committee on Science.

In deference to your desire to bring this legislation before the House in an expeditious manner, I will not exercise this Committee's right to mark-up H.R. 3295. Despite waiving its consideration of H.R. 3295, the Science Committee does not waive its jurisdiction over H.R. 3295. Additionally, the Science Committee expressly reserves its authority to seek conferees on any provision that are within its jurisdiction during any House-Senate conference that may be convened on this legislation or like provisions in H.R. 3295 or similar legislation which falls within the Science Committee's jurisdiction. I ask for your commitment to support any request by the Science Committee for conferees on H.R. 3295 as well as any similar or related legislation.

I would also like to take this opportunity to thank you for including provision of H.R. 2275 within H.R. 3295. As a result of the negotiation between our Committees, the provisions of the Science Committee's bill to improve voting technology (H.R. 2275) have been incorporated into the Ney-Hoyer (H.R. 3295) bill. The thrust of the Science Committee bill was to set up a process to ensure that proper technical standards would be developed to improve voting technology and that a reliable system would be set up to test equipment against those standards. Virtually every provision of the Science Committee bill has been included in the House

Administration Committee legislation. Because of the hard work and cooperation between our Committees, the new standards will ensure that voting machines tally voters' ballots accurately. They will help reduce voter error by ensuring that new voting equipment is user-friendly. Additionally, these standards will ensure that voting machines are accessible to the disabled.

I request that you include this exchange of letters as part of your report on H.R. 3295. I look forward to continuing to work with you on matters of mutual concern.

Thank you for your consideration and attention regarding these matters.

Sincerely,

SHERWOOD L. BOEHLERT,
Chairman.

HOUSE OF REPRESENTATIVES,
COMMITTEE ON ARMED SERVICES,
Washington, DC, December 7, 2001.

Hon. J. DENNIS HASTERT,
Speaker, House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: In recognition of the desire to expedite floor consideration of H.R. 3295, the Help America Vote Act of 2001, the Committee on Armed Services agrees to waive its right to consider this legislation. H.R. 3295, as introduced on November 14, 2001, contains subject matter that falls within the legislative jurisdiction of the Committee on Armed Services pursuant to rule X of the Rules of the House of Representatives.

The Committee on Armed Services takes this action with the understanding that the Committee's jurisdiction over the provisions in question is in no way diminished or altered, and that the Committee's right to the appointment of conferees during any conference on the bill remains intact.

Sincerely,

BOB STUMP,
Chairman.

U.S. HOUSE OF REPRESENTATIVES,
COMMITTEE ON GOVERNMENT REFORM,
Washington, DC, December 11, 2001.

Hon. ROBERT W. NEY,
Chairman, Committee on House Administration,
Washington, DC.

DEAR MR. CHAIRMAN: As you know, under Rule X of the Rules of the House of Representatives, Establishment and Jurisdiction of Standing Committees, the Committee on Government Reform has exclusive jurisdiction over matters relating to transportation of the mail, and all matters involving the United States Postal Service. H.R. 3295, the "Help America Vote Act of 2001," includes language that falls within the jurisdiction of the Committee (Title VII—Reduced Postage Rates for Official Election Mail). In its present form Title VII would create an open-ended subsidy that would be difficult to administer, and would be financed by a "tax" on postal customers.

I appreciate both you and your staff consulting with my Committee on your legislation. In accordance with our discussions you have agreed to remove Section VII of the bill. The Government Reform Committee will no longer have any jurisdictional claim over the legislation, since no other provisions of the bill are under the purview of the Committee.

Under the National Voting Rights Act of 1993, Congress contemplated that election officials would have the ability to access the same reduced mailing rates available to non-profit organizations. As you mentioned there have been a number of problems associated with the implementation of this part of the

law. I am strongly committed to working closely with State and local election officials, the United States Postal Service and you to solve this problem. If this effort proves to be problematic I stand ready to examine alternatives—including a possible legislative solution.

Thank you again for your consultation and I would ask that a copy of this letter be included in the Congressional Record during Floor consideration. I look forward to continuing cooperation on matters within the jurisdiction of both committees.

Sincerely,

DAN BURTON,
Chairman.

Mr. NEY. Mr. Speaker, I urge the motion to recommit be defeated, and I urge support of the bill, and I yield back the balance of my time.

The SPEAKER pro tempore (Mr. LAHOOD). Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to recommit.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. MENENDEZ. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

Pursuant to clause 9 of rule XX, this 15-minute vote on the motion to recommit will be followed by a 5-minute vote, if ordered, on the question of passage.

Pursuant to clause 8 of rule XX, proceedings will then resume on the three motions to suspend the rules and the one corrections bill postponed from yesterday, on which the yeas and nays are ordered, each of which will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 197, nays 226, not voting 10, as follows:

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. LEWIS of California. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the motion to go to conference on the bill, H.R. 3338, and that

I may include tabular and extraneous material.

The SPEAKER pro tempore (Mr. THORNBERRY). Is there objection to the request of the gentleman from California?

There was no objection.

APPOINTMENT OF CONFEREES ON H.R. 3338, DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 2002

Mr. LEWIS of California. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 3338) making appropriations for the Department of Defense for the fiscal year ending September 30, 2002, and for other purposes, with a Senate amendment thereto, disagree to the Senate amendment, and agree to the conference asked by the Senate.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

MOTION TO INSTRUCT OFFERED BY MR. OBEY

Mr. OBEY. Mr. Speaker, I offer a motion to instruct conferees.

The Clerk read as follows:

Mr. OBEY moves that the managers on the part of the House at the conference on the disagreeing votes of the two Houses on the Senate amendment to the bill, H.R. 3338, be instructed to insist on the maximum levels within the scope of conference for defense, homeland security, and local recovery efforts from the terrorist attacks of September 11, 2001; in particular, to insist on:

(1) the House position for higher levels for defense, including fully funding the \$7.3 billion requested by President Bush as emergency spending for defense;

(2) the Senate position for higher levels to counter potential biological and chemical terrorist threats (including additional funds to improve State and local capacity to track and to respond to bioterrorism, to purchase smallpox vaccine, and to sanitize mail and protect postal employees and customers from exposure to biohazardous material);

(3) the Senate position for higher levels to increase staff to combat terrorism along the Nation's borders and ports of entry, to improve food safety, to assist state, local and federal antiterrorism law enforcement, to accelerate nuclear non-proliferation activities, and to enhance security for nuclear labs and plants, and other federal facilities;

(4) the higher of either the House or Senate provisions for transportation security, including the higher Senate level for cockpit security, the Senate higher funding for the Coast Guard, the Senate provision to compensate airports for the costs of implementing stronger security requirements and the higher House level for hiring sky marshals;

(5) the Senate position for higher levels for FEMA disaster relief payments for recovery activities in New York, Virginia and Pennsylvania, Community Development Block grant assistance, Payments to hospitals that responded to the attacks of September 11, 2001, assistance in meeting workmen's compensation needs related to the terrorist attacks, funding for improved security in the Amtrak tunnels in New York, assistance to the ferry system between New York and New

Jersey, and to reimburse claims for first response emergency service personnel who were injured, disabled or died in the terrorist attacks.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. OBEY) will be recognized for 30 minutes and the gentleman from Florida (Mr. YOUNG) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. OBEY).

Mr. OBEY. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, the House has a decision to make today which in the real world would have a real effect on virtually every American. We have to face this question:

Are we going to provide money now to tighten security on our borders, in our ports, on our airplanes, or are we going to wait?

Are we going to provide the public health services and local governments with money now to defend against bioterrorism, or are we going to wait?

Are we going to accelerate our efforts to protect nuclear, biological and chemical weapons from falling into the wrong hands in the former Soviet Union now, or are we going to wait?

Are we going to clean up our mail, or are we going to wait?

Are we going to give the Nation's Federal, State and local law enforcement officials the additional resources they need to find al Qaeda cells operating in this country, or are we going to wait?

There are people downtown who would like us to wait. They want to take the time to study these problems. They want to participate in these decisions. Perhaps they want credit for being part of the solution. That is all fine. We need their thoughts. We need their input. We need them both. Now. We are glad to give them credit, but we cannot wait. We are in a race against time. All you have to do to understand, that is, to look at the headlines every day in the newspaper, look at the pictures on your television, and listen to what our enemies say. We may have an enemy that is wounded, but they are not destroyed. They are as dangerous now as they have ever been. And while we need to do all that we can do to defeat them overseas, we have to be equally aggressive at blocking their efforts here at home.

This motion is very simple. It would instruct the conferees to maintain the House position on defense which is \$5.3 billion higher than the Senate's figure; it would insist that the conferees support the Senate position on homeland security which is \$2.7 billion above the House bill; and it would instruct the conferees to support the Senate position for funds to help recover from the attacks of September 11, an additional \$2.6 billion above the amount in the House bill. There is only one way that that can happen. Everyone here needs

to understand that this instruction will put the conference at least \$5.3 billion above the House-passed bill.

Members may try to pretend that they cannot add, but numbers are stubborn things. If you want to tell the conferees to stay within the \$20 billion limit that the House Republican leadership has mandated, then you had better vote against this instruction, because this instruction breaks that limit by at least \$5.3 billion, and I make absolutely no apology for that in any way whatsoever. We cannot have it both ways. You cannot spend the same money twice.

In fact, Members need to understand that this bill, in fact, will be a little bit above \$5.3 billion above the House bill because we take the Senate number on sky marshals which is higher than the House number is.

I would urge Members to vote for this motion to instruct because it is the right thing to do, it puts the security of the country's home front first, it recognizes that we have additional costs in running the war as well, and it forthrightly admits that this is now the time to pay for them rather than putting it off to another more convenient day. I do not think our adversaries will wait for whatever actions they contemplate. We have an obligation not to wait, either.

Mr. SABO. Mr. Speaker, will the gentleman yield?

Mr. OBEY. I yield to the gentleman from Minnesota.

Mr. SABO. Mr. Speaker, I rise in support of the motion to instruct.

While we have made improvements to transportation security since September 11th, we must do more. This motion directs the House conferees to seek the higher funding levels for transportation security programs.

The tragedies of September 11th happened because terrorists were able to enter the cockpits of four airplanes. Unfortunately, the House bill contains only \$50 million for cockpit door improvements. The Senate bill contains \$251 million for cockpit door improvements, much closer to the Administration's request of \$300 million. This motion instructs the House conferees to accept the Senate funding level.

Today, the airlines have made some improvements so that cockpit doors cannot be as easily broken into, such as the strengthening of bolts. The President proposed \$300 million so that modifications can be made to secure the cockpit door in such a way as to permanently prevent an intruder from entering the cockpit door.

The funding included in the Senate bill would be provided to airlines to ensure that all aircraft cockpit doors are modified as quickly as possible. This funding should be included in the conference bill.

The House bill provides additional funding for more federal air marshals, where the Senate bill contains no such funding. The Administration has made good progress in increasing the number of federal air marshals, and the House bill would provide for a further increase. It is important to public safety and

confidence that we bolster their numbers to the greatest extent possible. This motion would instruct the House conferees to insist on the House funding for more air marshals.

The Senate bill also provides additional funding to our nation's airports to meet additional security needs.

Since September 11th, the Federal Aviation Administration has imposed additional security requirements on our nation's airports, and rightly so.

Increased patrols of ticket counters, baggage claim areas, and screening checkpoints have been mandated, as has increased inspections of controlled access points and the areas outside the airport. Airports have also been required to re-issue all airport identification and verify such identification at all access gates.

To meet these additional requirements, the airports have incurred additional costs, primarily for additional law enforcement officers and overtime.

The American Association of Airport Executives estimates the cost of these additional requirements to be about \$500 million this year. These increased costs come at a time when airports are losing money. The airports estimate the total revenue decrease to be \$2 billion in 2002, or 20 percent of estimated revenue.

The Senate bill includes \$200 million to assist airports in meeting the costs of the increased security requirements mandated by the FAA. This motion instructs the House conferees to accept this funding level.

The Senate bill also includes a total of \$285 million for the Coast Guard, compared to the House level of \$145 million. The higher funding level in the Senate bill is needed so that the Coast Guard may continue its current, increased level of operations, and further expand its port security activities.

Since September 11, Coast Guard port security operations have increased substantially. The Coast Guard is now patrolling ports and checking crew lists of those entering our ports. Much more needs to be done to enhance port security, but what the Coast Guard has done is a good start.

These current Coast Guard operations should not be reduced; and the funding provided in the Senate bill will ensure that they are not. This motion would instruct the House conferees to accept the Senate's higher funding for the Coast Guard and port security.

In closing, let me say that this motion to instruct is the right one. It addresses the security needs of this country and the traveling public. We should do no less.

Mr. OBEY. Mr. Speaker, I reserve the balance of my time.

Mr. YOUNG of Florida. Mr. Speaker, I yield myself such time as I may consume.

I want to say at the outset that I congratulate the gentleman from Wisconsin for the work that he has done on this issue. We have had this discussion between the two of us. We have had this discussion with the President of the United States. We have had this discussion at the Committee on Appropriations. And we had this discussion on the floor of the House when we passed the bill.

I would like to say, Mr. Speaker, I do not disagree with the needs that the gentleman from Wisconsin has pointed out here. If you recall, on September 14, the House, with the gentleman from Wisconsin and I working closely together, passed an emergency supplemental of \$40 billion right after the attacks on the World Trade Center and the Pentagon. The same day, the Senate passed the bill and we actually conferred that bill and passed a conference report, all on the same day. So we moved quickly. We have proved that we can move quickly when it comes to the defense of our Nation and the protection of our citizens.

I want to make the case that of the \$40 billion emergency supplemental, most of the money has not been allocated yet. In that \$40 billion, the first \$20 billion that the President had control over plus what the House did in our supplemental, there is \$21 billion for the Defense Department to prosecute the war. Will it take more than that? Very likely.

We do not require that money today, but we are going to provide whatever is necessary to complete that war in Afghanistan and anyplace else that we might have to go to seek out and destroy the terrorist cells that pose a threat to the United States of America and to our people and our interests, wherever they might be. We are going to provide whatever it takes to make that happen. We are not going to allow Americans to live in fear, and we are not going to allow our places and our properties to be attacked. That is pure and simple.

On the issue of biological and chemical terrorist threats, we need to be concerned about that, and we are concerned. This Congress several years ago began providing the preparation and the research necessary to combat any biological and chemical threat, but more needs to be done. In the House bill together with the President's \$20 billion package, there is already \$2.2 billion. One of the most important things that we need to do is guarantee that our ports of entry, that our borders, are protected. We provide about \$700 million immediately to begin to hire and train the people who would provide that security.

As for transportation, The United States of America, without transportation is in deep trouble. Economically and every other way, from the national defense standpoint, our transportation systems must be safe. We provide funding for the hiring of sky marshals and to train them and to implement stronger security requirements at our airports and our other transportation stations.

□ 1630

We have \$1.2 billion already here to begin that process.

We need to assist our State officials, local officials and Federal officials who

deal with the antiterrorism law enforcement. We have \$400 million to begin that process already in the bill.

Nuclear nonproliferation activities are very important. We have money in our regular bills for this purpose. We add another \$100 million in the package that we present today.

To the City of New York, we have all made commitments to the City of New York. We are going to keep them. The President agreed to a \$20 billion package for New York, and we immediately agreed to that; and it was put into our \$40 billion emergency supplemental. Already in the package that we present, \$10 billion is made for the City of New York. We are doing all of these things at the present time.

Now, we could take the package of the gentleman from Wisconsin (Mr. OBEY), and, frankly, I would have liked to have supported it all the way through the process with the President, the leadership, the committee, and lastly, on the floor. But we agreed to a \$20 billion limit on the supplemental, and that is the only difference that I have with the gentleman from Wisconsin (Mr. OBEY) on this motion to instruct today.

We are going to do the items that the gentleman from Wisconsin (Mr. OBEY) identifies, because he and I have gone over these items already, and I agree with what he is suggesting. The only difference we have is timing.

The President of the United States has said that he will request an emergency supplemental at the moment that it is needed, when we do not have enough money already in the pipeline to provide the things that we are talking about here to secure our Nation. Our leadership has promised that when that request is made available to us it will be presented immediately.

As chairman of the Committee on Appropriations, I have made the commitment over and over again that I will move that supplemental appropriations bill just as soon as I possibly can after we receive the information and the request from the President of the United States, who is leading the battle to secure America, who is leading the battle to seek out the perpetrators of terrorism, and to do away with their ability to threaten us at any time in the future.

The President is the leader. Congress is important, we are in a support role in this issue; but we cannot all run that war. That is why we have a Commander in Chief as proposed by the Constitution of the United States.

So, Mr. Speaker, today I am going to accept the gentleman's motion to instruct, with that reservation that we are going to try to do as much as we possibly can on that motion within the \$20 billion limit, and that we will address the additional amounts at whatever moment they are identified as being required.

Mr. Speaker, I reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, what we just heard from my good friend from Florida is that he is going to accept this amendment, which requires the conference committee to report back with a bill which is \$5.3 billion higher than the \$20 billion ceiling to which he has just referred, and yet he has suggested that somehow he is going to reserve the right to come back still under that \$20 billion cap. One cannot do both at the same time.

Now, I sympathize with the gentleman, because I know he is personally in favor of what we are trying to do. So are many other Members on the Republican side of the aisle. They have told me that. His problem is he has been ordered by his leadership, no matter what, to stay under the \$20 billion ceiling.

He knows he cannot win a vote against this motion, and so he is accepting it to try to leach all meaning from the vote. Yet you cannot hide from the fact that this motion to instruct says we should ignore the \$20 billion artificial limit and meet the legitimate security needs of this country, both in the defense budget and in homefront defense. That is what this motion says.

If people want to try to play it both ways, I understand the gentleman's dilemma, but that does not make his position any more real.

Mr. Speaker, I yield 1 minute to the gentleman from Massachusetts (Mr. FRANK).

Mr. FRANK. Mr. Speaker, I think in fairness to the gentleman from Florida, my friend misheard him. I do not always speak with perfect diction. I understand when people mishear people.

You said you think he said he would accept it, A-C-C-E-P-T; he said he would except it, E-X-C-E-P-T. That means he is going to vote for it, except for the money for the Defense Department; he is going to vote for it, except for the money for New York; and he is going to vote for it, except for the money for domestic homeland security.

So, if the gentleman had said he was going to accept it and simultaneously disregard it, you would be perplexed; but if you had understood him correctly as saying he is going to except it and do everything except what it says it is supposed to do, the perplexity would be gone.

Mr. OBEY. Mr. Speaker, I yield myself 2 minutes.

Mr. Speaker, I think what the gentleman is pointing out is there is a word game going on here, and the fact is this is too serious for games. The gentleman from Florida is right in his heart. He knows we need this money. He knows we need it now.

He knows that we need new border guards now, not in 3 months. He knows

we need greater security at the FBI, the NSA and a number of other national security agencies. He knows we need it now, not later. He knows that we need a far greater protection for public health than we have right now. He knows that right now we are not prepared for chemical or biological attacks in most of the municipalities in this country.

He knows all of that, but he is being required by his leadership to pretend that this motion to instruct does not in fact vitiate his leadership's instructions, because his leadership knows and he knows they cannot win a vote on the merits, because there are too many responsible Republicans who recognize that this money is needed and it is needed now.

Mr. Speaker, I yield 2 minutes to the distinguished gentleman from New York (Mr. NADLER).

Mr. NADLER. Mr. Speaker, I rise in support of the motion to instruct. I opposed the House version of this bill precisely because it failed to live up to the House's commitment and in fact repealed the requirement in the original supplemental bill that we had earlier passed to provide at least \$20 billion in relief and recovery costs to the victims of the September 11 attack and to the people of New York, Virginia, and Pennsylvania.

Thankfully, we still have a chance to improve the bill and increase funding for areas of critical need, and that is why we should support this motion to instruct.

Now is not the time to artificially cap the costs of this crisis. If it costs more than \$40 billion, we ought to provide more. We should not be bound to an artificial limit that was agreed to 3 days after the attack.

Today we know that in fact we do need more funds to help New Yorkers, to aid small businesses, to protect against chemical and biological attacks and to substantially increase our national security.

Some say we in New York do not need more funds than provided in this bill now; but we do, now. Yes, sufficient funds are flowing for the cleanup and the physical reconstruction, but not for the 100,000 people who lost their jobs as a direct result of the attack; not for the 10,000 small businesses at risk in Lower Manhattan.

The Small Business Administration is proud it has given out over 17,000 loan applications, but it has made only 360 loans. Our small businesses need help, cash grants, now. Next spring will be too late. They may not exist by next spring.

Let us pass this motion to instruct. Let us live up to our commitments and let us be proud to support a bill that meets the desperate needs of our constituents and the desperate needs of our country. I urge support for the motion to instruct.

Mr. YOUNG of Florida. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, I listened with great interest to my friend from Massachusetts, to the points he made. I am sure he believes he made a real powerful point, but I have not been able to figure out what it was yet.

Mr. FRANK. Mr. Speaker, will the gentleman yield?

Mr. YOUNG of Florida. I yield to the gentleman from Massachusetts.

Mr. FRANK. Mr. Speaker, my point was that it would be confusing if the gentleman had accepted the motion and simultaneously disregarded it. So it seemed to me what he was saying was he intended to make exceptions to it, and that "acceptance" and "exception" got confused, because the gentleman said he was going to vote for a motion which required additional spending which he then said he planned to oppose.

Since that would not have made any sense, I tried to follow the principle that you try to listen to what people say and you try to make some sense out of it.

Mr. YOUNG of Florida. Okay. Mr. Speaker, I appreciate the gentleman reexplaining that.

Mr. Speaker, we have to be real. The other body had this issue of appropriating money over the \$20 billion. Because it went over the \$20 billion, it was subject to a point of order and it required a 60-vote margin to overcome the point of order. The vote was 50-50, and that 50-50, I would suggest, is going to stay in the Senate regardless of what we might do here today and what we might do in conference. So I am just trying to be helpful and friendly here. The gentleman from Wisconsin (Mr. OBEY) is very well aware of the fact that I want to be helpful. We are going to do the very best we can in this conference.

The gentleman from California (Mr. LEWIS) and the gentleman from Pennsylvania (Mr. MURTHA) have developed an outstanding defense bill for the \$317 billion basic defense bill. Most of our differences in conference will be over this \$20 billion emergency supplemental package that is attached to the defense bill as an amendment.

We are going to do the best we can, but I will guarantee you we are not going to leave something undone that needs to be done today, because there is more flexibility in monies that have already been appropriated.

So I say that we will support this today, and we are going to do the best we can in conference to accomplish what the gentleman from Wisconsin (Mr. OBEY) wants to accomplish; but before it is over, we will have provided whatever is needed to secure the United States of America and to allow the President to run this war and make sure that he has the money when it is needed to do that.

None of us are going to be satisfied if something is undone, if something is not done, if some security measure is not taken care of because of a lack of money. We are going to provide whatever is necessary to fight terrorism, to guarantee that the terrorists do not have an opportunity to attack America again or our friends or our allies or our interests, wherever they might be.

Mr. OBEY. Mr. Speaker, I yield myself 30 seconds.

Mr. Speaker, I simply want to note that if anyone votes for this motion today, they are accepting the obligation of the conferees to report back a bill which is \$5.3 billion higher than the bill as it left the House.

Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania (Mr. MURTHA), the distinguished ranking member of the Committee on Appropriations Subcommittee on Defense.

Mr. MURTHA. Mr. Speaker, the dilemma we are caught in here, and the gentleman from Florida, the gentleman from Wisconsin, the gentleman from California, all of us know this, is we have an agreement with an artificial cap, and we have to try to meet the needs of the war while this is going on.

We know that in the amendment that we have offered we can speed up the renovation of the Pentagon. We know we can speed up some of the weapons systems; and some people would say that with the phenomenal increase already, we do not need any more. But some of the problems we are trying to solve have gone on for years.

For instance, we are trying to figure out a way to replace tankers. We run into the artificial ceiling. The tankers are worn out. We are using them every day. Some of those flights today have to be refueled four or five times by the time they get to Afghanistan and back. Yet we cannot buy the tankers, so we are probably going to have to lease them, if we finally agree; and we have been resisting this on the House side. But if we agree, it will cost us \$7 billion or \$8 billion more in order to lease them rather than buy them. So we have put ourselves in a dilemma.

I realize the Speaker and the President have made an agreement, and I would hope at some point we can convince them. I worry that last year, the supplemental, we kept thinking it was going to be up here, we kept urging him to bring it up. We all called for him to send the supplemental up, and they waited forever. I would hope they would get a supplemental to us as soon as possible, because we only have like 12 legislative days from January to the end of March. So we really are in a box in the sense that while the war is going on, unless they send a supplemental up that we can act on, we will have them doing the same thing they did last year, reaching into other processes in order to get the money.

So we have some real problems here that we have to solve. I know the reason that the gentleman from California (Chairman LEWIS) decided that he could not support extra money is because when the President said he is going to veto the bill, he would veto the bill. I know that is a problem. We have this artificial ceiling we have to deal with, but I hope at some point we can convince the President and the Speaker that we really do have a problem here.

Mr. LEWIS of California. Mr. Speaker, will the gentleman yield?

Mr. MURTHA. I yield to the gentleman from California.

□ 1645

Mr. LEWIS of California. Mr. Speaker, I appreciate the gentleman yielding.

Mr. Speaker, I have been concerned about our crossing that line of the agreement, because it conceivably could lead to a veto, but I think the gentleman's motion today is very helpful in connection with that, because it, indeed, is very possible that the other body will come in with a lot less in that package than we have, and if there is a statement here that suggests that we really know what we would prefer to have move, that may very well cause the administration to bring us back for a supplemental much earlier. So I feel very comfortable with this discussion and I hope we go forward positively.

Mr. MURTHA. Mr. Speaker, reclaiming my time, I just hope that when Members vote on this, they will understand that we need more money in homeland security. We need to speed up the process of getting teams to combat biological and chemical warfare out; we need money for the borders; but we also need money for operational money and the war. I know we will take care of the immediate needs, but I worry about the supplemental, and I hope we are putting the executive branch on notice that they need to send us a supplemental as soon as possible, that they do not wait around and let those experts at OMB decide when the supplemental is sent up.

So I would just urge the Members to vote for this motion and, hopefully, in the subcommittee, we will be able to work the best we can under the artificial limitations we have, and then they will understand that we need more money and get the supplemental up as quickly as possible.

Mr. YOUNG of Florida. Mr. Speaker, I yield myself 1 minute.

I rise to agree with the gentleman from Pennsylvania (Mr. MURTHA). He is one of the best national defense experts that I know anywhere in the House or the Senate, or at the Pentagon, as a matter of fact. He is right. He mentioned the tankers. There is no doubt that our tankers have been worn out.

Our AWACS, we actually have foreign AWACS flying around the United States protecting our major cities. There is no doubt we have a lot of needs.

But I also agree with the gentleman that we should have a supplemental as early as we possibly can. He mentioned how slow the administration was last spring getting us a supplemental and, again, he was right. But that was pre-war. When that supplemental came down, it was before September 11. After September 11, we took up the emergency supplemental, passed it in the House, the Senate, and conferenced it all on the same day. So we can move quickly when the security of our Nation is at risk.

Mr. Speaker, I reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Texas (Mr. EDWARDS).

Mr. EDWARDS. Mr. Speaker, nuclear terrorism is a serious threat to our Nation and our families, but this Congress is not acting like it. Inexplicably, in the waning hours of this session of Congress, we will have spent less on nuclear nonproliferation this year than we did last year.

Considering the consequences of September 11, considering all that we have learned in recent weeks since then about even al Qaeda trying to get its hands on nuclear materials which could, in effect, kill millions of American citizens in one nuclear incident, I just cannot understand how we can go back home to our constituents and say we should be spending less to protect them from the potential holocaust of nuclear terrorists.

President Bush recently said that preventing nuclear terrorism should be a top national priority. I agree. The President is right. I think today it is time we start following through on that belief.

We have had enough rhetoric about dealing with nuclear terrorists. Tonight, in this Obey motion, we need to actually take concrete action to prevent it. We must decide whether we just want to talk about stopping nuclear terrorists or really want to prevent them. I believe we have an obligation to our constituents and families and, yes, even our children and grandchildren to do everything possible now, not next year, not the year after, to do something now to stop a nuclear holocaust in our country.

How serious is this threat? Well, this year, former Senator Sam Nunn and Howard Baker, a Democrat and a Republican together, after a year-and-a-half study concluded, and I quote, that "Nuclear terrorism is the most urgent unmet national security threat to the United States."

In my opinion, as of this moment, this Congress has failed in our serious responsibility to the American people

to take responsible, effective, proven steps to keep nuclear materials away from terrorists.

Nobody in this House or this country would intend to help nuclear terrorists, but I would suggest that we have to do more than just talk against them; we have to fund the programs that help protect nuclear materials from these kinds of people.

The Obey motion that we will vote on in just a few moments will add over \$220 million to proven, effective programs that our Department of Energy has carried out in Russia to protect Americans from nuclear holocaust.

The question of timing has been raised. Well, let us just wait until next year. The President will have a proposal, let us fund it then. If that is what happens, I hope and pray that that will be soon enough. But taking action next year will not do Americans and future generations any good if grapefruit size of nuclear material needed to kill 2 million Americans is stolen next month or in the next several months. We must support this Obey motion.

Mr. YOUNG of Florida. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. WALSH), a subcommittee chairman on the Committee on Appropriations.

Mr. WALSH. Mr. Speaker, I thank the gentleman for yielding me time.

This discussion is a bit difficult to follow. The gentleman from Wisconsin (Mr. OBEY), the leader of the minority on this issue, offers a motion to instruct. Our chairman, the leader of the majority on this issue, accepts. But what does this really mean? Well, I would submit that it means nothing, because we are not instructing the Senate; the Senate is instructed by the Senators. We are instructing the House conferees. Since there is no controversy over the defense bill, the only thing we are instructing the conferees on is the supplemental.

Now, who are the conferees? Well, they just happen to be all here today at the same time in the same room: the gentleman from Wisconsin (Mr. OBEY), the gentleman from California (Mr. LEWIS), and the gentleman from Florida (Mr. YOUNG.) They know how they are going to vote, clearly. So who are we really instructing? What is this exercise all about? Polemics? Politics? I am not sure.

The fact is, the President has made the point over and over again. The supplemental will not go over \$20 billion. It took me a while to figure that out. I offered an amendment in the Committee on Appropriations to add money to this. We lost the amendment. The House decided not to go over \$20 billion, and we did not. The Senate, reacting to what the House did and what the President said that he would do, also did not go over the \$20 million. I submit to my colleagues, Mr. Speaker,

that the conference will not go over \$20 billion either.

Now, there are a couple of problems with what has not happened. We have not helped workers with unemployment insurance benefits or their health benefits. If the Senate majority leader, Mr. DASCHLE, would stop obstructing the stimulus package and let that bill go forward, we could deal with the really vital issues that need to be dealt with in this bill.

So, Mr. Speaker, I would submit that we need to move forward on this bill and we need to have this conference and we need to get these expenditures resolved quickly.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. THORNBERRY). The Chair will remind all Members not to urge Senate action or inaction on any matter.

Mr. OBEY. Mr. Speaker, I yield myself 30 seconds.

Mr. Speaker, the gentleman asked what this is about. It is very simple. What this is about is the fact that thousands of Americans died 3 months ago because the country was hit by terrorists in an unexpected way. What this is about is trying to see to it that that does not happen again. That is what this is about.

Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Washington (Mr. DICKS).

Mr. DICKS. Mr. Speaker, I want to rise in very strong support of this motion. As I understand it, we would go to the higher levels and, in that case for defense, it would be additional; we would go back to the \$7 billion that was in the House bill.

In my judgment, we desperately need that money for defense and national security. One of the things that came out at our hearings this year, led by the gentleman from California (Mr. LEWIS) and the gentleman from Pennsylvania (Mr. MURTHA), is that each of the services told us that they were somewhere between \$10 billion and \$12 billion short on money for procurement of new weapons systems to recapitalize our force. This is something that I am very concerned about, because in each of these wars that we have had, Desert Storm, Desert Shield and Kosovo, now Afghanistan, we have heavily used this equipment. It is getting older. It is going to have to be replaced.

Unfortunately, one area where the Clinton administration did not do enough and, in fact, the Bush administration is a little below them this year in the 2002 budget on procurement, is in the area of buying new weapon systems. The CNO of the Navy testified that in order to maintain a 300-ship Navy, he has to buy 10 ships a year. The budget only allows him 5. In order to maintain and reduce the age of the aircraft, the attackers coming off those carriers that we see operating and flying into Afghanistan, he has to acquire

180 to 210 planes a year. He is only able to buy 81.

So if we continue to reduce the money in this supplemental for defense, we are going to have problems equipping the force and doing the things that are essential.

I just hope that this Congress can work with this President and, during this war, add the additional money that is necessary to recapitalize our forces. I think it is the number one defense priority. We are doing a good job on readiness. We are helping our troops with adequate pay increases and health care, but what we really are failing to do is to get the new equipment that they will be using. I worry, as we saw one of the B-1s lost today, and we are pleased to hear that the pilots were able to bail out and I think are safe, hopefully. But it is that kind of problem that will occur if we do not do a better job of modernizing and, therefore, I hope we can save this \$5 billion, and I support the Obey motion.

Mr. YOUNG of Florida. Mr. Speaker, I yield 3 minutes to the gentleman from California (Mr. CUNNINGHAM), a member of the Subcommittee on Defense of the Committee on Appropriations.

Mr. CUNNINGHAM. Mr. Speaker, I have stated in the well before that the two committees which are the best to serve on is the Subcommittee on Defense of the Committee on Appropriations, and when I served on the Authorization Committee with the gentleman from Missouri (Mr. SKELTON) and the gentleman from California (Mr. HUNTER) and those guys, but also the Permanent Select Committee on Intelligence. The gentleman from Wisconsin (Mr. OBEY) and the gentleman from Pennsylvania (Mr. MURTHA) and the gentleman from Washington (Mr. DICKS) know that yes, we need funds. We need them desperately, not just for our forces, but we need them for homeland defense also.

My point is, why are we here in this position? Why are we here today asking for more and more money? Eight years of the Clinton administration and 124 deployments has nearly devastated our military. The cruise missiles, we do not have JDAM kits for precision-guided weapons today. We have 37 ships tied up that we cannot repair with deferred maintenance.

Mr. Speaker, 124 deployments. Look at Haiti. Most people have seen Blackhawk Down. We got our rear-ends kicked out of there and we lost 19 rangers in the process. We got our rear-ends kicked out of Somalia, 5 times in Iraq, bombing an aspirin factory in the Sudan. All of these different deployments put us over \$200 billion in debt for defense. And guess what? At the same time we deployed in defense, our national security forces, our CIA, our FBI, they also have not been able to modernize. Those accounts are deficits. Those accounts are low.

Now, we find ourselves not only in a war in Afghanistan, but here in the home front. We cannot make up \$200 billion plus like this. Now we are asking to go \$5 billion above the \$20 billion, and then another \$20 billion. That is no small change. And to do that, yes, we have a bill coming up before long that is called Medicare. We have a bill coming up called Social Security and the Social Security Trust Fund.

□ 1700

We are going to want money there. But we cannot keep deficit spending on all of these; and yes, there are priorities. The condition we are in right now of having to build ourselves out of this hole is going to take a while. We cannot spend all this money; we cannot spend \$20 billion, in 3 months. We will spend it as we need it, and with the supplemental coming down the line.

If we try to do it now, we have all this money; and a lot of it is going to go where the gentleman and I do not want it to go.

Mr. DICKS. Mr. Speaker, if the gentleman will yield further, the gentleman would not argue that we are not short of the procurement dollars that are needed to modernize the forces, would he? Would the gentleman not agree with that?

Mr. CUNNINGHAM. Mr. Speaker, I think that is exactly what I said. But the reason we got here is because 124 deployments in the last years of the Clinton administration have nearly destroyed our military, and we cannot bail ourselves out of it.

Mr. YOUNG of Florida. Mr. Speaker, I reserve the balance of my time.

Mr. OBEY. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Massachusetts (Mr. FRANK).

Mr. FRANK. Mr. Speaker, there are several oddities being announced today. One is that when we know we are going to need more money, we should not, in the basic budget bill, vote all that we are going to need, but we should hold some back for a supplemental.

I had thought the purpose was, when we were pretty sure we were going to need money, to vote that at the outset so there could be intelligent planning on the part of those receiving it, and reserve a supplemental for something unexpected. We are told here, yes, you are right, we need this money; but let us not do it in the overall budget bill. Let us wait for a supplemental. Why? Because the President does not want it.

That is really quite striking. That is the second interesting constitutional point. The gentleman from Florida (Mr. YOUNG) said the President leads and we support. In terms of the deployment of troops and the command in the field, of course that is the case. But in terms of allocation of resources, this is a very odd constitutional theory, that

it is somehow inappropriate for Congress to say to the President, we think you need more money. It is a good thing Harry Truman did not believe that during World War II when he did such a good job of oversight.

Apparently, there is this new theory that once the President says something, that is it, that our job is simply to do what he wants. Pretty soon, under that theory, the only place we are going to find checks and balances around here is in the Members' bank accounts, because we have this view that says that whatever the President wants we have to accept.

By the way, there is reason to question the President's judgment. I know that is considered now to be, by John Ashcroft, somewhat treasonous, but the fact is, the President's judgment seems to be flawed.

All last year, I heard Candidate Bush and Candidate Cheney talk about how weak and pitiful the American military had been. We heard again from the gentleman from California that the American military had been reduced to a state of pitiful decrepitude.

So I have a question: Where did that wonderful military come from that just did such a magnificent job in Afghanistan, while it was simultaneously maintaining forces in Korea, in the former Yugoslavia, and continuing to bomb Iraq? In fact, the denigration of the military, which was the theme song of the Republican ticket last year, has just been very effectively refuted by the wonderful performance of that military in Afghanistan.

Now having performed that way, there is a need to replenish. Apparently, what we are told is yes, we do need to replenish them, we know that, it is foreseeable; but let us not do it in the basic budget bill because the President does not want us to, because Mitch Daniels will yell at him; and, therefore, let us do a supplemental.

It is not a sensible way to budget; it is not a sensible way to conduct legislative affairs; and it is not a sensible way, in my judgment, to try and spend money efficiently. If we think the military is going to need more money, let them have it at the outset. Let us do homeland security at the outset.

The supplemental is meant to be a way of taking care of unanticipated needs; it is not supposed to be a way to show congressional submission to an all-powerful executive which feels it would be inconvenient to spend now what it knows it is going to have to spend.

I hope that the resolution is adopted, and that it is in fact conscientiously carried out by those who vote for it.

Mr. YOUNG of Florida. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, I do not think we are as far apart on this as it seems. We all understand what the requirements are. Mainly, we are talking about timing.

What I suggest is we get about this conference report and bring it back to the floor so that the House can complete it on next week. The gentleman from California (Mr. LEWIS), as chairman of the subcommittee, and the gentleman from Pennsylvania (Mr. MURTHA), as the ranking member, have done an outstanding job in preparing an excellent bill.

Are there other requirements? Absolutely. I can tell the Members, we talked about the tankers, wearing out that fleet; we talked about the AWACs. An awful lot of our combat aircraft are in the hangars being used as a source of spare parts. Because of all the deployments that the gentleman from California (Mr. CUNNINGHAM) mentioned, we are in fact wearing out much of the equipment of our military.

On the other hand, the bill that we are debating today is \$317 billion. That is a lot of money. We have said that when additional money is needed over and above that, we are going to make it available. Who better knows than the Commander in Chief of the Armed Forces what they need to conduct the war in Afghanistan, or wherever that war might take us, to eliminate the threat of terrorism, to disrupt the ability of terrorist organizations to threaten the United States of America?

Mr. Speaker, I would just suggest to my friend, the gentleman from Wisconsin (Mr. OBEY), and I complimented the gentleman from California (Chairman LEWIS) and the gentleman from Pennsylvania (Mr. MURTHA), and I would not only compliment but thank the gentleman from Wisconsin for how we have worked together on all of our bills. We have worked together extremely well. We have worked together very well on this bill.

The gentleman from Wisconsin and I made a strong presentation to the President. The President made a final decision, as Commander in Chief; and that is the decision that we are working with today.

So now we are at the point where the gentleman from Wisconsin (Mr. OBEY) has made a motion to instruct the conferees. I have already said that we are going to accept that motion, so I just ask the gentleman from Wisconsin (Mr. OBEY) to take "yes" for an answer.

Mr. Speaker, I yield back the balance of my time.

Mr. OBEY. Mr. Speaker, I yield myself the balance of my time.

Mr. Speaker, the question before us is very simple: What is more important, to adhere to an artificially imposed \$20 billion spending ceiling on national security-related items, or to do what we think is necessary today to deal with our vulnerabilities?

We are told by the majority Members, wait until next year. In my view, that is a slogan more befitting a Chicago Cubs fan than it is a Member of Congress.

If we take a look at what my good friend, the gentleman from California (Mr. CUNNINGHAM), has said, he said that we have urgent military needs; yet we are being told that those needs have to be sacrificed to that \$20 billion ceiling that we supposedly agreed to.

There is no such ceiling. That ceiling is a fiction. When we agreed to supplemental funding requests after the events of September 11, we all agreed, and the President, the gentleman from Florida (Mr. YOUNG), and I are all on record publicly as admitting that that was simply a downpayment. It was not a final ceiling; it was a downpayment on meeting future needs. The needs are obvious. Members on both sides of the aisle know it.

We are told we are supposed to wait. We are told that this money cannot be used now. Not true. We can hire more border guards now. We have had over 600 of them already cleared by the agency. They are just waiting to get the authority and the money to hire them.

We can give the FBI a modern computer system now. Right now they have computers that cannot even do pictures. If they want to send a picture of a suspected criminal from one station to another across the country, at least one-third of their computers do not have the capacity to do that. And we are asked to wait? Give me a break.

We can improve the percentage of imported food that is inspected at our borders now. Only 1 percent is inspected right now. Yet we are told that somehow, rather than doing these things, we have to adhere to this \$20 billion agreement. The fact is very simple: to wait is to play Russian roulette with the safety of every American.

Make no mistake about it, a great effort has been made here today to imply that Members can vote for this motion and still vote to keep the \$20 billion ceiling. Members cannot. This motion specifically instructs the conferees to accept the higher dollar amount contained in the House bill for defense funding in the supplemental. It instructs the conferees to accept the higher dollar amount for assistance to New York, which is only half of that which was originally committed by the President, and it requires the conferees to accept the higher Senate amount for homeland security.

That means that if the conferees do that, they will be required to bring back to this floor a bill which contains more than \$5.3 billion in additional security spending above the level that would be imposed by that \$20 billion artificial ceiling. Mr. Speaker, they cannot vote for this motion and then claim to be consistent with it if they bring back a bill which falls short of that \$5.3 billion add-on.

The American public wants these expenditures, the vast majority of Members want these expenditures, and the

only reason the gentleman from Florida (Mr. YOUNG) has accepted it while at the same time trying to pretend that he can still stay within that \$20 billion ceiling is because he knows that his leadership could not win a vote against this motion if they took it on. That is because most Members of Congress recognize this funding is necessary, and so do most members of the American body politic.

Mr. Speaker, this Congress did not say, Wait until next year, before it decided to give \$24 billion in 15-year retroactive tax breaks to some of the biggest companies in this country. It did not say, Wait until next year, to the people who were given multi-billion dollar tax breaks on the estate tax. But when it comes to providing more help for the FBI, more help for the Customs people, more help for our other security agencies, we are now told, Wait until next year.

Let us do it now. Vote for this motion to instruct and mean it.

Mrs. LOWEY. Mr. Speaker, I rise in strong support of this motion to instruct.

In the three months since terrorists attacked America, Congress and the American people have been called upon to make extraordinary commitments.

Our men and women in uniform are risking their lives, helping to liberate Afghanistan from the grip of al-Qaida and and root out terrorists. Ordinary citizens are making sacrifices, volunteering their time and money to help victims of terrorism. And, in the days immediately following the September 11th attacks, Congress took unprecedented action to do its part—providing \$40 billion in emergency funding to help the rescue and recovery effort, enhance our military might, and ensure the safety and security of all Americans.

Despite our best intentions, what we provided was not enough. And we know we can do better. We must do right by our military, we must do right by the American people, and we must do right by the people of New York.

In the wake of September 11th, the President made a promise to provide whatever it took to rebuild New York. And Congress made that promise law, setting aside \$20 of the \$40 billion in emergency funding for relief and reconstruction. But neither the Senate nor the House bill fulfills this promise.

The devastation in New York is not just at Ground Zero, where teams are working around the clock to recover bodies and clear away the rubble. Widows need health insurance. Laid off workers—who were just getting by—need extended unemployment benefits. Residents need checks to cover security deposits in temporary homes, and to repair their apartments. Small businesses need grants to stay solvent.

And it is not just New York that is hurting. The American people have become victims of the fear and uncertainty that terrorism breeds. And, while investments in homeland security will not allay all the fears—they will go a long way to keep our communities safe. Safe from threats to our postal system and our food and water supply. Safe from threats to our ports, borders, and our schools. It is our responsi-

bility to invest in safety both at home and abroad—providing adequate funds to ensure the superiority of our military and the security of our citizens.

It is simply wrong to force the American people to choose between homeland security and a strong national defense. And it is wrong to force us to choose between either of these and cleaning up New York.

\$40 billion will not be enough to meet all of our commitments, but we have been blocked from increasing this amount before the end of the year. I urge our conferees to maximize our investment in all of these priorities, and I hope Congress will return in January ready to do our job—to commit whatever it takes to rebuild New York, win the war against terrorism, and keep America safe.

The SPEAKER pro tempore (Mr. THORNBERRY). All time has expired.

Without objection, the previous question is ordered on the motion to instruct.

There was no objection.

The SPEAKER pro tempore. The question is on the motion to instruct offered by the gentleman from Wisconsin (Mr. OBEY).

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. OBEY. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

This 15-minute vote will be followed by a 5-minute vote on the motion to close the conference.

The vote was taken by electronic device, and there were—yeas 370, nays 44, not voting 19, as follows:

So the motion was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

FURTHER MESSAGE FROM THE SENATE

A message from the Senate by Mr. Monahan, one of its clerks, announced that the Senate has passed without amendment a bill of the House of the following title:

H.R. 3323. An act to ensure that covered entities comply with the standards for electronic health care transactions and code sets adopted under part C of title XI of the Social Security Act, and for other purposes.

The message also announced that the Senate has passed bills of the following titles in which the concurrence of the House is requested:

S. 1729. An act to provide assistance with respect to the mental health needs of individuals affected by the terrorist attacks of September 11, 2001.

S. 1789. An act to amend the Federal Food, Drug, and Cosmetic Act to improve the safety and efficacy of pharmaceuticals for children.

DIFFERENCES WITH THE OTHER BODY

(Mr. KINGSTON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous material.)

Mr. KINGSTON. Mr. Speaker, the House this year has had a very, very

productive year. We have passed a good education bill, we have passed a faith-based initiative bill, we have passed an energy package; and, of course, we have passed an economic stimulus bill.

A funny thing has happened, though, on the way to the President's desk. It is called the United States other body, whose leader said, and I quote, or this is what has been said by that leader: "The economic stimulus issue is not a front-burner issue. Other legislation, particularly government spending, is more important."

That is a defining difference between the Republican House and the Democrat Senate. We believe people who are out of work, businesses that are cut-

ting back, the economy that is going sluggish should be a front-burner issue. Unfortunately, the United States other body thinks it is no big deal, and that passing spending bills is more important.

But how are they doing on passing other spending? Here is what we have done on the House side. We have passed the energy bill, the economic stimulus, faith-based, the farm bill, trade promotion, antiterrorism and human cloning.

Where is the Senate? Nowhere. Maybe Mr. JEFFORDS needs to reexamine.

ANNOUNCING INTRODUCTION OF WORKER OPPORTUNITY AND RELIEF COMPENSATION ACT

(Mr. MOORE asked and was given permission to address the House for 1 minute and include extraneous material.)

Mr. MOORE. Mr. Speaker, on September 11, the people in the Congress came together with the President and all the American people as a result of the tragedy on September 11 in New York and Washington. I think we need to show that same spirit again when we come together for displaced workers in this country.

The people in this country who lost their jobs as a result of the faltering economy or the horrible event on September 11 do not need a handout. They do not need a tax cut. They need a helping hand just to get through this personal crisis they have suffered as a result of their loss of jobs until they can find a new job. These people are taxpayers and they will work again when they have the opportunity. But until that time, they need health insurance and they need extended unemployment benefits.

I am concerned that the latest press accounts reflect there may be some problem with the stimulus package. If that is the case, we need at the very least to pass a stand-alone provision for these displaced workers. The President has committed to support such a stand-alone provision.

I have introduced today the Worker Opportunity and Relief Compensation

Act. I ask for your support for that legislation.

Mr. Speaker, I include a December 7 letter from the President as follows:

THE WHITE HOUSE,
Washington, December 7, 2001.

Hon. DENNIS MOORE,
House of Representatives, Washington, DC.

DEAR REPRESENTATIVE MOORE: In October, I called on Congress to pass meaningful legislation to help Americans who have been affected by the economic consequences of the terrorist attacks. I called for immediate assistance for workers who have lost their jobs, and for tax provisions that would immediately and significantly stimulate the economy to create more jobs.

I made clear that I was open to good ideas for achieving these goals. And I laid out some general principles that are essential components of a meaningful stimulus package:

Tax rebates for lower-income Americans; Acceleration of marginal tax rate reductions; Enhanced expensing of capital expenditures; and Elimination of the corporate alternative minimum tax.

In the two months since I called on Congress to act, many promising ideas to assist workers have been put forward by both Democrats and Republicans. In November, Chairman Baucus proposed temporary expansions of health care and unemployment benefits for displaced workers. A bipartisan group of moderate Senators also developed a specific proposal for temporary assistance to workers, including a health insurance tax credit. This week, Chairman Thomas and the Republican leadership of the House announced their support for a specific set of temporary expansions of health care and unemployment benefits for displaced workers. Their proposal includes tax credits and mandatory spending, including block grants for

health insurance, and extensions and increases in unemployment benefits that could all be implemented quickly.

I believe that the recent proposal from the House Republicans, coupled with the essential components of an economic stimulus bill that I have outlined above, can form the basis of a legislative package that provides the assistance and new jobs that American workers need now. I urge the Congressional Leadership to bring this legislation expanding unemployment and health benefits to my desk by the end of the year. Additionally, I urge Congress to send me legislation regardless of the success or failure of any other elements of the economic stimulus measures now pending. I continue to strongly believe that the best course is to combine assistance for dislocated workers with meaningful tax cuts that will create jobs for American workers.

My Administration stands ready to work with Democrats and Republicans to turn good ideas into law. We have an extraordinary opportunity to rise to the challenge of extraordinary economic times. I hope that Congress can now act quickly.

Sincerely,

GEORGE W. BUSH.

SPECIAL ORDERS

The SPEAKER pro tempore (Mr. THORNBERRY). Under the Speaker's announced policy of January 3, 2001, and under a previous order of the House, the following Members will be recognized for 5 minutes each.

NATIONAL CALL TO SERVICE ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Nebraska (Mr. OSBORNE) is recognized for 5 minutes.

Mr. OSBORNE. Mr. Speaker, today the gentleman from Tennessee (Mr. FORD) and I introduced a bill called the National Call to Service Act. All of us are very aware of what happened on September 11; and as terrible as that day was and those events were, we have also seen some very positive things that have happened since.

We have seen the resurgence in patriotism. We have seen people who are more cordial and certainly have a greater desire to serve the country. In an attempt to harness this energy, the Call to Service Act would enlist 250,000 people, young people and old people alike, to serve our country. There are three aspects I would like to touch on very briefly here today.

First of all, rural and underserved areas often do not get much mention in a bill of this type. However, the National Call to Service Act does make sure that all areas of the country, particularly rural areas, are recognized. One example of this would be the teacher corps which would provide educational awards to attract and keep teachers in rural areas where it is very difficult to attract and keep teachers in such underserved areas. Another example would be public health programs where again rural areas are often neglected and underserved.

The second area of the National Call to Service Act I would like to call attention to is homeland defense. We have many young people who would like to serve the country, but yet do not want to go into full-time military service. This bill would provide young people with an opportunity to serve 18 months of active duty and then 18 months in a reserve status. In return, they get an educational award at the end of their service.

These young people would be used to guard vulnerable areas such as buildings, bridges, nuclear plants, airports and our borders. Also in the event of a national catastrophe involving bioterrorism, we need a great many people who could provide technical assistance in case of a health emergency.

Thirdly, one of our greatest resources in this country at the present time that I believe is greatly underutilized is our senior citizens. We currently have a great number of children who lack a caring adult in their life. They have no role model. We have 18 million fatherless children in the United States today. Roughly one-half of our young people growing up in this country are growing up without both biological parents. Seniors can certainly fill this gap. They can serve as tutors and mentors for these young people. It has been very well established that a good mentoring program can reduce absenteeism

from school by 50 percent, can reduce drug abuse by 50 percent, can reduce teenage pregnancy, violence and dropout rates significantly.

We think that by utilizing our seniors more effectively, we can serve the country well, and particularly the youth of our Nation.

Mr. Speaker, at this time I yield to the gentleman from Tennessee (Mr. FORD), and he will discuss other aspects of the Call to Service Act.

Mr. FORD. Mr. Speaker, I thank the gentleman from Nebraska (Mr. OSBORNE) for yielding; and I come from a State with a good football team, but I am delighted that the greatest mind, at least in my era of following college sports, would see fit to allow a young Member like me to partner with him to do something that in the long run will benefit young people for many, many years to come.

It is difficult to expand on what the gentleman from Nebraska has already said, but this bill gives my generation an opportunity to do something that we have not been able to do. For so long we have been reduced in a lot of ways, and some of us have chosen, to be spectators to conflict involving challenges to our values and freedoms. We are hopeful with our friends on the other side of the aisle and this bill's companion, S. 1792, which was introduced yesterday by Senators MCCAIN and BAYH, we are hopeful that this legislation will attract the support of Democrats and Republicans alike in both Chambers.

Mr. Speaker, the district of the gentleman from Nebraska (Mr. OSBORNE) and my district could not be any more different than they are. He is from a rural area in Nebraska; I am from an urban area in Memphis, Tennessee. We are hopeful that regardless of who Americans are, where they live, or how they may identify themselves politically, this bill will attract the support of all of our colleagues, largely because it invites involvement.

The gentleman from Nebraska (Mr. OSBORNE) spoke about the need for this and how critical it is; but just to give more specifics, the purpose of the bill is to basically expand the AmeriCorps program. We propose a fivefold expansion of the traditional program, including new opportunities, as has already been mentioned, for senior service, work study and homeland defense. Specifically, over half of the program's expansion would be used to augment homeland defense in the areas of law enforcement and public health. Additionally, the legislation would provide new options for military enlistment, including expansion of the Montgomery GI bill and the establishment of a new 18-18-18 short-term enlistment option.

These provisions acknowledge that the GI bill has not kept pace with inflation, and a growing shortage exists

for entry-level service needs. The short-term option would qualify E1 level recruits for an \$18,000 education bonus after service of 18 months of active duty and 18 months of reserve duty.

Finally, in an ongoing effort to enhance national service, the bill also sets accountability standards and provides for a new demonstration choice voucher plan, not the voucher plan that my colleagues often think about, but a voucher plan providing grants for young people to apply in areas of public service.

We believe the Call to Service Act presents an immeasurable opportunity to seize on those attributes that define us as Americans and make us proud to serve in this country.

Mr. Speaker, I thank my colleague for yielding me this time and both Senators for their support; and I hope that all of our colleagues will see fit to support this important legislation.

COMMENDING MAJORITY LEADER DICK ARMEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. DELAY) is recognized for 5 minutes.

Mr. DELAY. Mr. Speaker, I want to take a few minutes to talk about a real stalwart in this House, and to thank the gentleman from Texas (Mr. ARMEY) for his hard work and to remind our Members about what his leadership and effectiveness have meant to the success of our majority.

When DICK ARMEY first got to Washington, they said his ideas were out of step; but now America has caught up to Dick Armey. He stood firm against communism, and the Iron Curtain failed. He insisted that the welfare system was broken, and millions of Americans are now earning paychecks and have greater self-worth because they have entered the workplace. He took on a tough job of realigning our military base structure and our Armed Forces are more effective today because their bases better support their new mission.

□ 1800

DICK ARMEY said repeatedly that punishing success was not part of the American dream. And he helped Presidents Reagan and Bush pass pro-growth tax cuts that raised our economic security. Many Americans now understand that a rising economic tide lifts all boats because DICK ARMEY explained it to them.

He reminded us that God is a part of all of our lives and millions of people now question why God has been driven out of our national lives. He fought laws that would have weakened our Constitution, and America remains the freest and most secure country in the world. He said that red tape and

unnneeded regulations were stifling growth and shortchanging job creation and now, despite the blow from September 11, our American economy is the healthiest, most vibrant and most productive in the world.

He knew that if Republicans clearly explained our goals as the majority party, we would earn broad support from the American people, and the Contract With America helped build the first Republican majority in four decades.

He arrives and departs Washington as fundamentally the same man that stood next to me to take his oath of office in 1985, but the Washington he will leave behind in 2003 is a very, very different place. He is just an ordinary man with extraordinary ideas that helped change America.

Since Republicans earned our House majority, the Federal Government has grown leaner, more efficient and more responsive to individual citizens. These changes happened because people like DICK ARMEY knew we could expect more from our government and they insisted that we do better. Our Republican majority has accomplished great things together, and our Nation is stronger, freer, and enjoys the highest living standards in the world.

Several broad principles guided our efforts: We believed that freedom is not free. We worked to ensure that our Armed Forces and the agencies protecting America had all the tools necessary to defend our country. We believed that government answers to the people. We worked to make the Federal Government more responsive, more efficient and more effective in performing its work. We believed that families are entitled to keep more of what they earn. We worked to be careful stewards of their tax dollars and insisted that every dollar was spent as wisely and effectively as it could be.

So, Mr. Speaker, let me say to DICK ARMEY, thank you, DICK, very much, for everything you have done to keep America strong and free. You can be truly proud of what the House has achieved under your leadership. There is no doubt that we will continue improving our Nation over the course of your final year. We must treasure and build upon our gift from previous generations. They left us a great country with a big heart, broad shoulders and the courage to chase hundreds of millions of dreams.

Today, the beacon of freedom is burning brightly. We need to stoke the flame, lift the lantern higher and lead freedom-loving people onward to a better and more fulfilling life.

I want to extend DICK ARMEY my deep thanks for everything he has done to make that happen. Finally, Mr. Speaker, let me offer a special thank you to Susan Armeay for allowing America to borrow her husband all these years. Our country is a better

place because of the sacrifices she and her family have made.

INTERNATIONAL CONTRIBUTIONS TO THE WAR ON TERRORISM

The SPEAKER pro tempore (Mr. OSBORNE). Under a previous order of the House, the gentleman from Missouri (Mr. SKELTON) is recognized for 5 minutes.

Mr. SKELTON. Mr. Speaker, in the aftermath of the devastating attacks on New York and Washington on September 11, the United States has taken a range of swift and decisive actions to bring the terrorists responsible to justice and to ensure that sponsors of terrorism are uprooted. Our military has helped drive the Taliban from power in most of Afghanistan and has tightened the noose on Osama bin Laden and his compatriots. We have seized terrorist assets around the world, putting those who would help terrorists on notice that we will dry up those sources of support.

In our military, diplomatic and financial efforts, the United States has received unprecedented support from the international community. Many countries around the world have converted their sympathy into real acts of solidarity. Our battle against terrorism is a global fight. Success requires sustaining a broad coalition of diplomatic and military partners over the long term.

Recently, the State and Defense Departments provided me with a list of 29 countries plus the European Union who have contributed to our current counterterrorist efforts. While each country is helping in specific ways, they all are making a difference in our ability to thwart the global threat posed by terrorist groups like al Qaeda.

Our allies in Europe are among our most committed partners. NATO took the unprecedented step of invoking article 5 of its charter, considering the attacks on the United States as attacks on the alliance as a whole. The European Union has offered broad diplomatic support and nations throughout Europe, from France and Germany to Poland, have offered military and domestic counterterrorism units. Unique among these loyal European partners is Great Britain who has stood with us diplomatically and fought alongside us in Afghanistan. The depth of this special friendship is one for which we should be profoundly grateful.

Beyond our European partners, our allies in Asia—Korea, Japan, Australia and New Zealand—have all provided combat or support forces for this fight. Our relationships with Russia and with India have improved greatly because of our common struggle against terrorism and their continued efforts to support us.

Finally, I would like to note the remarkable actions of Muslim countries

in this global struggle. So many are our friends and recognize that the war against terrorism is not a war against Islam. Pakistan has been crucial to our efforts in Afghanistan and has demonstrated great courage in helping lead the struggle against radical terrorism. Our NATO partner, Turkey, has provided special operations troops and has helped bridge the gap between the West and other Muslim nations. States in the Gulf and throughout Central Asia have also chosen to stand with the global community, seizing terrorist assets, providing public support for our military efforts and granting critical overflight and basing rights.

As President Bush has said many times, this war will be a long and multifaceted one. To succeed, we will need the continued strength and commitment of the American people, but we will also need the ongoing support of our friends around the world. It is in the global interest to end terrorist activity and it will take global efforts to achieve this goal.

EXPRESSING THANKS TO JOAN BATES KORICH ON THE AN- NOUNCEMENT OF HER RETIRE- MENT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. ROYCE) is recognized for 5 minutes.

Mr. ROYCE. Mr. Speaker, as Members of Congress, we all receive numerous honors every year. But having someone named after you is truly a special honor. There is a young boy named Eric Royce Bates out in California. What makes it so special is that his grandmother is my chief of staff, Joan Bates Korich, who has announced her retirement. Joni has worked for me for 19 years, starting in the California State Senate in 1982. I came to Sacramento as a young State Senator at the age of 31. I knew what I believed and I knew what my goals were. What I did not know was how to go about accomplishing those goals.

That is where Joni came in. She helped me learn how to turn ideas into accomplishments. She taught me that friendships can transcend politics and that just because you may disagree with someone, that that does not make them your enemy. She is the ultimate professional who takes her work seriously but never loses her sense of humor.

Thanks to Joni's leadership, our office is known for civility and professionalism. Our constituents in California have benefited tremendously from the unique care and interest she has demonstrated over the years. She has also proven time and time again how much she cares about every member of our staff. To this day, interns and young staff members who worked with us in Sacramento many years ago

still call Joni to ask for advice, or just to tell her how their family is doing.

I still do not know how I managed to convince her and her husband Kim to leave her children and grandchildren and come with me to Washington when I was elected to Congress in 1992, but whatever I said, it was one of the best speeches I ever made.

In just over a month, Joni will return to her home in Sacramento and to her three children and eight grandchildren, including Eric Royce Bates. For Joni, there is nothing more important than family. I just consider myself fortunate to have been part of her extended family for the past 19 years. I will miss her very much as will every member of my staff.

Thank you, Joni, for all you did for me. You will be 3,000 miles away, but you will never be forgotten by me or by anyone who has had the good fortune to work with you.

MAJORITY LEADER ARMEY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. TIAHRT) is recognized for 5 minutes.

Mr. TIAHRT. Mr. Speaker, today Majority Leader DICK ARMEY announced that he would not run for reelection. I received this news with mixed emotions.

First, I am very happy for DICK ARMEY because he is moving to the next phase of his life where he will continue to pursue his dreams. This morning he fondly spoke of his wife Susan and how he was looking forward to spending more time at home with her. The gentleman from Texas spoke of her admiringly and spoke of the sacrifice that she has made, being a spouse of a Member of Congress. We all stood and applauded when Susan ArmeY was recognized. We stood because each of us knew what our spouses have endured—the long hours, the brutal campaigns, the time away from our families. We know what Susan has endured.

DICK and Susan ARMEY will get to spend more time together, and I am very happy for them. But also, Mr. Speaker, I am saddened by the gentleman from Texas' announcement. I am saddened because I consider him a friend and I respect what he has accomplished, but I will miss him and I wonder who will fill the void. DICK ARMEY has fought for so many things that have made this a better place to live: Welfare reform that has improved the lives of more than 6 million Americans who are working today and pursuing their dreams. It was DICK ARMEY who fought so hard for Congress to balance the budget, and finally we see a surplus for the first time in a generation. It was DICK ARMEY who fought for a flatter, fairer tax system for Americans.

Yes, Mr. Speaker, I am going to miss DICK ARMEY when he leaves. I am going

to miss my friend. Thank you, DICK, for carrying on the banner, for accomplishing so much, making life in America better for me and for my children.

God bless you and God bless America.

TEACHER CERTIFICATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Tennessee (Mr. DUNCAN) is recognized for 5 minutes.

Mr. DUNCAN. Mr. Speaker, I rise tonight because occasionally I still read articles or hear news reports about a teacher shortage in this Nation. This is a government-induced, contrived or special interest produced shortage, because this is a problem that could be solved very simply and very quickly if we would do a few simple things.

Many, many years ago, I taught American government and journalism at T.C. Williams High School in Alexandria, Virginia, the school that the famous movie "Remember the Titans" was made about. I have had many, many teachers in my family. My grandmother taught for 40 years. My older sister taught for 30 years. Nobody admires teachers, I suppose, more than I do. But I think some of the certification requirements are warped, are out of whack. It makes no sense, for instance, that people who have Ph.D.s or master's degrees and long experience and great success in a particular field cannot teach in most of the public schools of this Nation.

□ 1815

What spurred me to speak here tonight was an article that was in yesterday's Washington Post entitled "Down to Basics on Teacher Certification." This article says:

"University of Virginia Professor Frederick M. Hess says states should dump their current teacher certification requirements and instead ask prospective educators three simple questions:

1. Do you have a college degree?
2. Can you pass a test in your subject area?
3. Can you pass a criminal background check?

If the answers are yes, yes and yes, you could apply for any teaching job in the state.

To those who are picturing a crime-free yet clueless misfit at the front of their child's class, Hess says: Give school principals some credit. Allowing someone to apply for a job is not the same as guaranteeing them employment, he wrote in a recent paper for the Progressive Policy Institute.

Currently, each state sets its own complex guidelines for certification. They require a degree from an education program. The problem is that nobody agrees on what these programs should be teaching, Hess writes, in "Tear Down This Wall," the case for a

radical overhaul for teacher certification."

That is what we need, Mr. Speaker, a radical overhaul of teacher certification. It makes no sense, if, say, a Ph.D. chemist who works at Oak Ridge in East Tennessee and who has spent, say, 30 years in that field and decides he would like to teach for a few years, he cannot be hired over some 22-year-old recent college graduate who has a bachelor's degree in chemistry, because that young person took a few education courses, and this Ph.D.-experienced chemist did not.

It makes no sense, Mr. Speaker, that a person who has a Ph.D. in political science cannot go teach American government in most of the high schools, public high schools, in this country. Or you could name any other field.

Let us say that we know that many private small colleges are struggling financially. Some of them close. Some of them cannot pay as well as the public school systems in this country. So let us say a person who has a Ph.D. in English and has taught 25 years at some small college wants to go teach in a public school. They should be able to.

The school systems of this Nation, the school boards, should be allowed to say a degree in education is a plus and a factor in favor of someone being hired; but they should have the flexibility to hire somebody who has great experience in a field and has maybe even advanced degrees in a particular field, and they should not be disregarded or excluded from even being considered for teaching positions in this country just because they did not take an education course when they were in college.

So I appeal to the Committee on Education and the Workforce members here and at the various State levels across this Nation to give our school boards and school systems more freedom and flexibility in who they can hire. I believe that we will get much more qualified teachers and wipe out this contrived, government-induced, pressure group-produced teacher shortage in this Nation.

NATIONAL AVIATION CAPACITY EXPANSION ACT

The SPEAKER pro tempore (Mr. OSBORNE). Under a previous order of the House, the gentleman from Illinois (Mr. LIPINSKI) is recognized for 5 minutes.

Mr. LIPINSKI. Mr. Speaker, I rise tonight to introduce the National Aviation Capacity Expansion Act. This measure will codify into Federal law a historical agreement reached between Illinois Governor George Ryan and Chicago's Mayor Richard Daley that would benefit not only the Chicago area, but the entire Nation.

This agreement and legislation will modernize O'Hare International Airport by constructing new runways and reconfiguring old intersecting runways. It will also address automobile traffic congestion near O'Hare that will include western airport access, and it will maintain the quality of life for residents near O'Hare by committing \$450 million in funds for soundproofing. In addition, this agreement will construct a new south suburban airport near Peotone and continue the operations of Meigs Field on Chicago's lakefront.

Because O'Hare is the epicenter of the Nation's aviation community, this agreement is great news for airline passengers across the Nation. O'Hare is one of the world's largest airports and is the only dual-hub airport in the Nation, as both United and American Airlines base a significant amount of their employees, equipment and activities at O'Hare.

O'Hare serves more than 190,000 travelers per day, with 2,700 daily flights. Communities big and small are served by O'Hare. Forty-eight States in this union have direct access to O'Hare International Airport.

O'Hare is badly in need of an upgrade to meet the demands of the 21st century because the airport design was developed in the 1950s. By replacing old runways with a safe and more modern design, weather delays and cancellations will be greatly reduced, eliminating delays that often make the rest of the Nation shudder.

In addition, my bill ensures that O'Hare modernization will be paid for primarily through airline and airport generated-funds, such as the passenger facility charge, landing fees, concessions and bonds. Contrary to what the few opponents of this measure say, this bill does not put the Federal Government on the hook for the cost of this project.

This bill also moves ahead with a south suburban airport near Peotone, Illinois. While some of those few opponents argue that expanding and reconfiguring O'Hare will put a stop to the State of Illinois' plans to build an airport at Peotone, nothing could be further from the truth. As the Chicago Sun Times wrote yesterday in their lead editorial: "The road to an airport in Peotone runs through a revitalized O'Hare. The two are linked. Demand for air travel is a key ingredient of the economic vitality of Chicago, our region and the country. A crowded, overwhelmed O'Hare, delays air traffic nationwide, and costs uncalculated billions every year. Another 2 decades of a decaying O'Hare, and a lot of people won't want to fly into Peotone or anywhere else."

I applaud Governor Ryan and Mayor Daley for their courage, tenacity and resolve that made sure that this agreement was done. But for this agreement

to become reality in the long run, we must codify it so that no future Governor may rescind the agreement, and that is what my legislation will do.

I urge all of my colleagues to cosponsor this legislation that will do more than any other measure in Congress to meet the aviation demands of the 21st century.

HONORING THE UNIVERSITY OF WISCONSIN-STOUT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. KIND) is recognized for 5 minutes.

Mr. KIND. Mr. Speaker, last week President Bush and Commerce Secretary Don Evans announced the recipients of the Malcolm Baldrige Award, our Nation's highest honor in quality and performance excellence, named after the 26th Secretary of Commerce. It is my pleasure to join them in congratulating the University of Wisconsin-Stout for becoming the first university ever to receive the award. I would also like to commend my good friend Chuck Sorenson, the chancellor at Stout, and the entire faculty and staff there for their hard work and dedication in helping make UW-Stout the extraordinary institution it is today.

In 1987, Congress established the Malcolm Baldrige National Quality Award to enhance the competitiveness of U.S. businesses. The award promotes quality awareness, recognizes the quality and performance achievements of U.S. organizations, and publicizes successful performance strategies.

It is given to U.S. organizations that have exemplary achievements in seven areas: leadership, strategic planning, customer and market focus, information and analysis, human resource focus, process management, and business results. All applicants for the Baldrige Award undergo a rigorous examination process that requires nearly 1,000 hours of outside review. Teams of examiners visit the finalists to clarify questions and verify information; and finally, an independent board of examiners reviews all applications and produces a report citing strengths and opportunities for improvement.

I am pleased that UW-Stout has received such a prestigious award. Many of us in western Wisconsin have long known the outstanding work done by the students, the faculty and the staff at UW-Stout that have made it an exceptional institution of higher education. UW-Stout is an outstanding role model for the 21st century education organizations, and it will now gain the national recognition their efforts deserve.

UW-Stout is one of 13 publicly supported universities in the University of Wisconsin system. It has approximately 1,200 faculty and staff and

about 7,700 students. UW-Stout offers 27 undergraduate and 16 graduate degrees. In addition to undergraduate and graduate degree programs, there are a variety of outreach programs and services to business, industry and society, and provides a full range of support services to students.

In addition, UW-Stout's "mission driven-market smart" focus is characterized by an array of programs leading to professional careers, primarily in industry and education. It has maintained graduation replacement rates at or above 98 percent since 1996, and employers have consistently rated 99 to 100 percent of its graduates as prepared to work.

Although the Malcolm Baldrige Award is a tremendous achievement for UW-Stout, it is not the first award that the University has received. UW-Stout has received multiple awards for innovative programs and partnerships. In April 2001, UW-Stout received the national recognition from Newsweek as one of 34 schools cited as a "hidden treasure."

Some of the other awards include the 1995 Governor's Glass Ceiling Award; the 1999 Outstanding Award for Technology Transfer from the National Association of Management and Technical Assistance Centers; and the 1998 American Association of University Women Equity Initiative Award Winner.

Furthermore, UW-Stout has excelled in applying technology to instruction. Technology, when used effectively, can stimulate learning, enrich lives and create greater opportunity for the future of UW-Stout's students.

Beginning in the fall of 2002, toting laptops to class will soon be as common as carrying books. UW-Stout is the first university in Wisconsin to launch an initiative that will place a laptop in the hands of every incoming freshman.

To make the notebook computers even more portable, the program opted to use cutting-edge wireless technology. Each laptop is equipped to communicate with one of several Lucent base stations located on campus, allowing students to work on their laptops while in the classroom, the hallways, or even outdoors.

That is, however, only one of UW-Stout's innovative achievements. It is truly an exceptional university, and I am proud that this university is in my congressional district back in western Wisconsin.

Again, I am pleased UW-Stout has achieved the Malcolm Baldrige National Quality Award. They are truly a leader in the field of higher education, and I commend them for their hard work.

FEDERAL ECONOMIC STIMULUS PROPOSALS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. RODRIGUEZ) is recognized for 5 minutes.

Mr. RODRIGUEZ. Mr. Speaker, the Federal Government recently announced what we already knew, that the economy has been in recession since last March. According to the Labor Department, from September to October, the unemployment rate jumped from 4.9 percent to 5.4 percent, the largest 1-month jump since February of 1986. There are now 7.7 million unemployed Americans across this country, an increase of over 1,650,000 since March. The terrorist attack of September 11 only hastened the economic downturn and highlighted the need for a Federal response to stimulate the national economy.

Congress, as we all know, is locked in the debate about how best to quickly revive the U.S. and global economy. We need a response that is tailored to meet the problem, one that puts money in the hands of consumers, one that stimulates job creation, one that helps those most immediately hurt by job losses.

Following the terrorist attack on September 11, the House and Senate budget committees issued a set of principles for the economic stimulus package. These principles stated that any stimulus measure should, first, be limited in duration; secondly, that it not cause the Federal Government to have an on-budget deficit; thirdly, that it not result in high, long-term interest rates; fourthly, that it be approximately \$100 billion in size; and, finally, that the cost should be fully offset in the future to ensure maximum repayment of our \$5.8 trillion Federal debt. I repeat that, that the cost be fully offset in the future to ensure maximum repayment of that debt. And that is an important point, that we have to make sure that we pay for what we expend.

□ 1830

Sadly, the House of Representatives' leadership passed a tax bill disguised as an emergency stimulus package which ignored each of those principles. The misnamed Economic Security and Recovery Act, which basically only stimulated the corporations, provides little true economic stimulation to lessen our Nation's recession and will delete the U.S. Treasury of \$274 billion over the next 10 years. Some 58 percent, or \$161 billion, of this total would come from our Social Security and Medicare trust funds. It is coming at the backs of our senior citizens and their pensions.

In the long run, the bill is likely to increase the long-term interest rates, which would raise home mortgage rates and, thereby, threaten the long-term growth of the economy. The fiscal

discipline of the last 8 years that produced the largest budget surpluses in decades would be wiped out by this legislation, especially when combined with a \$2 trillion tax reduction bill passed earlier by this Congress.

The bill includes long-term tax benefits for the wealthiest 2 percent of our taxpayers, \$24 billion in retroactive tax relief for the largest corporations in America, accelerating the reduction in the top individual tax brackets affecting those persons making more than \$297,000 per year, and provided \$21 billion in tax benefits to U.S. corporate profits made outside the U.S. as long as the money is kept outside this country.

A scant 11 percent of the overall benefits of the bill would benefit those that are unemployed due to the downturn of the economy. That is 11 cents out of every dollar would only go for those that are in need.

The irresponsible failure to offset the cost of those tax cuts will leave us with future budget deficits and upward pressure on long-term interest rates. I would repeat that this bill would come and create additional deficits for our country.

Finally, the passage of this bill, and as we look at a bill, we have to make sure that it helps those that are in need and that it looks at stimulating the economy. It should follow the balanced alternatives that would quickly put money in the hands of people who have been hurt by the economic downturn and most likely to spend it and stimulate the economy. September 11 not only hurt New York, but it hurt everyone. It hurt those people on the borders that are having to wait. I ask that we really take into consideration and that we seriously look at what we are doing and that we vote for an appropriate piece of legislation.

BREATHING LIFE INTO HUMANITARIAN LEGISLATION FOR AFGHANISTAN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Ms. JACKSON-LEE) is recognized for 5 minutes.

Ms. JACKSON-LEE of Texas. Mr. Speaker, today the President of the United States signed legislation to assist the starving Afghan women and children. Not only was this legislation to address these terrible physical needs, but also to address the need to include Afghan women in the political and governmental structure of a new Afghan.

I would simply say that the signing of the legislation and the work that was done by the women of this House and the Senate, many women in the Democratic Caucus who began many, many months ago speaking about the plight of the women in Afghanistan, is something that we all can be proud of. I salute the signing of this legislation.

Right now, there are 1 million people from the Afghanistan nation on the border of Afghanistan and Pakistan. These individuals are suffering because of the inclement weather and the very cold season. In refugee camps, 175 people have already died, and most of those are children.

It is important as we sign legislation, Mr. Speaker, that we utilize part of the \$40 billion to act on the legislation. The people in Afghanistan need food, they need clothing, they need the ability to be resettled, they need housing that will be warm. In order to make this legislation a living, breathing document, I call upon the President of the United States to expend some of those dollars to utilize them immediately to help the starving children and the plight of those families on the border between Afghanistan and Pakistan. It is enormously important that as we fight to rid ourselves and the world of terrorism, that America emphasizes and reemphasizes its humanitarian approach and its view that there is a need to protect families, women, and children.

Mr. Speaker, just a few weeks ago I passed a resolution, H. Con. Res. 228, and that resolution was to emphasize that those children who lost parents or a guardian on September 11 should receive Federal benefits or any benefits with the highest priority. We know of the horrific tragedy of September 11, the divide that it caused in families and the loss of loved ones here in the United States, and I believe it is extremely important to emphasize the need to provide resources for those children. But equally so, as we have made a commitment to helping restructure the nation of Afghanistan, meaning to provide the opportunity for that government to build itself in a peaceful manner, we have also committed to making sure that women will be included in the rebuilding of that nation and in the governmental structure. We realize that the imprisonment of the burqas was the imprisonment of the spirit and of people's freedoms.

Now women are able to take off those uniforms. Now we need them to be fully involved in the structuring of government so that women's interests and children's interests can be emphasized.

Next week I intend to hold a briefing on the plight of children in Afghanistan and the hunger that they face, the devastation that they face, the fact that children have to go to work at 7 and 8 years old to provide for their families making bricks. We must find a way to involve ourselves in the aspects of giving Afghanistan and the people of Afghanistan a future and a sense of hope. Particularly, we must find a way to involve ourselves in the lives of those children so that they will become freedom-lovers, lovers of stability and government, and appreciating their

own faith and recognizing that their faith, the Muslim faith, the Islamic faith, is one of love and peace.

We must do that now, Mr. Speaker. We must ensure that the resources are there. We must breath life into legislation that was signed today. We must address the question of 1 million refugees. We must find a way to stop children from dying in refugee camps. We must find a way as well to help rebuild this nation in a way that it stands alongside of the rest of the world family as a freedom-loving place, a place of peace, and a place where all can raise their children in harmony and with opportunity.

SERVICE WITH DISTINCTION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. SESSIONS) is recognized for 5 minutes.

Mr. SESSIONS. Mr. Speaker, today was a day that our majority leader, the gentleman from Texas (Mr. ARMEY), announced that he would not be seeking reelection in the 26th district of Texas, his hometown of Denton, Texas and the county of Denton.

Mr. Speaker, Majority Leader ARMY, upon making this announcement, gathered his family together and spoke with his family about his hopes and dreams of a new life that he wishes to have outside of the Congress. He spent 16 years in this body. This body respects DICK ARMEY. This body loves DICK ARMEY. This body also understands that DICK ARMEY is a man who brought high energy, ideals, high ideals and ideas that have moved this country, that have been a part of the political debate of this country.

I, as one Member, was asked to run for Congress by DICK ARMEY, and he described it to me as a place that would be not only an honorable place and a place where ideas would be talked about and discussed, but also a body upon which was an institution, the institution of the Congress of the United States. DICK ARMEY is one of the few people who have been to the very top who, upon their own choosing, has decided to leave. He served this body with honor and distinction, and he looks forward to those times that he will spend with his family.

But today was a special time, for he had his beautiful wife, Susan, and his family gather with him in this body as he described not only his hopes and dreams of this country that he has served, but also the hopes and dreams of this country when he goes into retirement. It is DICK ARMEY who worked to make this a better place. It is DICK ARMEY who chose to bring ideas not only related to solving one of the more difficult problems of this country related to how we handle military base closings, but it is also DICK ARMEY who talked about and brought from his

years as an economics professor, a doctor of economics, the understanding that what this Congress does when it taxes people, when it takes money from people, what those profound effects are upon not only families and businesses, but also on the psychology of the Nation that no longer could handle deficit spending.

Mr. Speaker, it is DICK ARMEY who understood as a result of traveling all across this country the hopes and dreams that people have about America's greatest days lie in our future, and that is why DICK ARMEY became the father or the author of the Contract With America. Yes, he did work with Newt Gingrich on that, but it is DICK ARMEY and his staff who took it as a challenge, an opportunity, a sharing of ideas, where he stated unequivocally that if the Congress of the United States, the 104th Congress, would focus on those 10 important aspects that were embodied within the Contract With America that were, simply put, giving power back to people who are back home and taking power away from this body, that we could become not only more respectful of the taxpayer, but we could focus on the things that would make this country better.

It is DICK ARMEY who led the battle. It is DICK ARMEY who had the ideas, who shaped not only the things that made a difference in the Contract With America, but it is DICK ARMEY who made sure that they passed on the floor of this House of Representatives.

Mr. Speaker, DICK ARMEY has served with honor and distinction, not only the people of the 26th district of Texas, but also the people of this country. He was also our elected representative, the majority leader of the Republican Party. He will be sorely missed. Dick has been a good friend of mine, a mentor, and provided me not only with wise counsel, but also talked about how this institution must survive because it is in the best interests of this country.

So on this happy day, there is sadness in my heart, yet I know that DICK ARMEY feels like that he goes out in a way that he chose best, a way where he had a chance to leave this body, where he had a chance to give his very best, and yet he knows that his greatest days will be those times that he will have back in his own backyard with his grandchildren enjoying himself with his beautiful wife, Susan, and praying for this country. For we, too, will continue without him, but we too recognize that the opportunity to take those ideas that DICK ARMEY matured for every one of us, in fact, will make our country better.

Mr. Speaker, I will miss DICK ARMEY. We will have one more year to work with him. But I want the people of this country to know that the time that is spent in Washington, D.C. can be done by honorable and great people and DICK

ARMEY is simply one of those gentleman.

MAKING IN ORDER AT ANY TIME CONSIDERATION OF HOUSE JOINT RESOLUTION 78, FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 2002

Mr. YOUNG of Florida. Mr. Speaker, I ask unanimous consent that it shall be in order at any time without intervention of any point of order to consider in the House the joint resolution (H.J. Res. 78) making further continuing appropriations for the fiscal year 2002 and for other purposes; the joint resolution shall be considered as read for amendment; the joint resolution shall be debatable for one hour, equally divided and controlled by the chairman and ranking minority member of the Committee on Appropriations; and the previous question shall be considered as ordered on the joint resolution to final passage without intervening motion except one motion to recommit.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

BASE CLOSURES HARM AMERICA

The SPEAKER pro tempore (Mr. OSBORNE). Under a previous order of the House, the gentleman from Mississippi (Mr. TAYLOR) is recognized for 5 minutes.

Mr. TAYLOR of Mississippi. Mr. Speaker, in all probability, tomorrow the defense authorization bill for the year 2002 will come to the House floor.

Three or 4 years from now, it probably will not be remembered for what it has done for military procurement, because it does not do much. It buys only six ships for the fleet, which is actually one ship less than the Clinton administration asked for. It does almost nothing to address the aging of the military air fleet. It does not do a whole lot as far as replacing aging weapons systems.

But what it will be remembered for, if it passes, is the defense authorization bill that comes to the floor tomorrow includes base closure. Having been a Member of the House for three rounds of base closure, I am going to oppose that and offer a motion to recommit, because I truly believe in my heart and in my mind that base closure is bad for America.

First, I think it hurts our Nation's ability to defend itself. I think it is bad for those people who have served our country, I think it is bad for those people who are serving our country, and I think it is bad for those people who will serve our country.

On behalf of those who have served, a little-known fact is that about half of

our Nation's military retirees have chosen to retire near a military installation. They do so so that in their golden years they can use those base hospitals and they can use the base commissary.

We, in effect, when we took them away from their families and sent them all around the world to defend us, we took one family away from them but gave them another. The new family is called the Air Force, the Coast Guard, the Marine Corps, or the Army. When we close the base, we have taken the family away from them.

They have purchased a house that is automatically reduced in value by the closure of that base. They are up in age, they do not want to up and move again, so in effect we have taken away their family doctor, the family grocery store, and once again, added to the list of things where they say we have broken promises to them.

I think it is bad for the present. Right now, all across America there are people working today, tonight, early into the morning, working overtime to take care to do those things that need to be done so our troops in the field in Afghanistan and all around the world are taken care of.

With the passage of this bill, they will immediately begin to wonder whether or not on November 7 of 2005 if that base will be open and if they are going to have a job. So instead of being rewarded for doing a good job for our Nation, they will immediately begin to worry about their future, and in all probability start looking for another job.

I think it is bad because when I asked my Senate colleagues, the other body, if they could name one single weapons system that has been purchased with savings from the previous three rounds of base closure, they cannot name one, because there is no savings. See, the myth of base closure is that we somehow save money because we close the base, we save a little bit on salaries. However, we are going to turn around and sell the property.

The part that was never explained to this Congress, but I will explain, is that the Nation has to live by the same laws as any other individual. Therefore, those laws that require properties to be cleaned up before they can be sold or given away apply to this Nation. Today, our Nation has spent over \$13 billion cleaning up bases that were in turn given to local governing authorities because they could not find anything to do with them. They had suffered devastating effects to their local economy.

I think it is bad for the future, because once again we are breaking bonds between local communities and military installations. As we see a shrinking force, we also see a shrinking number of bases and a shrinking number of citizens who appreciate on a day-to-day basis what those bases do for us.

The young soldiers, young airmen, young Marines, young Coast Guardsmen, the young folks who participate in the Special Olympics, in the Toys for Tots, who get involved in the Boys and Girls Clubs, they are gone. They are no longer part of the community. They are shipped off, and once again the military becomes somebody else's constituent, somebody else's neighbor.

It is bad, because when we lose that property, we never get it back, particularly our bases that are in waterside communities, once that property is disposed of, should there be another national crisis. And let me tell the Members, there will be another national crisis.

I have been in Congress for 12 years. I no sooner got here than the Berlin Wall came down and 3 months later American forces were in Panama. Less than a year later they were in Saudi Arabia and Kuwait. Since then they have gone to Bosnia, Kosovo. Right now, they are in Afghanistan. Who knows, given the open-ended use of force resolution that this Congress has passed, what happens next.

I think it is a horrible message that we are going to tell those people who defend us that their military housing is at risk because we could very well close down the base that houses them.

Mr. Speaker, I want to thank my colleague, the gentleman from North Carolina (Mr. JONES), for helping me to introduce this resolution. I would hope my colleagues would give serious thought to this. Not one Member of the House has voted to close bases. The other body only passed it by three votes.

I think it would be insane of the House of Representatives to allow this bad policy to become law tomorrow.

AMERICA CANNOT AFFORD TO IGNORE THE PLIGHT OF AFRICAN AMERICAN FARMERS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mrs. CLAYTON) is recognized for 5 minutes.

Mrs. CLAYTON. Mr. Speaker, as I have often spoken to this body about the plight of black farmers, again I rise today to speak about the same subject. Their problems and their possibilities transcend region and reach beyond where each of us lives and encompass a wide array of economic opportunities, and include not just black Americans but Hispanic Americans, Asian Americans, Indian Americans, and women.

This issue also affects the disabled. A wheelchair-bound white male in Michigan has felt the sting of unfair, discriminatory practices at the hands of those charged with serving, through the Agriculture Department, all citizens who make farming a way of life.

The plight of black farmers also affects those who reside in urban Amer-

ica as certainly as it affects those in rural America. What if the cost of milk was prohibitive for the average person? It is in many parts of the world. What if eggs and bread was not readily available, even for those who could afford them? That is the situation for some on other continents. What if fresh fruit, vegetables, or poultry could not be found on our supermarket shelves? There are supermarket shelves devoid of these products.

Just a short time ago, many Americans were touched by the kind of discomfort that citizens around the world experience on a daily basis when the meat crisis ground some hamburger sales to a screeching halt. The fate of farmers and the fate of urban dwellers are inextricably tied together. Discriminatory practices in extending loans, technical assistance, and resources of whatever kind will cost those in New York as surely as they will cost those in my district in Halifax County, North Carolina. Fading numbers of small farmers, black farmers, necessarily impact the quality of life and the cost of food and fiber.

Mr. Speaker, the motivation for me to seek an assignment with the Committee on Agriculture was that it provided me an excellent opportunity for me to improve the quality of life for the residents of my area, the First Congressional District of North Carolina, a primarily rural and economically disadvantaged area with large and small farmers, both commercial and non-commercial.

Farms have been important to this Nation's past; and farmers are vital to this Nation's future, especially small family farmers and ranchers. American producers, who represent less than 3 percent of the population, provide more than enough to meet the needs of our Nation, as well as many nations of the world.

There has been a great decline, however, in our Nation's farms since the late fifties. In 1959, there were over 2.4 million small farms in the United States. Over 170,000 farms were in North Carolina, representing some 6.9 percent. But by 1978, the national number of small farms had declined to a little over 1.3 million, a loss of 1.1 million small farms. In the same period, North Carolina lost 106,262 small farms, bringing our total to 69,091 small farms, but still holding at 5 percent of the national total.

It is also important to understand that by 1990, almost a quarter of all farm households had incomes below the poverty line, more than twice the national average. Life has become very tough for our American farmers.

By 1992, there were only 1.1 million small farms left in the United States, a 45 percent decline from 1959. North Carolina had only a little over 59,000 farms left in 1992, a 23 percent decline; better than the national percentage,

however, but certainly nothing to brag about.

Several factors have accelerated the demise of small producers: Globalization of commerce, economies of scale, limited access to capital, technological advances. The existence of worldwide markets for all commodities, not just agriculture, has created unique market forces.

Indeed, black farmers have suffered more. More than anything else, Mr. Speaker, the American people have ignored the fact that only 1 percent of the total farmers that now exist are African American; that is 18,816. This Nation cannot afford to ignore the plight of American farmers who happen to be African American.

TAX RELIEF FOR FAMILIES OF SURVIVORS OF SEPTEMBER 11 ATTACKS, ECONOMIC SECURITY, AND HEALTH INSURANCE COVERAGE FOR DISPLACED WORKERS

The SPEAKER pro tempore. Under the Speaker's announced policy of January 3, 2001, the gentleman from New Jersey (Mr. PALLONE) is recognized for 60 minutes as the designee of the minority leader.

Mr. PALLONE. Mr. Speaker, I would like to discuss a number of topics tonight; and I know I am going to be joined by at least one of my colleagues, the gentlewoman from Florida (Mrs. THURMAN).

But I wanted to say that in the last couple of weeks before the holiday break, which I guess most of the Members of Congress are hoping that there will be some sort of holiday break, what I find, both here in Washington, in this Chamber, as well as back at home, is that while people continue to be concerned about the war on terrorism and also security here at home, they are also increasingly concerned about the economy and the recession that we now face, and the fact that so many workers have lost their jobs, the unemployment rate continues to rise, and that those displaced workers oftentimes have a problem, obviously, finding a new job, but also with their health care, their inability to keep their health insurance, as well as the fact that many Americans now face a problem that even if they have health insurance, they find that it costs them more, either because the premium goes up or because they have more copayments.

There is a tremendous amount of concern also, I think, by Americans, by the average American, about retirement security and whether Social Security, for example, or their pension, is going to be there when they retire.

So on the one hand, we continue the war on terrorism, which the President has very successfully continued in Afghanistan against the Taliban and al

Qaeda; but at the same time, there is increasing concern about the economy at home and the recession that faces us.

I wanted to start this evening very briefly by talking about an issue that kind of goes together and concerns what happened September 11, and also is an economic security issue.

About one week ago, last Wednesday, in fact, there were about a dozen women who lost their husbands during the September 11 terrorist attack who boarded a train in my home State of New Jersey, leaving their children behind, and came down to Washington. They did not want to be here. They were visiting with not only members of the New Jersey delegation, as well as our two U.S. Senators, but they also met with the Speaker and they met with the gentleman from Missouri (Mr. GEPHARDT), the Democratic leader in the House.

When I say that these women did not want to come to Washington, that was obvious. They said many times that they were concerned about their children at home and about even being here. In fact, I would say that they were really angry over the fact that they had to personally come to the Nation's capital and ask in this case the House Republican leadership to bring up a bill that provides tax relief for their families.

The reason I bring it up tonight, and I have to say, I am going to bring it up every night until we adjourn for the holidays, is because when the women met with the Speaker, according to them, the Speaker promised them that the House would consider a tax relief bill for the victims' families from September 11 and that that bill would be brought up the following Tuesday, which was yesterday.

Well, it is pretty obvious, Mr. Speaker, that Tuesday has come and gone and nothing has happened in this regard, and they are still waiting.

□ 1900

My question really is how much longer are they going to have to worry about receiving relief from the Federal Government?

I do not want this to be partisan, but I understand, and I think they totally understand, that it is the Republican leadership that has to bring up this bill because they control the House. And I would say tonight, and I will say every night between now and when we leave, that it is time for the Speaker and the Republican leadership to step up and provide this tax relief by accepting the language that was passed last month by the U.S. Senate. The Senate passed a bill that accomplishes the goal of giving these women, in this case, widows, not only relief from their income tax for the 2-year period, but also relief from the payroll tax, from estate taxes. And it has other provisions that would help them out in this time of need.

Mr. Speaker, and now I am talking about "the Speaker," these families have not forgotten the promise that was made to them last week, and I would urge that this bill be brought up quickly, tomorrow, the next day, or as soon as possible. And as I said, I will continue to come to the House floor every day until the Republican leadership brings this legislation to the floor, because I think it is the only right thing to do.

I would like to, before I get into the economic stimulus issue, because I really believe very strongly that we need to pass an economic stimulus package also before we go home for the holidays, but before getting into that I would like to yield to the gentlewoman from Florida who, I understand, is here because she wants to comment on this report that was recently put out by the President's Commission on Social Security.

I have to say, again going back to what I said initially, I know in New Jersey and throughout the country that people continue to be concerned about terrorism but, at the same time, I also know that I am getting a lot of concern on behalf of my constituents about the economic issues, whether it be the recession, Social Security, or Medicare, and we were hopeful that this commission was going to make some recommendations with regard to Social Security that would deal with the solvency problem.

We know in a few years that Social Security is going to start to diminish. The money will not be there, at least at the levels that are promised. And I know that the gentlewoman and I were very disappointed that their recommendations really do not deal with the solvency problem, and make recommendations with regard to privatization and other matters that I think are not really going to help.

So I yield to the gentlewoman.

Mrs. THURMAN. I thank the gentleman from New Jersey for yielding to me.

I first would say to the women who came from New Jersey here to speak to the body, we heard so eloquently today somebody talk about "we the people," and this being "the people's place of business," and so we do need to be paying attention to what is being said for those people who are having to suffer as a result of these September 11 attacks. They are the survivors, the families, their children. We need to be very cognizant of the issues and the needs that are facing them, and particularly not only at the tough time, but the holiday time, when they are already suffering from their losses, but then to be economically strapped because of the consequences.

Mr. PALLONE. If I could just reclaim my time. I did not go into the issue in a lot of detail, in part because, I have to be honest, it concerns me so much

that it is difficult to talk about. But what has happened to them, and I think a lot of people do not realize this, is that the nonprofits, I guess primarily the Red Cross, basically provided assistance for the victims' families for a 3-month period. That ended essentially December 1.

So a lot of people think that the families of these victims are continuing to be helped by nonprofits, and in fact, that is not true. Some of them are in a position where they have a little money, but a lot of them do not.

I yield back to the gentlewoman.

Mrs. THURMAN. And I would say to the gentleman that that kind of walks into the issue of Social Security. So often we think of Social Security as just being something for those that have reached the age of 62 or 65. But the fact of the matter is we also recognize that Social Security provides essential income also for survivor benefits, and those survivor benefits in this case would be those children who are under the age of 16. They would have these benefits available to them.

Even as of last night, this House debated a resolution that pointed out why keeping Social Security was so important. And in the resolution it said, in the findings, "This Congress finds that; one, Social Security provides essential income security through retirement, disability, and survivor benefits for over 45 million Americans of all ages, without which nearly 50 percent of seniors would live in poverty. Social Security is of particular importance for low earners, especially widows and women caring for children," similar to what the gentleman is talking about, "without which nearly 53 percent of elderly women would live in poverty. And each payday American workers send their hard-earned payroll taxes to Social Security and, in return, are promised income protections for themselves and their families upon retirement, disability or death."

In this resolution it says, "and that commitment must be kept." Well, as we go through this resolution there is also a part that says "the sense of Congress," and it says, "The President's commission to strengthen Social Security, recognizing the immense financial commitment of every American worker into the Social Security System, should present in its recommendations innovative ways to protect that commitment without lowering benefits or increasing taxes, and that the President and the Congress should join to develop legislation to strengthen Social Security as soon as possible."

And it goes on to talk about what such legislation would have: "Recognizes obstacles that women face in securing the financial stability at retirement, or in cases of disability or death, and the essential role that the Social Security program plays in providing income security for women."

It also says, "Recognize the unique needs of minorities and the critical role the Social Security program plays in preventing poverty and providing financial security for them and their families when income is reduced or lost due to retirement, disability, or death;" and "It should guarantee current law promised benefits, including their cost-of-living adjustments that fully index for inflation for current and future retirees without increasing taxes."

Like the gentleman from New Jersey, I had great hopes. I thought the commission was a bipartisan commission that was going to come back with some recommendations, or a recommendation, not only on how we keep Social Security solvent but also how we extend it into the future, and we have heard the magic number of 75 years. I was rather concerned when the commission came back and released this long-awaited report on the privatization of Social Security.

Rather than releasing a consensus document with a single recommendation on how to lengthen the life of the trust fund, it released a list of three options, with little in the way of details. We just met with the commission and we said, are you going to give us details; how are we going to pay for this; what are we going to do? But what happened in this is that all three of the plans that were presented have what is called a "claw back."

Now, these plans then are set up so that the retiree does not get the full amount of what they earn on their private accounts. So they get the difference between what their account earned over time and an arbitrary number that the commission has set. That is what is called the "claw back."

All three of these options also carve private accounts out of Social Security. Here are the options: Option one diverts 2 percent of the payroll taxes into private accounts. This comes at a cost of \$1 trillion over the next 10 years. How does this option extend the life of the trust fund? And, by the way, we do not think it does.

The commission also recommended reducing Social Security checks to seniors. But the cuts would not be enough to offset the \$1 trillion in cost to the trust fund, so the commission failed to meet their goal of extending the life of the trust fund.

Option two diverts 4 percent of payroll taxes up to a maximum amount of \$1,000. How does this get paid for, we asked? It reduces Social Security checks by changing the way payments are calculated for each new generation of retirees.

In making this seemingly small change, benefits for new retirees will gradually fall over time. Over time this adds up to a dramatic cut in benefits. It would mean a benefit cut of 24 percent for someone retiring in the year

2040. By 2070, the cut would be over 40 percent.

Option three combines a 2.5 percent payroll tax diversion with a 1 percent investment of your total paycheck. This option, we found, was so expensive that numerous cuts in benefits would have to be made.

The Wall Street Journal put it best when it wrote in its editorial page, "Benefits for all retirees would be changed in so many ways that grandma's head would spin."

The option that the President's commission has put out leaves several questions that we need answers to. What are the costs to the transition to private accounts from the current system? If tax increases are off the table, as the majority of this Congress voted for today, what Federal spending would have to be cut to provide additional revenue? What, if any, protections are in place for those who retire during a market slump? How will disability and survivor benefits be affected?

The President's commission was vague about how their three options would be financed. They mentioned that the revenue would be raised, but neglected to explain from where. The money has to come from somewhere. How can the President or Congress weigh the pros and cons of making these large changes to the Social Security System without this information? It is a question.

I believe, and I think many of us believe, there should be some investment component to Social Security. However, I would say that these are not the way. All three options that the President's commission put forth include a reduction in benefits, including a reduction in disability benefits. One option has so many cuts in benefits, as I said earlier, the Wall Street Journal said, again, "Grandma's head would spin."

The commission's report leaves too many unanswered questions. No one knows exactly how much these options would cost or where the money would come from to pay for these options. What we do know is this: We know that future seniors would face a reduction in their Social Security checks each month; diverting as little as 2 percent of payroll taxes to private accounts would cost \$1 trillion in just the first 10 years; and we also know that none of these options will keep Social Security solvent over the long haul.

The gentleman from New Jersey and I have been here for a couple of years, we have been involved in this debate, and we care about this debate. The fact that this commission has come back and has left us with three options, has given us no knowledge as to how to pay for them, and leaves us probably with more questions than answers means that this debate will fall upon Congress once again.

I believe that if we were taking these dollars and, instead of diverting them,

that we could actually, as we know from past reports, continue to make the Social Security System solvent by putting these dollars in the system that we have today versus trying to come up with another way of funding this or coming up with these privatizations.

We had some very good conversations last year to take some of what we used to have, the surplus, divert it to Social Security, to even actually take some of those dollars and use them in some accounts to extend the life of Social Security, that would be benefits for everybody, and now we are in a situation where we are left with a lot of questions, and talk of diverting funds, and no way to pay and no surplus.

I would say to the gentleman from New Jersey, and I know one of the reasons he is here tonight is to talk about the shape of the economy and the stimulus package, but the fact of the matter is we have left some false hopes for those seniors on the table today, and to those with disabilities, and to those that he spoke of so eloquently earlier, those that are survivors.

Mr. PALLONE. Well, I want to thank the gentlewoman. I know that on the Committee on Ways and Means, that this is one of the major issues that she has struggled with.

It all goes back to what we were saying in the beginning, which is that September 11 came, and we know what a dramatic impact it has had on the lives of the average American and on what we do here. But the bottom line is that before September 11, we had these outstanding issues; how were we going to deal with Social Security and the potential insolvency? How were we going to deal with the need for prescription drug benefit?

Mrs. THURMAN. If the gentleman will yield, I have to tell him that tomorrow in my district, and I cannot be there, obviously, because I am here, but I would recommend my seniors in Spring Hill and in New Port Richey, Pasco County, attend a rally they are holding.

□ 1915

They are holding a rally. They have not forgotten the promises that were made during election time. They are talking and having a rally. They are expecting somewhere around 250 people to talk about the procedure issue. The article that I read today on it said we are going to send a videotape to the gentlewoman from Florida (Mrs. THURMAN) with the stories and the plight of these families and the cost of procedures in this country.

I would invite once I get this videotape for any Member of this Congress to come and sit with me and watch and see what so many of these people are struggling with on everyday life-threatening situations, and that is the inability for them to pay for their medicines.

Mr. Speaker, I know that the gentleman has done a fabulous job on this issue. I enjoy working with the gentleman on the Democratic Health Task Force. I think we have done some very good things. But again, prior to September 11 when everything was done with the tax cuts, nothing is paid for, there is nothing left. Every month we are spending a billion dollars out of dollars that we do not have today that we had before.

Mr. PALLONE. Mr. Speaker, reclaiming my time, the fact of the matter is, and I do not want to make it so partisan and go back to the Clinton administration, but the fact is during the Clinton years we had finally gotten to a situation where we had a surplus. That had a major positive impact on the economy because it meant that the Federal Government was not borrowing so much. Money was freed up for companies to borrow and build factories and create new jobs. It was an important part of why the economy did so well.

I cannot believe when President Bush came in he started preaching essentially that we had to have huge tax cuts that went to corporations and the very wealthy. As a consequence of that, we now have a deficit once again. I know that September 11 has aggravated that, but nonetheless we were there even before September 11.

When we talk about the Social Security system, I was amazed when I was looking at the analysis of this commission, they are suggesting using unspecified general revenues to restore solvency. President Clinton was saying exactly that, use the surplus to shore up Social Security. Some actuaries have said if we continued to do that over a number of years, that might have solved the problem itself, and we might not have had to do anything else. Now they are mentioning that in the report, knowing full well that the surplus is not there any more because of the Bush tax cut. There is some hypocrisy.

Mrs. THURMAN. Mr. Speaker, one of the things that is missed in this debate is that we watched the Social Security solvency, as well as Medicare, increase by year. Every year we were moving ahead, not backwards. So at first when we heard about Social Security, it was going to be 2029. All of a sudden we were able to increase the solvency until 2037. The reason for that was because of a strong economy, people were working and unemployment was low. People were paying into Social Security and Medicare. We watched Medicare go from something like 2011 when we did the 1993 bill. We took some of those dollars and we transferred them into Medicare from the Social Security part of it to make sure that we could keep Medicare solvent. We pushed the number out into the future.

So not only is the economy affecting us with the whole issue of whether or

not we have any surplus left, but it is also reducing, because unemployment is going up, those dollars that would be going into the system that would be extending these programs. So we are really kind of getting a double whammy here. It is not like we can forget without the growth in the economy, it also dwindles the dollars that goes into these programs.

So not only are we talking about what the options are, we have to try to figure out how to extend the solvency from where we are; and the best way to do that is to make the economy grow. There are ways to do that; and if we could sit down in a bipartisan fashion, do a bill that is fair across the board, is paid for, we could be going home with a gift to our constituents that helped all Americans and not just a few.

Mr. PALLONE. Mr. Speaker, I agree. I know that the gentlewoman can be very hard hitting, and in some ways she is almost being nice about the Social Security commission. It is not only the hypocrisy in talking about using general revenues that do not exist any more, but also they did not make it clear that any kind of privatization is ultimately going to aggravate the solvency problem.

I know that there are different suggestions here, but there is no way to create these private accounts and take any percentage of the money away from the Social Security trust and invest it and not impact the solvency. They are disguising what they are doing with the three options; but ultimately by privatizing, they are making the solvency situation worse, not better.

Maybe we need to be a little harsher about it than we have been, frankly.

Mr. Speaker, I yield to the gentlewoman.

Mrs. THURMAN. Mr. Speaker, we just got the report. It is 150 pages long. We are going to continue to dissect it and try to figure out if there are some things that we might catch onto. But there is an issue in the report that does concern me, and it is the one that I spoke about earlier called the "claw back." This claw-back issue is enormous because people think they are going to get their Social Security plus this investment. It does not work that way.

That is a really big concern because I think we are giving some false hope that we are going to take this 2 percent and invest it for you and, oh, by the way, you are going to get this, but you are also going to get all of this money that you supposedly made, and it does not work that way.

Mr. PALLONE. Mr. Speaker, I agree. I am going to sound very partisan, but both President Clinton and Vice President Gore were suggesting that there be a private pension system over and above Social Security. That is the only

way we could actually accomplish this. Americans would still get their Social Security benefits, but then Americans put money aside into their own pension system which is matched with Federal dollars and then there is something beyond. But the only way to create that is if we bring new money into the system either because the individual is contributing it during their working years or the government matches. We cannot take it out of the existing trust fund without impacting the trust fund. That is why they have to claw back, obviously.

Mrs. THURMAN. The issue there was to encourage savings.

Mr. PALLONE. Exactly.

Mrs. THURMAN. It was to also recognize that Social Security was never supposed to be what people would have to live off of. So if we could find these U.S.A. accounts or whatever magic name we wanted to call them, the fact of the matter was that they would be there for the purposes of folks who do not make but a small amount of money, and they would invest into this on their own to be matched. It gave them incentives.

Mr. Speaker, guess what we have found. When people save, it is good for everybody in America. It is part of the economy. Savings is a part of what we rely on. So there was a plan with an outcome that was good for everyone and with no false hopes.

Mr. PALLONE. Mr. Speaker, I yield to the gentlewoman from California (Ms. MILLENDER-MCDONALD).

Ms. MILLENDER-MCDONALD. Mr. Speaker, it is good to be with the gentleman tonight. He has always brought the critical issues to the floor and has really given the public the information that is true and real. A lot of times they hear the pontificating on this floor, and it is absolutely just loaded with all types of hypocrisy and misinformation and misgivings. But when the gentleman from New Jersey (Mr. PALLONE) comes to this floor, the public knows that he is coming in to speak the truth.

Mr. Speaker, as I look at my lapel and see the burqa cloth, I am reminded today that we pretty much stood with the Afghanistan women to say free at last, free at last, thank God almighty, we are free at last.

As I look at the burqa, I am reminded of the issue of Social Security and women, and how they are not saying free at last because of this report that has just come out from the President's commission. There were some of us who went and talked with the commission to let them know some of the adverse provisions of Social Security and how it impacts women, the elderly and the disabled; and yet this report comes out, and indeed it has those very things that we thought it would have, and how it impacts in an adverse way women and the disabled and the elderly.

I would like to just speak a little bit about what we have seen in our research and the fact that this report is very disappointing to me as the recommendations contained in the draft final report of the President's commission to strengthen Social Security is in fact going to weaken it. The fact that the commission could not agree on a single plan and released three separate options is a matter of deep concern, as Social Security is an issue of critical importance to my constituents and the people around and across this great country.

The three proposals all require profound and fundamental changes to the Nation's retirement plan. I am concerned in particular with the impact any changes to the Social Security system will have on women, retirees and disabled workers.

The three approaches taken by the commissioners share several problematic features. The plans call for benefit cuts for retirees and disabled workers, and also for individual workers to open voluntary private investment accounts to provide them with an income in their old age, and we do know that once you rob out of the trust fund, it does not retain solvency at all. It weakens it.

So to even call this report strengthening Social Security is a farce. It is absolutely a discredit to those who are looking for something different than what this report is saying. Each of the plans diverts Social Security resources elsewhere, and none of the plans balance Social Security without the use of massive transfusions of general revenue.

□ 1930

That surplus that they thought we had, and I suppose they must still think that, is not there anymore. So that is another misconception, a misnomer, a misdirection. Hypocrisy. No independent actuarial analysis was released, making it difficult to assess the commission's claims. What is clear is that each plan would "carve out" private accounts from Social Security, thus they would divert a portion of the trust fund revenues into private accounts.

Let me give you just a couple of things. We will not go into this plan. I am urging all of the Members to read this plan, to synthesize it, to dissect it, because it has several plans and all talk about this "claw-back" that my dear friend the gentlewoman from Florida just mentioned. I would like to just give information as to why women really need a good Social Security plan. We recognize that women, on the average, earn less than men, meaning that they count on Social Security's weighted benefit structure to ensure that they have an adequate income in retirement. Women are less likely to be covered by an employer-sponsored

pension fund, which means that Social Security comprises a larger portion of their total retirement income. Women lose an average of 14 years in earnings because they take time off from the workforce to raise their children or to care for an ailing parent or spouse. When women are in the workforce, they often work in part-time jobs. This means that they have less opportunity to save for retirement. So to even suggest that one would take voluntarily or otherwise from already a very weak type of income that they have, an income that is not conducive to caring for their family adequately, let alone talking about a private savings account.

Since women live 6 to 8 years longer than men do, they must make their retirement savings stretch over longer periods of time. Consequently, women depend considerably upon Social Security's progressive, lifelong, inflation-indexed benefits. Privatizing Social Security would undermine many of the features that benefit American women, retirees and the disabled the most. Privatization would encourage individuals to invest their proceeds in private accounts, especially through the investment marketplace and the stock market. Private pension plans require sophisticated knowledge of the stock market. Many women, and even men, lack the skills involved in making investment decisions, decisions that would be vital to their long-term financial security. In addition, because women earn less, live longer and spend less time in the workforce, they will have less to invest in their private pension plan. The result would be that women would have to live on smaller benefits from smaller accounts.

Finally, besides the risks evident in investing in the stock market, there is nothing to prevent individual private pension plans from being eroded by inflation, for heaven's sake. This is particularly devastating for women who have less money to retire on and the need to make their money last longer. Social Security resolves this problem by increasing benefits each year through a cost-of-living adjustment, which is COLAs. This safety net, it appears, will no longer exist, though, under this President's Social Security plan.

I say to you that the women across this country will now have an opportunity to look closely at this new strengthening Social Security proposal that the President's commission has come out with, and they too will be rallying in the streets, thinking that what they thought they were going to get, they will not get unless some of us rescue the Social Security plan and put back into the trust fund those types of benefits that one should put back in and should have in terms of strengthening the solvency of Social Security.

Another issue that my friend spoke about is the fact that unemployment

and people who are laid off work cannot invest in Social Security. Therefore, the solvency will be eroded, eradicated, we will not have that. And so to mention and to even suggest that one can invest voluntarily into a privatized pension or an account is really suggesting that you will have more people on the street, poor people on the street, homeless people on the street, women who have no sense of security because if they invest, not knowing and not having the skills as most of us do not have, they will come out losers. This is a losing proposition, not strengthening but weakening Social Security. I thank the gentleman for allowing me to just make some statements tonight as I continue to work with women across this Nation to look at this plan that does nothing for us but to weaken the position that we are already weakened in.

Mr. PALLONE. I want to thank the gentlewoman. She is right when she says that we need to have a lot more analysis of this because it just came out. But in pinpointing the difficulties in particular that women or low wage earners would face, I think that anybody who looks at this should be very concerned about the impact. The gentlewoman from Florida talked about the fact that Social Security is not just for people over 65, but also for people who are disabled and for survivors. Particularly with those groups, there is a lot here that they should be concerned about.

If I could just mention three things with regard to people who take an early retirement, the plan includes a provision that really further reduces early retirement benefits. Again, you have people that because of the economy now and the recession, there are a lot of these early retirement packages being offered in lieu of losing your job, so to speak. People who are taking those packages under this are going to have a problem, because they are going to be living a long time, particularly if they are women who tend to live a little longer, and they are going to be suffering because the amount of benefits they are going to be getting are going to be significantly reduced.

Ms. MILLENDER-MCDONALD. If the gentleman will yield, indeed they will. As we speak about the disabled, there is still not anything that is focused in a positive way in this report. So the disabled is out of luck in trying to find any redeeming qualities in this proposal. Then in addition to that, you are right. When people are now opting out and retiring early, they expect something in their Social Security benefits that will not be there if this is passed and institutionalized. I hope and pray that it is not, because the women of this country will be in an uproar, and men, too, those who opt to take an early retirement, thinking that what they are going to get is indeed what

they will not get under this President's commission's plan. Again, to strengthen is the operative word. It does not strengthen. It weakens.

Mr. PALLONE. Just this last thing I wanted to mention is that apparently there is some effort on the part of the commission that suggests that the benefits would be improved for widows and low earners. But from what I can see, it is just not true. It is just overstated. The Social Security benefits widows would receive under the commission's proposal for an improvement in survivor benefits would actually be less than they would receive under current law. The reason is, from what I understand, because the commission imposes sharp reductions in the basic benefits on which the survivor's benefit is calculated, so basically undermining the apparent increase in the survivor's benefit. So it is really very confusing and not what it pretends to be. It also says here that the benefit improvements for low earners may also be smaller than suggested in the commission's documents because few low wage workers have 30 years of steady earnings at the minimum wage. So few would receive the full antipoverty protection that the commission proposes. They are suggesting somehow that survivors and low wage earners are going to do better, but when you look at how they achieve those improved benefits, very few people would qualify.

Ms. MILLENDER-MCDONALD. This is very true. This is another reason why when we talked with them about that and they were trying to give us the formula, that formula was not adding up. Now that it is in print, it does not add up. The one thing that they should do is give us a stimulus package that really gives unemployment benefits to workers and to bring workers back to work. You bring workers back to work, then you can continue to buy into the Social Security trust fund, and then you might be able to do some of the things that they are talking about. But without the actuarial analysis, we cannot dissect this thing, we cannot really see all of the potentialities that they are talking about, but what we can see is that it is not strengthening Social Security. For that reason, we will have to denounce this. We will have to simply get our own plan going so that the American people, especially those women, the disabled and the elderly, will find comfort in a Social Security plan. This is no comfort at all.

Again, I thank the gentleman so much. We look forward to working with the gentleman as we bring about a plan that is a real plan for those Americans who are looking to Social Security for their benefits.

Mr. PALLONE. I want to thank the gentlewoman. I am glad that we brought up the issue of the Social Security commission tonight, because I

know that the report has come out but it has not received the attention that I think it needs to receive.

Ms. MILLENDER-MCDONALD. The report and some of the analysis that we have done through the Democratic staff will be sent to all Members, so you will get that. We will continue to be on the floor to talk about it.

Mr. PALLONE. Mr. Speaker, before I conclude tonight, I did want to spend a little time on the issue of an economic stimulus. I wanted to stress again how important I think this is. As we all know, we probably have only another week, maybe 2 weeks but probably not even, just days before the holiday.

I know that there is talk now that we may not even do an economic stimulus package because either this House and the other body cannot get together or Democrats and Republicans are trying to come together and have not been able to so far. I do believe very strongly, though, that we must have an economic stimulus package.

As I said in the beginning of this special order, more and more of my constituents are telling me about the problems that they face because of the recession, either higher unemployment or the fact that many displaced workers do not have access to health insurance, do not have access to a lot of the benefits that they would normally have if they have a job. That is why the Democrats have stressed that this economic stimulus package has to primarily focus on displaced workers, unemployment compensation, health insurance coverage for people who no longer have a job. And also provide some help to low-income workers. In other words, we have talked about a rebate for those who did not get a rebate as a result of President Bush's tax cuts that took place about 6 months ago.

The emphasis on the part of the Democrats is to do things that will make people spend money. In other words, give money back to low-income workers, provide unemployment compensation, provide certain expenditures on infrastructure to protect the country from terrorism which also would create jobs. The problem on the Republican side, particularly with the bill that passed the House with the support of the Republican leadership, is that all the emphasis in that bill and on the Republican side in this Chamber was towards accelerating those same tax cuts that passed as part of the President's initiative about 6 months ago.

The fear that I have and that many of the Democrats have is that by accelerating those tax cuts, which primarily were to corporations and wealthy people, that that will not spur the economy, that will not bring money back into the economy because it is not necessarily the case that those tax cuts would be used and spent on things that would stimulate the economy.

I just wanted to mention briefly, if I could, some of the differences between

the Democratic and the Republican plan, not because I insist that the Democratic plan be passed. I understand that there have to be some compromises if we are going to reach a majority in both Houses, but I do think that the emphasis has to be on what stimulates the economy. If you look at the Democratic bill, I will just mention four or five points.

With regard to unemployment compensation, individuals who exhaust their 26-week eligibility for State unemployment would be eligible for an additional 52 weeks of cash payments funded entirely by the Federal Government. Individuals who do not meet their States' requirements for unemployment insurance, in other words, part-time workers, would receive 26 weeks of federally financed unemployment insurance. This is in the bill. This is the substance of the Democratic proposal.

□ 1945

With regard to health care benefits, the Federal Government would fully reimburse eligible individuals for their COBRA premiums. Individuals who do not qualify for COBRA and are otherwise uninsured would be eligible for Medicaid, with the Federal Government covering 100 percent of the premiums. These benefits, these health care benefits, would last for a maximum of 18 months.

Then I mentioned the rebate checks. Under the Democratic proposal, low- and moderate-income workers who did not qualify for the rebate checks issued earlier this year under President Bush's tax cut would receive a one-time payment of up to \$300 for a single person and \$600 for married couples.

Finally, with regard to these homeland or domestic security upgrades, the Democratic package includes up to \$9 billion in spending programs to improve our Nation's infrastructure to protect against terrorism. Included would be funding for bioterrorism prevention and food safety, local police and fire departments, border security, airport security, and highway, bridge and tunnel improvements.

The idea of these upgrades is to basically hire more workers, and, therefore, lower the unemployment rate and put more money into the economy.

If you contrast that, Mr. Speaker, with the Republican tax cut bill which passed the House, just to give you some of the provisions, of the \$99.5 billion in tax cuts in 2002, \$70.8 billion benefits corporations, \$14.8 billion benefits affluent individuals, and only \$13.7 billion goes to workers with lower incomes.

Then you have the sweetheart things for the corporations, the repeal of corporate Alternative Minimum Tax. The bill not only repeals the corporate AMT, but it allows companies to receive refunds based on past AMT pay-

ments back to 1996. Capital gains tax cut, multinational financing tax cut, the list goes on.

Mr. Speaker, again, I am about to conclude; but I just wanted to stress again, I understand that if we are going to have an economic stimulus package, that we have to have the parties come together and the two Houses come together. But I also think it is crucial that whatever is done actually accomplishes the goal of stimulating the economy. I am very fearful that the Republican proposals that we saw in that House bill, that Republican bill that passed the House, would not accomplish that.

If I could just, in conclusion, Mr. Speaker, read part of this editorial that was in the New York Times on November 26. I know it is almost a month ago now, but I still think it says everything that needs to be said about what we should be doing with regard to economic stimulus. The sections I want to quote are as follows:

"Congress has only a few weeks left before adjourning for the year. Yet there is still no legislative agreement on measures to boost economy. President Bush needs to help break the impasse on both issues.

"Ideally, Congress should quickly pass a balanced fiscal stimulus bill aiding those who need help most without widening deficits in the years ahead. An appropriate homeland security measure would spend more than the \$8 billion the administration wants.

"Right now there are two competing stimulus bills, and the one supported by most Senators is by far the better. It would channel tax breaks and spending to those most hurt by the economic downturn, whereas the bill passed by the House Republicans would cut taxes disproportionately for the rich and for big corporations.

"Congress could reach a financially responsible compromise if Republicans dropped their worst ideas, a speed-up of the tax cuts enacted earlier this year for the wealthiest Americans and a separate measure to make it easier for big corporations to pay no taxes at all. The final bill could then focus on tax breaks, tax refunds and health benefits for the poor and the working poor, while helping small and medium-sized businesses with adjustments and write-offs for depreciation and expenses."

Mr. Speaker, there is no reason why we cannot come to a compromise along those lines. I would urge our leaders here over the next few days to try to reach a compromise because I think it is very important for the future of the economy.

(2) Complete and adopt a policy directive that provides for changes in how the Air Force makes budgetary and nonbudgetary decisions with respect to its science and technology development programs and how it carries out those programs.

(3) At least once every five years, conduct a review of the long-term challenges and short-term objectives of the Air Force science and technology programs that is consistent with the review specified in section 252 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (as enacted into law by Public Law 106-398; 114 Stat. 1654A-46).

(4) Ensure that development and science and technology planning and investment activities are carried out for future space warfighting systems and for future nonpace warfighting systems in an integrated manner.

(5) Elevate the position within the Office of the Secretary of the Air Force that has primary

responsibility for budget and policy decisions for science and technology programs.

(b) **REINSTATEMENT OF DEVELOPMENT PLANNING.**—(1) The Secretary of the Air Force shall reinstate and implement a revised development planning process that provides for each of the following:

(A) Coordinating the needs of Air Force warfighters with decisions on science and technology development.

(B) Giving input into the establishment of priorities among science and technology programs.

(b) **MATTERS STUDIED.**—(1) The study shall review and assess whether such changes as a whole are sufficient to ensure the following:

(A) That the concerns about the management of the science and technology program that have been raised by Congress, the Defense Science Board, the Air Force Science Advisory Board, and the Air Force Association have been adequately addressed.

(B) That appropriate and sufficient technology is available to ensure the military superiority of the United States and counter future high-risk threats.

(C) That the science and technology investments are balanced to meet the near-, mid-, and long-term needs of the Air Force.

(D) That technologies are made available that can be used to respond flexibly and quickly to a wide range of future threats.

(E) That the Air Force organizational structure provides for a sufficiently senior level advocate of science and technology to ensure an ongoing, effective presence of the science and technology community during the budget and planning process.

(2) In addition, the study shall assess the specific changes to the Air Force science and technology program as follows:

(A) Whether the biannual science and technology summits provide sufficient visibility into, and understanding and appreciation of, the value of the science and technology program to the senior level of Air Force budget and policy decisionmakers.

(B) Whether the applied technology councils are effective in contributing the input of all levels beneath the senior leadership into the coordination, focus, and content of the science and technology program.

(C) Whether the designation of the commander of the Air Force Materiel Command as the science and technology budget advocate is effective to ensure that an adequate Air Force science and technology budget is requested.

(D) Whether the revised development planning process is effective to aid in the coordination of the needs of the Air Force warfighters with decisions on science and technology investments and the establishment of priorities among different science and technology programs.

(E) Whether the implementation of section 252 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 (as enacted into law by Public Law 106-398; 114 Stat. 1654A-46) is effective to identify the basis for the appropriate science and technology program funding level and investment portfolio.

grades shown in that table for that component are determined by mathematical interpolation between the respective numbers of the two strengths. If the total number of members of a reserve component serving on full-time reserve component duty is more or less than the highest or lowest number, respectively, set forth in the

first column of the appropriate table in paragraph (1) or (2) of subsection (a), the Secretary concerned shall fix the corresponding strengths for the grades shown in that table at the same proportion as is reflected in the nearest limit shown in the table.

SEC. 598. SENSE OF CONGRESS REGARDING THE SELECTION OF OFFICERS FOR RECOMMENDATION FOR APPOINTMENT AS COMMANDER, UNITED STATES TRANSPORTATION COMMAND.

(a) FINDINGS.—Congress makes the following findings:

(1) The Goldwater-Nichols Department of Defense Reorganization Act of 1986 (Public Law 99-433) envisioned that officers would be selected for recommendation to the President for appointment as the commander of a combatant command under chapter 6 of title 10, United States Code (as added by that Act), on the basis of being the best qualified officer for that position, rather than the best qualified officer of the armed force that had historically supplied officers to serve in that position.

(2) In order to provide for greater competition among the Armed Forces for selection of officers for assignment as the commanders of the combatant commands and assignment to certain other joint positions in the grade of general or admiral, Congress provided temporary relief from the limitation on the number of officers serving on active duty in the grade of general or admiral in section 405 of the National Defense Authorization Act for Fiscal Year 1995 and thereafter extended that relief until September 30, 2003, but has also required that the Secretary of Defense be furnished the name of at least one officer from each of the Armed Forces for consideration for appointment to each such position.

(3) Most of the positions of commanders of the combatant commands have been filled suc-

cursively by officers of more than one of the Armed Forces since the enactment of the Goldwater-Nichols Department of Defense Reorganization Act of 1986.

(4) However, general officers of the Air Force with only limited experience in the transportation services have usually filled the position of commander of the United States Transportation Command.

(5) The United States Transportation Command could benefit from the appointment of future commanders selected from the Army, Navy and Marine Corps, in addition to the Air Force.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Secretary of Defense, when considering officers for recommendation to the President for appointment as commander of the United States Transportation Command, should not rely upon officers of one service which has traditionally provided officers to fill that position but should select for such recommendation the best qualified officer of the Army, Navy, Air Force, or Marine Corps.

Subtitle F—Rocky Flats National Wildlife Refuge

SEC. 3171. SHORT TITLE.

This subtitle may be cited as the “Rocky Flats National Wildlife Refuge Act of 2001”.

SEC. 3172. FINDINGS AND PURPOSES.

(a) **FINDINGS.**—Congress finds the following:

(1) The Federal Government, through the Atomic Energy Commission, acquired the Rocky Flats site in 1951 and began operations there in 1952. The site remains a Department of Energy facility. Since 1992, the mission of the Rocky Flats site has changed from the production of nuclear weapons components to cleanup and closure in a manner that is safe, environmentally and socially responsible, physically secure, and cost-effective.

(2) The majority of the Rocky Flats site has generally remained undisturbed since its acquisition by the Federal Government.

(3) The State of Colorado is experiencing increasing growth and development, especially in the metropolitan Denver Front Range area in

the vicinity of the Rocky Flats site. That growth and development reduces the amount of open space and thereby diminishes for many metropolitan Denver communities the vistas of the striking Front Range mountain backdrop.

(4) Some areas of the Rocky Flats site contain contamination and will require further response action. The national interest requires that the ongoing cleanup and closure of the entire site be completed safely, effectively, and without unnecessary delay and that the site thereafter be retained by the United States and managed so as to preserve the value of the site for open space and wildlife habitat.

(5) The Rocky Flats site provides habitat for many wildlife species, including a number of threatened and endangered species, and is marked by the presence of rare xeric tallgrass prairie plant communities. Establishing the site as a unit of the National Wildlife Refuge System will promote the preservation and enhancement of those resources for present and future generations.

(b) **PURPOSES.**—The purposes of this subtitle are—

(1) to provide for the establishment of the Rocky Flats site as a national wildlife refuge following cleanup and closure of the site;

(2) to create a process for public input on the management of the refuge referred to in paragraph (1) before transfer of administrative jurisdiction to the Secretary of the Interior; and

(3) to ensure that the Rocky Flats site is thoroughly and completely cleaned up.

JOINT EXPLANATORY STATEMENT OF THE COMMITTEE OF CONFERENCE

The managers on the part of the House and the Senate at the conference on the disagreeing votes of the two Houses on the amendment of the House to the bill (S. 1438), to authorize appropriations for fiscal year 2002 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe personnel strengths for such fiscal year for the Armed Forces, and for other purposes, submit the following joint statement to the House and the Senate in explanation of the effect of the action agreed upon by the managers and recommended in the accompanying conference report:

The House amendment struck all of the Senate bill after the enacting clause and inserted a substitute text.

The Senate recedes from its disagreement to the amendment of the House with an amendment that is a substitute for the Senate bill and the House amendment. The differences between the Senate bill, the House amendment, and the substitute agreed to in conference are noted below, except for clerical corrections, conforming changes made necessary by agreements reached by the conferees, and minor drafting and clerical changes.

SUMMARY STATEMENT OF CONFERENCE ACTION

The conferees recommend authorization of appropriations for fiscal year 2002 for the Department of Defense for procurement; research and development; test and evaluation; operation and maintenance; working capital funds; military construction and family housing; and for weapons and environmental restoration programs of the Department of Energy, that have a budget authority implication of \$343.3 billion for the national defense function.

SUMMARY TABLE OF AUTHORIZATIONS

The defense authorization act provides authorizations for appropriations but does not generally provide budget authority. Budget authority is provided in appropriations acts.

In order to relate the conference recommendations to the Budget Resolution, matters in addition to the dollar authorizations contained in this bill must be taken into account. A number of programs in the national defense function are authorized permanently or, in certain instances, authorized in other annual legislation.

The following table summarizes authorizations included in the bill for fiscal year 2002 and, in addition, summarizes the implications of the conference action for the budget authority totals for national defense (budget function 050).

High altitude endurance unmanned aerial vehicle

The budget request included \$33.5 million for advanced procurement of additional Global Hawk high altitude endurance unmanned aerial vehicles (HAE-UAVs).

The Senate bill and the House amendment would authorize the budget request.

The House Intelligence Authorization for Fiscal Year 2002 (H.R. 2883) would not authorize any of the requested funds.

The conferees agree to authorize the budget request.

The conferees are aware that much has been evolving in the Global Hawk HAE-UAV program in recent months. At the time of the budget request, the plan for these funds was to procure HAE-UAVs in the less capable Block 5 configuration, which contributed to the House recommendation. The accelerated program that is now underway would make these funds available for advanced procurement of the Block 10 configuration,

which will provide the electrical power, cooling, and interfaces for sensor packages, which should meet the evolving Global Hawk requirement. These changes have addressed some of the concerns expressed in the House report (H. Rept. 107-219).

Another concern shared by the conferees is the fact that the requirements for this system are evolving at the very time that the program is being accelerated. The conferees would expect requirements documentation with completed mission area annexes to be the basis for future program decisions. The conferees want to ensure that existing intelligence, surveillance, and reconnaissance (ISR) assets, such as the U-2, continue to be operated and upgraded as necessary until such time that any new systems, like the Global Hawk HAE-UAV and its sensors, are fully tested and integrated with the required ground architecture and satisfy the operational mission requirements.

Finally, the conferees expect, before these advanced procurement funds are released,

that the milestone decision authority approve this production in an acquisition decision memorandum that approves a coordinated and integrated acquisition strategy, taking into account the requirement, platform and sensor integration, ground architecture plan, and test plan for this spiral of the program.

Missile Procurement, Air Force—Overview

The budget request for fiscal year 2002 included an authorization of \$3,233.5 million for Missile Procurement, Air Force in the Department of Defense.

The Senate bill would authorize \$3,286.1 million.

The House amendment would authorize \$3,226.3 million.

The conferees recommended an authorization of \$3,222.6 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

ITEMS OF SPECIAL INTEREST

Acquisition programs at the National Reconnaissance Office

The Senate report (S. Rept. 107-62) raised several concerns about acquisition programs at the National Imagery and Mapping Agency (NIMA). The report expressed concern that the requirements trade-off process for the future imagery architecture (FIA) may not have provided sufficient attention to all aspects of an end-to-end capability, focusing too narrowly on the collection aspects of the problem.

The Senate report insisted that the requirements trade-off process consider the complete picture, not just the more narrow question of the collection instrument. The report further directed the Secretary of Defense and the Director of Central Intelligence to ensure that the acquisition policies of the Office of the Secretary of Defense, the Community Management Staff, and the National Reconnaissance Office (NRO) be changed to prevent recurrences of these problems at the NIMA. The report stated that these policies should prevent NRO satellite programs from entering acquisition until the Joint Requirements Oversight Council (JROC) and Mission Requirements Board (MRB) have approved a set of requirements for end-to-end system performance (i.e., ground and space segments together), and cost and schedule estimates to meet those requirements have been prepared by the NRO and its mission partners or other appropriate organizations.

The report accompanying the House amendment (H. Rept. 107-194) expressed no similar sentiment.

The conferees agree that the requirements trade-off process should consider the entire end-to-end system, not just the collection instruments. NRO satellite programs should include an assessment of the costs and impacts to the mission partners before being approved to enter acquisition. The JROC and MRB should also have an approved set of requirements for end-to-end system performance, i.e., ground, communications and space segments together. Complete cost and schedule estimates to meet these requirements should be presented by the NRO and its mission partners or other appropriate organizations and presented to the Director of Central Intelligence, the Secretary of Defense, and Congress.

However, the conferees do not believe that this should be an absolute prohibition placed on all NRO systems. For example, there are technology demonstration activities and other non-major systems procurement where spending resources on fielding an end-to-end capability is neither required nor appropriate.

The conferees believe that there has been progress in this area, but that the Secretary of Defense and the DCI should further ensure major new acquisition programs that support national-level requirements and the Department of Defense customers have completed the appropriate level of documentation in a formal requirements process, and the cost and schedule estimates to meet these end-to-end requirements have been prepared, before such programs enter into acquisition.

Acquisition programs at the National Security Agency

The Senate report (S. Rept. 107-62) raised several concerns about acquisition programs at the National Security Agency (NSA). The report noted that the Director of the NSA has made progress in transforming the NSA.

The report, however, expressed concern that more progress needs to be made in the NSA processes if the NSA is to achieve the capabilities that the nation will require.

The report identified a number of specific actions that the NSA would have to complete before December 1, 2001. Otherwise, the report would direct that the NSA modernization effort be designated a major defense acquisition program and milestone decision authority reside with the Under Secretary of Defense (Acquisition, Technology & Logistics).

In light of the problems identified in the Senate report, the report would direct that the Office of the Secretary of Defense (OSD) and the Community Management Staff (CMS) conduct a "baselining" of the NSA that parallels the successful and productive effort performed at the National Imagery and Mapping Agency in fiscal year 2001. There were a number of specific actions identified in the Senate report to help improve the situation at the NSA, including the following:

(1) The NSA must create a rational requirements process and produce a prioritized requirements baseline that is structured to support a spiral-development approach to major elements of the modernization program;

(2) The NSA must produce a rationalized, integrated schedule and requirements allocation for all the major elements of its modernization effort;

(3) The NSA must develop plans for turning over most or all of the systems integration job to a single industry team;

(4) The NSA must create a detailed plan to subordinate the interim Trailblazer program under the Objective Trailblazer program upon contract award;

(5) The NSA must produce a detailed audit of all the hundreds of ongoing development activities and programs within the Agency;

(6) The NSA must produce a detailed plan and schedule to establish a rigorous "make-versus-buy" decision process for all the NSA acquisition activities; and

(7) The NSA must produce a plan acceptable to the Department of Defense and the Director of Central Intelligence for enterprise-wide systems engineering.

The House report (H. Rept. 107-194) expressed no similar sentiments.

The conferees believe that the senior acquisition executive (SAE) and the NSA have made significant improvements in the acquisition process. For example, the SAE has initiated an orderly review process and has increased the percentage of competitive acquisitions.

However, much needed progress still remains to be achieved. The SAE is operating within a requirements and architecture vacuum, is not responsible for technology selection, has no control over correcting deficiencies in systems or software engineering disciplines, and appears to lack the authority to cancel or redirect troubled programs. The chief financial manager (CFM) is understaffed and has struggled to gain internal support to implement a cost accounting system that would enable the NSA to conduct an accurate financial baselining of all programs.

To its credit, the NSA has acknowledged that its major modernization programs were proceeding in isolation, and over the past several months, there has been an attempt to address the integration problem within the Signals Intelligence Directorate. However, such revelations must be accompanied by concrete plans for improvement.

The conferees agree with the need for the OSD and the CMS to enforce the baselining activities identified in the Senate report. In addition to the specific tasks identified above, the baselining effort should oversee and verify effective implementation of the CFM's plans for cost centers that will comprise the fiscal year 2003 budget request. The conferees further encourage the NSA to seek the advice of independent, outside experts to assist in guiding its selection of technologies under this baselining effort.

The conferees agree that, unless the OSD, the CMS and the NSA complete the baselining by December 1, 2002, the Congress will direct that the NSA's modernization effort be designated a major defense acquisition program, with milestone decision authority likely residing with the Under Secretary of Defense (Acquisition, Technology, and Logistics) until initial operational capability is achieved.

Airborne signals intelligence recapitalization and modernization

The conferees remain interested in sustaining and improving airborne reconnaissance platforms, sensors and payloads, and the architecture under which they operate. These systems provide theater and operational commanders with the bulk of real-time tactical imagery and signals intelligence (SIGINT).

The current fleet of reconnaissance platforms, consisting of the RC-135, the EP-3, and the U-2, is aging. In addition to the platforms under development, including the Aerial Common Sensor and the Global Hawk High Altitude Endurance Unmanned Aerial Vehicle (HAE-UAV), the conferees are aware of Army, Navy and Air Force initiatives to consider the replacement of their older reconnaissance platforms.

The conferees are also aware of the current status of collection systems used by the reconnaissance platforms, and are particularly concerned with SIGINT systems. The recent cancellation of the low-band subsystem (LBSS) portion of the Joint SIGINT Avionics Family (JSAF) program has necessitated a complete review of the way ahead for this vital capability. Although the development of the JSAF high-band subsystem has been more successful, without LBSS the SIGINT requirement will not have been fully met. Prior to establishment of the JSAF program, the individual services had disparate upgrade programs. Although technology sharing occurred, it was sporadic and uncoordinated.

The Department of Defense's approach must be coordinated and based on architectural standards. The conferees are pleased with the National Security Agency efforts to develop the Joint Airborne SIGINT Architecture and the associated maritime SIGINT architecture. The conferees believe the Assistant Secretary of Defense for Command, Control, Communications, and Intelligence should develop an architectural plan to provide standards-based policy direction to the services, whose platform program offices can develop systems and, to the maximum extent possible, share developments. The conferees expect the plan to include: (1) a robust spiral development approach; and (2) adequate emphasis on fielding and modernizing the appropriate ground support infrastructure.

The conferees believe the time is right to begin the formal discussion of the recapitalization and modernization of the airborne signals intelligence platforms, systems, and architecture. The conferees are specifically not endorsing any option for recapitalization. In fact, with several options under consideration, the conferees believe the Department of Defense should conduct an analysis

of alternatives to determine the most cost effective approach to this recapitalization and modernization. The conferees believe, in weighing the various options, consideration should be given to: (1) collaborative, network-centric operations that allow the various platforms to coordinate their various collection and analytical functions; (2) the ability to control unmanned aerial vehicles and their payloads; (3) a reach-back capability allowing analysts not on the platform to operate systems; (4) software re-programmable systems to allow for rapid threat updates; and (5) the ability to share in system upgrades.

Arleigh Burke-class destroyer procurement

The conferees agree with the Navy assessment that the destroyer industrial base is at risk unless three destroyers are built each year or unless the destroyer shipbuilders attain significant other work beyond their historic level of the past 10 years. Therefore, the conferees agree that the Secretary of the Navy should include procurement of three Arleigh Burke-class destroyers in the fiscal year 2003 budget request to attain an economic rate of production and consider options for maintaining and transitioning the industrial base, including second tier suppliers, to future destroyer production.

Attack submarine force structure study

Section 123 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 required the Secretary of Defense to provide a report on the Navy's fleet of attack submarines. That provision required that the Secretary submit this report with the fiscal year 2002 budget request.

Although the amended budget request was submitted to Congress on June 27, 2001, the Secretary has not yet submitted the required report. The conferees urge the Secretary of Defense to submit the required report, which is intended to provide the Congress with the information required to review the plans for recapitalizing the attack submarine force structure.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations *Authorization of appropriations (secs. 101–107)*

The Senate bill contained provisions (secs. 101–107) that would authorize the recommended fiscal year 2002 funding levels for procurement for the Army, Navy, Marine Corps, Air Force, Defense-Wide activities, Defense Inspector General, Chemical Demilitarization Program, and Defense Health Program.

The House amendment contained similar provisions.

The conference agreement includes these provisions.

Chemical agents and munitions destruction, Defense (sec. 106)

The Senate bill contained a provision (sec. 106) that would authorize the requested amount of \$1.2 billion for the Office of the Secretary of Defense for destruction of chemical agents, weapons and materiel.

The House amendment contained a similar provision (sec. 106) that would authorize \$1.1 billion for chemical demilitarization.

The House recedes with an amendment that would authorize the requested \$1.2 billion for the Department of Defense for Chemical Agents and Munitions Destruction, Defense.

The conferees are disappointed that the Department of Defense requested funds for chemical demilitarization for fiscal year 2002 in an Army account, contrary to the requirements of law. Section 1521(f) of title 50,

United States Code, requires that funds for this program shall not be included in the budget accounts for any military department. The conferees expect the Department of Defense to comply with the law in future budget requests for the chemical demilitarization program.

The conferees note that the Department of Defense has initiated a high-level review of the entire chemical demilitarization program and all its component elements. The conferees direct the Department to provide the congressional defense committees with the results and recommendations of this review, including an updated assessment required by section 141(a) of the National Defense Authorization Act for Fiscal Year 2000, as directed in the House report accompanying H.R. 2586 (H. Rept. 107–194), by March 1, 2002.

Subtitle B—Army Programs

Repeal of limitations on bunker defeat munitions program (sec. 111)

The House amendment contained a provision (sec. 112) to repeal section 115 of the National Defense Authorization Act for Fiscal Year 1995, which limits the acquisition of bunker defeat munitions.

The Senate bill contained no similar provision.

The Senate recedes.

Extension of pilot program on sales of manufactured articles and services of certain Army industrial facilities without regard to availability from domestic sources (sec. 112)

The Senate bill contained a provision (sec. 141) that would extend the pilot program for sales of manufactured articles and services from up to three Army industrial facilities enacted by section 141 of the National Defense Authorization Act for Fiscal Year 1998 through fiscal year 2002.

The House amendment contained no similar provision.

The House recedes with an amendment that would extend the authority for the pilot program through fiscal year 2002 but would limit the program to one facility. The conferees direct that the facility that has demonstrated the most success with the pilot program to date be selected as the facility to continue the pilot program.

Limitations on acquisition of interim armored vehicles and deployment of interim brigade combat teams (sec. 113)

The conferees agree to a provision that would amend section 113 of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001, which required the Secretary of the Army to submit a report on the process for developing the Objective Force in the transformation of the Army. The provision also required the Secretary of the Army to conduct a comparative cost and operational effectiveness evaluation of the interim armored vehicles (IAV) selected for the Interim Brigade Combat Team (IBCT) with the infantry troop-carrying medium armored vehicles currently in the Army inventory.

The provision further prohibited the obligation of funds for a third IBCT until: the comparative evaluation is carried out; the Secretary of Defense submits the results of the evaluation to the congressional defense committees; and the Secretary certifies that (1) he approves of the obligation of funds for that purpose and (2) the force structure resulting from the acquisition and subsequent operational capability of Interim Brigade Combat Teams will not diminish the combat power of the Army.

The Secretary of the Army has requested relief from the requirement for the compara-

tive evaluation directed in this provision. The Secretary stated that the comparative evaluation would replicate the comparison accomplished during source selection, and duplicate more comprehensive testing already required by law.

Last year, the conferees concluded that the costs associated with the comparative evaluation were worth incurring for a better understanding of whether the differences in operational effectiveness, if any, justify the increased cost of new IAV procurement compared to using current inventory equipment.

While the conferees continue to believe that there is merit to the comparative evaluation, the conferees recommend a modification to section 113 that would grant the Secretary of Defense the authority to waive those portions of section 113 pertaining to the comparative evaluation, subject to certain certifications.

The conferees direct the Secretary of the Army to conduct an operational evaluation of the initial IBCT, to include deployment to the evaluation site and the execution of combat missions across the full spectrum of potential threats and operational scenarios. The plan for the operational evaluation must be approved by the Director of Operational Test and Evaluation, Department of Defense, prior to execution.

The Army is prohibited from acquiring interim armored vehicles for other than the first three brigades, and from deploying any IBCT, until 30 days after a report on the operational evaluation is forwarded to the Congress and the Secretary of Defense certifies to the Congress that the results of the evaluation indicate that the IBCT design is operationally effective and suitable.

The Secretary of Defense can waive the deployment prohibition if he determines it to be in the national security interests of the United States, and reports to Congress the reasons for the waiver.

The conferees expect the Army to develop and resource an experimentation program that will inform the design of the Objective Force, including a formal linkage of the Interim Brigade Combat Teams to that experimentation.

Subtitle C—Navy Programs

Virginia class submarine program (sec. 121)

The Senate bill contained a provision (sec. 121) that would modify section 123(b)(1) of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 by authorizing the Secretary of the Navy to enter into contracts for the procurement of material in economic order quantities, when cost savings are achievable, for up to seven Virginia-class submarines. This authority would apply to boats to be procured during the period from fiscal years 2003 through 2007.

The House amendment contained no similar provision.

The House recedes with a clarifying amendment.

Multiyear procurement authority for F/A–18E/F aircraft engines (sec. 122)

The Senate bill contained a provision (sec. 122) that would authorize the Secretary of the Navy to enter a multiyear contract for procurement of F/A–18E/F aircraft engines in accordance with section 2306b of title 10, United States Code.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary to certify that each of the conditions listed in subsection (a) of section 2306b of title 10, United States Code, has been satisfied. The provision would also require that this multiyear

procurement contract could not be entered into until 30 days after the aforementioned certification has been transmitted.

The Navy procures engines for F/A-18E/F aircraft directly from the engine contractor and provides the engines to the prime airframe contractor as government-furnished equipment. The Navy is currently procuring the F/A-18E/F airframe under a multiyear contract that covers the fiscal years from 2000 to 2004. The conferees understand that this provision would authorize a multiyear procurement contract that may not cover exactly the same time period as that for the airframe itself. The conferees believe that the Secretary of the Navy should, if he chooses to enter into a multiyear contract for these engines, consider synchronizing the time periods of the contracts for these two items.

V-22 Osprey aircraft program (sec. 123)

The Senate bill contained a provision (sec. 123) that would keep the production rate of V-22 aircraft at the minimum sustaining rate, defined as the number for which funds are authorized to be appropriated in this Act, until the Secretary of Defense certifies to Congress that operational testing has successfully demonstrated certain effectiveness and suitability aspects not yet demonstrated.

The House amendment contained no similar provision.

The House recedes.

The conferees note that this provision is consistent with the recommendations of the report of the Panel to Review the V-22 Program, which was released in May 2001.

Report on status of V-22 Osprey aircraft before resumption of flight testing (sec. 124)

The Senate bill contained two provisions relating to reports that would be required before the V-22 could return to flight status.

One provision (sec. 124) would require the Secretary of Defense to notify Congress of the waiver, if any, of any item capability or other requirement specified in the V-22 Joint Operational Requirements Document, along with justification for any such waiver. The provision would require that any such notice be given at least 30 days before the V-22 resumes flight operations.

The second provision (sec. 215) would require the Under Secretary of Defense (Acquisition, Technology, and Logistics) to submit a report, 30 days before V-22 resumption of flight, that would include: (1) a description of any hydraulics and flight control software deficiencies and corrective actions; (2) actions to implement the recommendations of the Panel to Review the V-22 Program; and (3) an assessment of the recommendations of the National Aeronautics and Space Administration in its report on tiltrotor aeromechanics.

The House amendment contained no similar provisions.

The House recedes with an amendment that would combine the reporting requirements into one provision, and would require the Secretary of Defense to submit the report no later than 30 days prior to V-22 resumption of flight.

Subtitle D—Air Force Programs

Multiyear procurement authority for C-17 aircraft (sec. 131)

The Senate bill contained a provision (sec. 131) that would authorize a multiyear procurement of up to 60 additional C-17 aircraft in accordance with section 2306b of title 10, United States Code.

The House amendment contained a similar provision (sec. 121) that would authorize a multiyear procurement of up to 60 additional C-17 aircraft after the Secretary of Defense certifies that such a procurement is in the interest of the Department of Defense.

The conferees agree to a provision that would authorize the Secretary of the Air Force to enter into a multiyear contract for procurement of up to 60 additional C-17 aircraft in accordance with section 2306b of title 10, United States Code, except that the contract could cover a period of up to six program years.

The provision would require that the Secretary certify that each of the conditions listed in subsection (a) of section 2306b of title 10, United States Code, has been satisfied. The provision would also require that this multiyear procurement contract could not be entered into until 30 days after the aforementioned certification has been transmitted.

LEGISLATIVE PROVISIONS NOT ADOPTED

Additional amount for Shipbuilding and Conversion, Navy

The House amendment contained a provision (sec. 108) that would authorize an increase of \$57.1 million for a ship overhaul.

The Senate bill contained no similar provision.

The House recedes.

Destruction of existing stockpile of lethal chemical agents and munitions

The House amendment contained a provision (sec. 141) that would amend section 152 of the National Defense Authorization Act for Fiscal Year 1996 (Public Law 104-106; 50 U.S.C. 1521 note) to add to the requirements that must be satisfied before the Secretary of Defense may initiate destruction of the chemical munition stockpile stored at a chemical stockpile destruction site. The provision would require the Under Secretary of Defense (Acquisition, Technology, and Logistics) to convene independent oversight boards that would make a recommendation

to the Under Secretary on whether the destruction of the chemical munitions stockpile should be initiated at a particular chemical stockpile destruction site. Finally, the provision would require that the Under Secretary, after considering a negative recommendation of a board, may not recommend commencing destruction of the chemical munitions stockpile at the site until 90 days after the Under Secretary notifies the Congress of his intent to recommend initiation of chemical munitions destruction operations.

The Senate bill contained no similar provision.

The House recedes.

Extension of multiyear contract for Family of Medium Tactical Vehicles

The House amendment contained a provision (sec. 111) that would give the Secretary of the Army discretionary authority to extend the existing multiyear procurement contract for the Family of Medium Tactical Vehicles for one additional year.

The Senate bill contained no similar provision.

The House recedes.

Procurement of additional M291 skin decontamination kits

The Senate bill contained a provision (sec. 142) that would authorize an increase of \$2.4 million in the Defense-Wide procurement account for procurement of additional M291 skin decontamination kits.

The House amendment contained no similar provision.

The Senate recedes.

The Senate bill would separately authorize an additional increase of \$1.0 million for procurement of M291 skin decontamination kits.

The conferees agree to authorize an increase of \$3.4 million for procurement of M291 skin decontamination kits, as noted elsewhere in this report.

Army missile defense technology

To support critical missile defense technology activities, the conferees agree that of the funding authorized in the Army research and development account, certain amounts may be used for advanced technology activities as specified below:

- (1) up to \$1.9 million for the Short-range missile defense With Optimal Radar Distribution (SWORD) program in PE 62303A;
- (2) up to \$7.6 million for Patriot ground equipment upgrades and life extension efforts in PE 23801A;
- (3) up to \$3.8 million for the Aerostat Design and Manufacture (ADAM) program in PE 12419A; and
- (4) up to \$11.0 million for the Army Space and Missile Defense Battle Lab in PE 63308A.

Comanche

The budget request contained \$787.9 million in PE 64223A for continued engineering and manufacturing development (EMD) of the RAH-66 Comanche reconnaissance attack helicopter.

The Senate bill would authorize an increase of \$28.3 million for the development of a communications suite that is compatible with air and ground components in a joint environment.

The House amendment would authorize an increase of \$28.5 million for a similar purpose.

The conferees agree to authorize an increase of \$28.3 million in PE 64223A for this requirement.

The conferees believe the Comanche is a necessary and integral weapon system to the Army's transformation and have been supportive of this program in past fiscal years. The Army has stated that the Comanche is its top modernization program. However, the conferees note that there has been a \$3.0 billion increase in research, development, test and evaluation (RDT&E) costs since fiscal year 1991. Despite these substantial cost increases, the program continues to be plagued by delays, which the conferees now understand could result in a full two-year delay of the currently scheduled initial operating capability (IOC) of December 2006 to December 2008. The conferees are disappointed to learn

once again of the need to restructure and delay this program for at least a sixth time since fiscal year 1988, and the need to add approximately \$1.5 billion to the program to complete EMD.

The conferees question the reliability of any new cost estimates and EMD program milestones, especially since the EMD contract was awarded only slightly over a year ago, in June 2000, and numerous changes in requirements have been made since then.

The conferees believe that as the aircraft continues in the EMD phase, an adequately funded and disciplined development program is absolutely essential to fielding this aircraft as part of the Army's Objective Force. Therefore, the conferees expect the Secretary of the Army, in coordination with the Under Secretary of Defense for Acquisition, Technology, and Logistics, and its industry team, to present to Congress in the fiscal year 2003 budget request an accurate estimate of funds required to complete EMD and the new time line and plan for bringing the Comanche to IOC.

Rapid acquisition program for transformation

The budget request included \$23.6 million in PE 23761A for the Rapid Acquisition Program for Transformation (RAPT).

The Senate bill would authorize \$23.6 million for RAPT, but would transfer the funding from the RAPT program element to the program elements supporting the systems chosen by the Army for entry into the program for fiscal year 2002.

The House amendment would authorize \$23.6 million for RAPT, but would transfer the funding from the RAPT program element to PE 63001A, Warfighter Advanced Technology.

The conferees agree to authorize \$23.6 million in PE 23761A for RAPT or counter-terrorism initiatives and direct the Secretary of the Army to provide a detailed list of how these funds are executed.

Tactical high energy laser

The budget request included no funds for the Tactical High Energy Laser (THEL) program, a joint U.S.-Israeli development program to demonstrate the feasibility of de-

feating short-range rockets using directed energy.

The Senate bill would authorize \$9.0 million of the funds available in PE 63882C to evaluate the development of a Mobile THEL (MTHEL) system.

The House amendment would authorize an increase of \$10.0 million to PE 65605A for continuing work on THEL and exploring the option of a mobile version of THEL.

The conferees agree to authorize, from within the funds available in the Army research and development account, an increase of \$10.0 million to PE 65605A for evaluating development of THEL as a mobile system.

Thermionics technology

The budget request included \$19.5 million in PE 63308A for Army missile defense systems integration, but did not include funds for thermionics technology development.

The Senate bill would authorize, of the funds authorized in PE 63882C for the Mid-course Ground Defense System, \$8.0 million for thermionics technology development.

The House amendment would authorize an increase of \$3.0 million in PE 63308A for thermionics technology development.

The conferees agree to authorize an increase of \$1.0 million in PE 63308A for thermionics technology development. Of the amounts authorized for Army research and development, an additional \$7.0 million may be used for thermionics technology development.

Research, Development, Test and Evaluation, Navy—Overview

The budget request for fiscal year 2002 included an authorization of \$11,123.4 million for Research, Development, Test and Evaluation, Navy in the Department of Defense.

The Senate bill would authorize \$11,134.8 million.

The House amendment would authorize \$10,863.3 million.

The conferees recommended an authorization of \$10,784.3 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Follow-on support jamming aircraft

The budget request included \$112.5 million in PE 64270N for electronic warfare development, but included no funds for pre-engineering and manufacturing development (EMD) risk reduction activities for a follow-on support jamming aircraft program to replace the EA-6B.

The House amendment would authorize an increase of \$10.0 million for pre-EMD risk reduction activities for a follow-on support jamming aircraft program.

The Senate bill included no similar authorization.

The conferees agree to authorize no additional funds for a follow-on support jamming aircraft program.

The conferees recognize that the Department of Defense is scheduled to complete the Analysis of Alternatives (AoA) in December 2001 and believe that the Department will identify a need to replace the capability currently provided by the EA-6B fleet of electronic warfare aircraft. The conferees believe that the Department should move expeditiously to translate the results of that AoA into a plan that will avoid having the Nation presented with any gap in this important mission area.

Future destroyer program

The budget request included \$288.4 million in PE 63513N and \$355.1 million in PE 64300N for the DD-21 program.

The Senate bill would authorize the budget request.

The House amendment would authorize a decrease of \$25.0 million in PE 63513N.

Subsequent to passage of both the Senate bill and the House amendment, the Navy announced intentions to restructure the DD-21 program to a family of surface combatants including a destroyer version, DD(X). How-

ever, the specifics of the proposed programs for development of the family of surface combatants were not available for the conferees to review.

Therefore, the conferees agree to authorize a decrease of \$50.0 million in PE 63513N resulting from the delay in the down-select to a future destroyer detail design. The conferees will review the Navy's decision to restructure DD-21 when the Navy makes available details of the cancellation of the current request for proposals and the proposed replacement program.

Littoral support craft—experimental

The budget request included \$85.3 million in PE 63123N for force protection advanced technology, including \$20.0 million for development and demonstration of experimental craft for littoral support operations. The Office of Naval Research has proposed to conduct a phased program to develop and demonstrate an experimental littoral support craft demonstrator (LSC-X) that would build upon development and evaluation of operational concepts at the component and subsystem level and provide the basis for operational experiments on the contribution that such craft could make to naval operations in the littoral.

The House amendment would authorize a total of \$39.0 million in PE 63123N for development and demonstration of an LSC-X, including an increase of \$19.0 million for demonstration and development of an experimental craft for littoral support operations.

The Senate bill included no similar authorization. However, the Senate report accompanying S. 1438 (S. Rept. 107-62) identified at least six efforts that the Navy has underway to test key technologies for future ship programs. The Senate report also would encourage the Navy to focus ship design efforts on

programs that will collect the type of information that will be needed to make decisions on future combatant ships, the future amphibious ship (LH(X)), the future joint command and control ship (JCC(X)), and the maritime prepositioning force ship of the future (MPF(F)), rather than duplicating efforts already underway.

The conferees agree to authorize a total of \$31.0 million in PE 63123N, an increase of \$11.0 million, to continue the ONR program for development and demonstration of the LSC-X.

The conferees direct that the Secretary of the Navy identify the set of experimental objectives that the LSC-X program is intended to explore, and the objective measures of effectiveness that will be used to determine whether those objectives have been achieved. The conferees also direct the Secretary to define the program plan, the schedule, and the funding requirements for development of LSC-X. The Secretary should provide all of this information to the congressional defense committees by March 31, 2002.

Research, Development, Test and Evaluation, Air Force—Overview

The budget request for fiscal year 2002 included an authorization of \$14,344.0 million for Research, Development, Test and Evaluation, Air Force in the Department of Defense.

The Senate bill would authorize \$14,459.5 million.

The House amendment would authorize \$14,485.7 million.

The conferees recommended an authorization of \$14,407.2 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Joint Strike Fighter

The budget request included no funding for PE 63800N or PE 63800F for continuing demonstration and validation (DEMVAl) of the joint strike fighter (JSF). The budget request included \$767.3 million for PE 64800N and \$769.5 million for PE 64800F for initiating the engineering and manufacturing development (EMD) of the JSF.

The Senate bill would authorize an increase of \$30.0 million for PE 63800N and an increase of \$30.0 million for PE 63800F to continue JSF DEMVAL. The Senate bill would also authorize a decrease of \$153.6 million for PE 64800N and a decrease of \$153.6 million for PE 64800F. The Senate bill based these actions on a possible delay in the award of the EMD contract.

The House amendment would authorize the budget request for PE 64800N, and an increase of \$10.0 million for PE 64800F for the JSF alternate engine program.

The conferees agree to authorize the budget request.

The conferees remain concerned about the technical risks associated with the JSF aircraft engine and expect the Department to develop and integrate the JSF alternate engine within the EMD program. The conferees believe that the Department should execute the alternate engine program with a goal of having that engine integrated into the JSF prior to full rate production.

The conferees are aware of the potential long-term impact to the military aircraft industrial base as a result of the recently completed source selection. Source selection talking points, released by the Department of Defense (DOD) at the announcement of the selection, stated: "The JSF downselect may lead companies to reassess their strategic position and teaming arrangements. The expertise resident in the teams not selected today can still make a contribution to the JSF effort through revised industrial teaming arrangements. DoD will encourage teaming arrangements that make the most

efficient use of the expertise in the industrial base to deliver the 'best value' product."

The conferees direct the Under Secretary of Defense for Acquisition, Technology, and Logistics to submit a report, with the submission of the fiscal year 2003 budget request, which details: (1) projections for the military aircraft industrial base, to include foreign military sales, between now and fiscal year 2015; and (2) actions taken by the DOD to encourage teaming arrangements in the JSF program that make the most efficient use of the expertise in the industrial base.

Low cost launch technologies

The budget request included \$54.5 million in PE 63401F for advanced spacecraft technology, but included no funds for low cost launch technology.

The Senate bill would authorize, of the funds authorized in PE 63882C for the Mid-course Ground Defense System, \$15.0 million for the Excalibur and Scorpius low cost launch concepts.

The House amendment would authorize \$15.0 million in PE 63401F for low cost launch technologies, including Scorpius.

The conferees note that the Air Force has terminated the Excalibur project. The conferees agree to authorize an increase of \$2.0 million in PE 63401F for low cost launch technologies, including Scorpius. Of the funds authorized in PE 63401F, an additional \$13.0 million may be used for low cost launch technologies, including Scorpius.

Special aerospace materials and materials manufacturing processes

The budget request included \$77.2 million for PE 62102F for applied research in materials, \$32.7 million for PE 63112F for advanced development of advanced materials for weapons systems, and \$53.8 million in PE 78011F for the Air Force's manufacturing technology program.

The House amendment would authorize increases of \$4.5 million in PE 62102F, \$4.5 million in PE 63112F, and \$3.5 million in PE 78011F to continue the program for development and demonstration of special aerospace materials and materials manufacturing processes.

The Senate bill would authorize an increase of \$16.5 in PE 62102F, including \$5.0 million for improvements in the manufacturing of speciality aerospace materials.

The conferees agree to an increase of \$3.5 million in PE 62102F to continue the program for applied research and development in special aerospace materials and materials manufacturing processes.

The conferees note the continuing need of the military services for advances in speciality aerospace metals and metal alloys for aircraft and space vehicle structures, propulsion, components, and weapon systems. The conferees direct the Secretary of the Air Force, in coordination with the Secretary of the Navy, to assess the requirements for advanced aerospace metals and alloys and report to the congressional defense committees on the plan, including budget, schedule, and technology demonstrations, for meeting these requirements with the submission of the fiscal year 2004 budget request.

Research, Development, Test and Evaluation, Defense-Wide—Overview

The budget request for fiscal year 2002 included an authorization of \$15,050.8 million for Research, Development, Test and Evaluation, Defense-Wide in the Department of Defense.

The Senate bill would authorize \$13,878.7 million.

The House amendment would authorize \$15,109.6 million.

The conferees recommended an authorization of \$14,372.6 million. Unless noted explicitly in the statement of managers, all changes are made without prejudice.

Arrow missile defense system

The budget request included \$65.7 million in PE 63881C for the Arrow ballistic missile defense system, a joint development program between the United States and Israel.

The Senate bill would authorize an increase of \$76.0 million in PE 63881C for the Arrow System Improvement Program and for continued joint interoperability efforts.

The House amendment would authorize an increase of \$30.0 million in PE 63881C for acceleration of the Arrow System Improvement Program.

The conferees agree to authorize, from within funds available to the Ballistic Missile Defense Organization, an increase of \$53.0 million in PE 63881C to accelerate the Arrow System Improvement Program and to continue joint interoperability efforts for U.S. and Israeli missile defense systems.

Ballistic missile defense advanced technology

To support critical ballistic missile defense technology activities, the conferees agree that, of the funding authorized for the Ballistic Missile Defense Organization, certain amounts may be used for advanced technology activities as specified below:

(1) up to \$9.0 million for the Magdalena Ridge Observatory in PE 63175C;

(2) up to \$5.0 million for Phase III of the Software Defined Radio program in PE 63175C;

(3) up to \$8.0 million for the Army Space and Missile Defense Command's Advanced Research Center (ARC) in PE 63880C;

(4) up to \$8.0 million for the Airborne Infrared Surveillance System (AIRS) in PE 63175C;

(5) up to \$2.5 million for Bottom Anti-Reflective Coatings (BARC) for circuit boards in PE 63175C;

(6) up to \$7.5 million for ultra-flat planarization technology for integrated circuits in PE 63175C; and

(7) up to \$10.0 million for the Atmospheric Interceptor Technology (AIT) program in PE 63175C.

Common database asset for biological security

The budget request included \$125.5 million in PE 62384BP for applied research in chemical and biological defense.

The Senate bill would authorize an increase of \$1.5 million to develop a database of biological pathogen information and bioinformatics tools to support development of medical biological countermeasures.

The House amendment included no similar authorization.

The conferees agree to authorize an increase of \$1.5 million for the development of a common database asset to support development of medical biological countermeasures. The database would integrate genomic and other biological data about high-priority pathogens, underlying scientific research and bioinformatics tools, and would serve those agencies addressing threats to biological security.

ITEMS OF SPECIAL INTEREST

Navy research and development budget exhibits

The Senate report accompanying S. 1438 (S. Rept. 107-62) would require the Navy to comply with the research and development budget justification guidelines included in the Department of Defense (DOD) Financial Management Regulation (DOD 7000.14-R). Subsequent to the passage of the Senate bill, the Navy provided additional budget justification information to the congressional defense committees.

The conferees share the concern expressed in the Senate report regarding the reorgani-

zation of the Navy's science and technology program elements in the fiscal year 2002 budget justification material. The failure of the Navy to display explicitly the transition between the fiscal year 2001 program element structure and the new fiscal year 2002 structure detracted from the ability of the defense authorizing committees to exercise their oversight responsibilities.

The conferees also share the Senate's concern about the priority given to Fleet and Force operational and support issues in the Navy's science and technology program and direct the Secretary of the Navy to report to the congressional defense committees by March 31, 2002, on the measures being taken to address these issues.

The conferees direct the Secretary of the Navy and the Under Secretary of Defense (Comptroller) to ensure that the Navy's budget justification information accompanying the fiscal year 2003 budget request adequately describes the Navy's science and technology program and complies with the requirements of DOD 7000.14-R. The Under Secretary shall report to the congressional defense committees with submission of the budget request any deficiencies in the budget justification material and the estimated date by which those deficiencies will be resolved.

LEGISLATIVE PROVISIONS ADOPTED

Subtitle A—Authorization of Appropriations
Authorization of appropriations (secs. 201–202)

The Senate bill contained provisions (secs. 201–202) that would authorize the recommended fiscal year 2002 funding levels for all research, development, test, and evaluation accounts.

The House amendment contained similar provisions.

The conference agreement includes these provisions.

Supplemental authorization of appropriations for fiscal year 2001 for Research, Development, Test, and Evaluation Defense-Wide (sec. 203)

The Senate bill contained a provision (sec. 233) that would authorize an increase of \$1.0 million in fiscal year 2001 for intelligent spatial technologies for smart maps.

The House amendment contained no similar provision.

The House recedes.

Subtitle B—Program Requirements,
Restrictions, and Limitations*Naval surface fire support assessment (sec. 211)*

The House amendment contained a provision (sec. 212) that would direct the Secretary of Defense to establish a competitive program for the development of an advanced land attack missile (ALAM) for the DD-21, and would designate \$20.0 million in PE 63795N for that purpose. The provision would also require the Secretary to submit a report on the program plan, schedule and funding for the ALAM program.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to carry out an assessment of the requirements for naval surface fire support of ground forces operating in the littoral environment, including the role of an advanced fire support missile system for Navy combatant vessels. The amended provision would require that the Secretary submit a report on the results of that assessment by March 31, 2002.

Collaborative program for development of advanced radar systems (sec. 212)

The House amendment contained a provision (sec. 213) that would establish a coopera-

tive research program to develop electronic materials for advanced radar applications.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would eliminate reference to specific dollar amounts for the programs. These dollar issues are treated in the funding tables in this report.

The conferees agree to a provision that would establish a cooperative research program to develop electronic materials for advanced radar applications. The conferees recognize the emerging importance of advanced electronic materials on future military systems, including advanced radar systems and other applications across services.

The provision would direct the Director of Defense Research and Engineering, the Secretary of the Navy, the Director of Defense Advanced Research Projects Agency (DARPA), and other appropriate services and agencies to enter into a collaborative agreement in order to coordinate ongoing efforts within this critical emerging technology area. The conferees believe that the agreement should focus on: (1) activities needed for technology development to extend the range and sensitivity of naval radars, including high frequency and high power wide band gap semiconductor materials and devices; and (2) acquisition systems to accelerate the deployment of the new technology.

The conferees expect the agreement to be constructed in a manner such that the Services and Agencies will increase financial investments to support necessary research, technology transition, and technology insertion activities. The conferees are concerned that, despite a recognition within the Navy of the importance of this emerging technology, the Office of Naval Research budget submission includes only very limited funding for wide band gap electronics research.

In addition, the conferees expect that any agreement will enable DARPA to maintain the flexibility to invest in a variety of research programs and directions associated with wide band gap technologies that will apply to numerous cross-service applications. This will preserve DARPA's role of developing revolutionary technologies and capabilities, while remaining relatively unconstrained from near-term requirements.

Repeal of limitations on total cost of engineering and manufacturing development for F-22 aircraft program (sec. 213)

The Senate bill contained a provision (sec. 211) that would repeal the cost limitation on the engineering and manufacturing development (EMD) phase for the F-22 aircraft program.

The House amendment contained a provision (sec. 214) that would have raised the cost limitation on the F-22 EMD program by \$250.0 million.

The House recedes with an amendment that would clarify that the repeal of the cost limitation would apply only to the EMD phase of the program.

Joint biological defense program (sec. 214)

The Senate bill contained a provision (sec. 214) that would extend through fiscal year 2002 section 217 (a) of the Floyd D. Spence National Defense Authorization Act for Fiscal Year 2001 to define permissible obligations and identify reports to be provided to Congress concerning procurement of anthrax vaccine.

The House amendment contained no similar provision.

The House recedes.

Cooperative Department of Defense-Department of Veterans Affairs Medical Research Program (sec. 215)

The House amendment contained a provision (sec. 211) that would authorize funding for the cooperative Department of Defense/Department of Veterans Affairs medical research program.

The Senate bill contained no similar provision.

The Senate recedes with an amendment.

The conferees agree to authorize \$2.5 million in PE 63738D8Z for the cooperative Department of Defense/Department of Veterans Affairs medical research program for research on the efficacy of antiarrhythmic drugs with implantable cardioverter defibrillators. The conferees direct the Secretary of Defense to transfer such amount no later than 30 days after the date of the enactment of this Act.

C-5 aircraft reliability enhancement and reengining program (sec. 216)

The Senate bill contained a provision (sec. 212) that would require the Secretary of the Air Force to ensure that engineering and manufacturing development (EMD) under the C-5 aircraft reliability enhancement and reengining program (RERP) includes kit development for an equal number of C-5A and C-5B aircraft. The Air Force program envisioned a total of four aircraft in the RERP EMD program.

The House amendment contained no similar provision.

The House recedes with an amendment that would require the Secretary to include at least one aircraft from among the 74 C-5A aircraft in the C-5 RERP EMD program.

SUBTITLE C—BALLISTIC MISSILE DEFENSE

Transfer of responsibility for procurement for missile defense programs from Ballistic Missile Defense Organization to military departments (sec. 231)

The House amendment contained a provision (sec. 231) that would amend section 224 of title 10, United States Code, to change the term "procurement" to the term "research, development, test and evaluation" with respect to the display of budget amounts in budget requests for the Ballistic Missile Defense Organization (BMDO). The provision would also require the Secretary of Defense to establish criteria for the transfer of ballistic missile defense programs from the BMDO to the military departments and to submit these criteria to the congressional defense committees. Prior to the transfer of such a program, the Secretary would be required to notify Congress of his intent to make such a transfer and to certify that the program had met the criteria for transfer. The provision would permit such a transfer 60 days after Congress is notified.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would require the Secretary of Defense to ensure that, for any transferred program, all appropriate conforming changes are made to proposed or projected funding allocations in the future years defense program. This will ensure that the funding is transferred with a program from the BMDO to a military department. The amendment would also require that, before a program is transferred, the roles and responsibilities are clearly defined for follow-on research, development, test and evaluation related to system improvement for that program.

The budget request proposed transferring the Patriot PAC-3 and the Medium Extended Air Defense System (MEADS) to the Army,

and the Navy Area Defense system to the Navy. This provision would delay any such transfer until the requirements of the provision have been met. Consequently, the conferees agree to authorize funding for these ballistic missile defense programs within the BMDO accounts, and not with the military departments.

Program elements for Ballistic Missile Defense Organization (sec. 232)

The House amendment contained a provision (sec. 232) that would repeal section 223 of title 10, United States Code, which established program elements for ballistic missile defense (BMD) programs.

The Senate bill contained no similar provision.

The Senate recedes with an amendment that would revise the program elements for ballistic missile defense and require certain information and reviews concerning BMD activities.

The amendment would establish six new functional program elements and require that additional program elements be established for BMD programs entering into engineering and manufacturing development (EMD).

The amendment would require the Secretary of Defense to establish cost, schedule, testing and performance goals for BMD programs for the period covered by the future years defense program and to submit a statement of those goals to Congress each year.

The amendment would require the Secretary of Defense to submit to Congress each year an annual program plan for BMD programs that enter EMD or the equivalent phase, including a funding profile that displays estimated total funding and expenditures for significant procurement, construction and research and development, as well as a program schedule for significant procurement, construction, research and development, flight tests, and other significant test activities. Information included in annual budget justification documents need not be included in the plan.

The amendment would require that specified Department of Defense officials and elements review and comment on the development of goals and the annual program plan required in the provision.

The amendment would require the Director of the Ballistic Missile Defense Organization (BMDO) to develop a plan to ensure that each critical technology for a BMD program is demonstrated in an appropriate environment before entering operational service. The Director of Operational Test and Evaluation would review and comment on the plan.

The amendment would require, at the end of fiscal years 2002 and 2003, the Comptroller General of the United States to assess the extent to which the BMDO achieved the goals established by the Secretary of Defense for BMD programs, as required by the provision, and to report to Congress on the assessment.

The amendment would also require the Director of Operational Test and Evaluation to assess each year the adequacy and sufficiency of the BMDO test program for the preceding year, and to report to Congress on the assessment.

Ballistic missile defense budget justification

The President's budget proposed moving most ballistic missile defense programs into Research, Development, Test and Evaluation, Defense-Wide, and grouping them primarily into five large program elements.

The conferees are concerned that this year's budget justification documentation

does not include the level of detail provided in past years for many of the projects within the new program elements. While supportive of the administration's intent to experiment with and test new technologies prior to committing to system development and acquisition, the conferees expect to receive appropriate levels of detailed funding, schedule, and test event information as required by annual budget justification reporting guidelines.

In addition to information provided for those programs that have entered engineering and manufacturing development, or an equivalent phase as described in the legislative provision, the Secretary of Defense shall ensure that each year's budget justification documents include the following information for programs and projects in earlier stages of research and development:

(1) funding appropriated in the previous year;

(2) the expected funding requirement for the next six years, by year; and

(3) detailed schedule including hardware and software deliveries, to the extent known, and planned decision points and test events, at least through completion of the planned testing and evaluation of the prototype or experiment.

This information shall be provided as part of the annual program plan report required by the provision, for programs and projects as identified above and any program or project identified as a matter of special interest, provided the information is not already included in budget justification materials accompanying the annual budget request.

Ballistic missile defense programs are among the most technologically challenging and complex in the Department of Defense. The exploration of leading edge technologies associated with missile defense programs often involves significant costs. Department of Defense directives and instructions (e.g., Department of Defense Instruction 5000.2) require the compilation of acquisition cost, life-cycle cost, and total ownership costs for defense projects and programs where available and approved. The conferees direct the Department of Defense to fully comply with the requirements of these DOD directives and instructions, including Department of Defense Instruction 5000.2.

Support of ballistic missile defense activities of the Department of Defense by the National Defense Laboratories of the Department of Energy (sec. 233)

The House amendment contained a provision (sec. 233) that would, at the discretion of the Director of the Ballistic Missile Defense Organization (BMDO), make available from funds authorized to be appropriated for the BMDO up to \$25.0 million for research development and demonstration activities at the national laboratories of the Department of Energy National Nuclear Security Administration (NNSA) in support of the missions of the BMDO. The funds would be available subject to the provision of matching funds by the NNSA. Activities funded using this authority would be conducted under terms of the September 14, 2001 Memorandum of Understanding (MOU) between the Director of the BMDO and the Administrator of the National Nuclear Security Administration for use of the national laboratories by the BMDO.

The Senate bill contained no similar provision.

The Senate recedes.

The provision would authorize the Director of the BMDO to use funds available to

BMDO, on a discretionary basis, to utilize the national laboratories of the NNSA under the terms and conditions of the MOU. The terms of this MOU require that jointly-funded work done pursuant to the MOU be mutually beneficial to the missions of the two Departments.

The conferees note that the NNSA laboratories do a substantial amount of work for the Department of Defense in their role as federally funded research and development centers on a Work for Others basis. The conferees do not intend for this provision in any way to affect the ability of the BMDO to contract with the NNSA laboratories to conduct work under the Work for Others program. On the contrary, the conferees urge the Director to look closely at the capabilities of the NNSA laboratories and to utilize these capabilities fully.

Missile defense testing initiative (sec. 234)

The House amendment contained a provision (sec. 234) that would establish certain guidelines and requirements for the ballistic missile defense testing program of the Department of Defense.

The Senate bill contained no similar provision.

The Senate recedes with a clarifying amendment.

Construction of test bed facilities for missile defense system (sec. 235)
